Spatial and Non-Spatial Aspects of Neglect Jun 25 2019 Neglect is one of the most impressive neuropsychological disorder, for both its theoretical and clinical relevance. Besides being very common and disabling, it is highly informative for understanding normal cognitive functioning. The hallmark of neglect is the failure to attend to the contralesional hemispace. However, several studies have recently highlighted that additional deficits, not attributable to a spatial bias, are associated to the impaired contralesional hemispace processing. Moreover, manifestations of neglect tend to be particularly heterogeneous and often dissociate according to the spatial domain being investigated (e.g., body space, space within reaching, space beyond reaching, imaginal space). Heterogeneity in neglect patients also means that dissociations across different tasks in a single patient are more the rule than the exception. Evidence suggests that some of these dissociations can be readily explained by taking into account the amount of available attentional resources as a major determinant for the presence and the severity of neglect. There is no doubt that neglect patients provide a wealth of information about the functioning of systems subserving attentional orienting and spatial processing. Moreover, their performance also show that some non-spatial deficits are tightly coupled with more classic contralesional spatial deficits. It seems however still unclear to what extent these non-spatial deficits are an intrinsic characteristic of neglect or whether they are to be considered unspecific effects of the often massive brain lesions suffered by the patients. From the clinical point of view, neglect is a disorder that dramatically affects patients and their caregivers, because it severely limits the individuals' autonomy and motor recovery after brain damage. For these reasons neglect is a disorder that is worth rehabilitating. To be effective, neglect rehabilitation should be based on the knowledge of what cognitive aspects are impaired and it should be focused on improving daily-life performance. For these reasons, it is also important to detect and quantify subtle forms of neglect.

2015 HCPCS Level II Professional Edition - E-Book Aug 08 2020 For quick, accurate, and efficient coding, choose 2015 HCPCS Level II, Professional Edition. In an easy-to-use, spiral-bound format, this full-color reference presents the latest Healthcare Common Procedure Coding System codes to help you comply with coding regulations, confidently locate specific codes, manage reimbursement for supplies, report patient data, code Medicare cases, prepare for ICD-10 coding, and more. This professional edition includes such features as Netter's Anatomy illustrations, dental codes, and ASC (Ambulatory Surgical Center) payment and status indicators. UNIQUE! Full-color Netter's Anatomy illustrations clarify complex anatomic information and how it affects coding. At-a-glance code listings and distinctive symbols identify all new, revised, reinstated, and deleted codes for 2015. The American Hospital Association Coding Clinic® for HCPCS citations provides sources for information about specific codes and their usage. Convenient spiral binding provides easy access in practice settings. Quantity feature highlights units of service allowable per patient, per day, as listed in the Medically Unlikely Edits (MUEs) for enhanced accuracy on claims. Drug code annotations identify brand-name drugs as well as drugs that appear on the National Drug Class

(NDC) directory and other Food and Drug Administration (FDA) approved drugs. Color-coded Table of Drugs makes it easier to find specific drug information. Durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) indicators clearly identify supplies to report to durable medical third-party payers. Ambulatory Surgery Center (ASC) payment and status indicators show which codes are payable in the Hospital Outpatient Prospective Payment System. American Dental Association (ADA) Current Dental Terminology code sets offer access to all dental codes in one place. Jurisdiction symbols show the appropriate contractor to be billed for suppliers submitting claims to Medicare contractors, Part B carriers, and Medicare administrative contractors submitting for DMEPOS services provided. Special coverage information provides alerts when codes have specific coverage instructions, are not valid or covered by Medicare, or may be paid at the carrier's discretion. Age/Sex edits identify codes for use only with patients of a specific age or sex. Codingupdates.com companion website includes updates, physician/provider payment edits, and the opportunity to sign up for automatic e-mail notifications. UPDATED 2015 official code set ensures compliance with current Healthcare Common Procedure Coding System (HCPCS) standards, optimizes reimbursement, and assists with quick, accurate, and efficient coding. Enhanced, expanded index makes locating codes easier than ever.
