Cyber Resilience of Systems and Networks Jan 01 2020 This book introduces fundamental concepts of cyber resilience, drawing expertise from academia, industry, and government. Resilience is defined as the ability to recover from or easily adjust to shocks and stresses. Unlike the concept of security - which is often and incorrectly conflated with resilience -- resilience refers to the system's ability to recover or regenerate its performance after an unexpected impact produces a degradation in its performance. A clear understanding of

distinction between security, risk and resilience is important for developing appropriate management of cyber threats. The book presents insightful discussion of the most current technical issues in cyber resilience, along with relevant methods and procedures. Practical aspects of current cyber resilience practices and techniques are described as they are now, and as they are likely to remain in the near term. The bulk of the material is presented in the book in a way that is easily accessible to non-specialists. Logical, consistent, and continuous discourse covering all key topics relevant to the field will be of use as teaching material as well as source of emerging scholarship in the field. A typical chapter

provides introductory, tutorial-like material, detailed examples, in-depth elaboration of a selected technical approach, and a concise summary of key ideas.

Ccie/CCNP Security Sncf 300-710 Oct 22 2021 Best Selling Cisco Author Todd Lammle has just completed his newest study guide: CCNP Security Securing Networks with Cisco Firepower (SNCF) 300-710-the most popular

CCNP Security elective! This book, written by the preeminent Cisco Firepower expert, thoroughly covers the Cisco CCNP SNCF exam objectives in a step-by-step, user friendly manner that will help get you through the grueling Cisco exam the first time!Covers ALL the CCNP Security Cisco Firepower SNCF 300-710 exam objectives! Real life examples abound in this book!You will go step-by-step through setting up a Cisco Firepower Management Center (FMC) and Cisco Firepower Threat Defense (FTD), as well as the Firepower 7000/8000 Appliances.Learn the following: Install a virtual and hardware FMC with System configuration, licensing and health policy, and then bring your devices into the FMC to be managed.Install a Cisco Firepower Appliance using inline, passive, switching, routing and BVI.Includes 4100/9300 Install with FXOS and Chassis Manager in-depth!Learn and configure High Availability for hardware FMC's and all FTD devices, followed by an intense monitoring and troubleshooting section.Configure FXOS Chassis Manager and bring up a virtual FTD and ASA image, as well as RadWare. Configure multi-instance on the Chassis manager, and then understand what a cluster is and how to configure a cluster. Most importantly, understand the traffic flow which is very important or the exam and not written anywhere else! Learn about FTD 1000/2100/4100 and 9300 new Devices and how to install, perform password recovery and how to bring them into a FMC!Install a Cisco Firepower Threat Defense (FTD) and configure it with IP addresses, IP routing, NAT and VPN. Prepare it to be managed by a FMCConfigure the full Snort process of Security Intelligence (SI), Prefilter, DNS Policy, SSL Policy, Network Analyst Policy (NAP), AD Identity Policy and Realms, the main Access Control Policy, QoS, Firepower Network Discovery, File & Malware Policy, IPS policy, Advanced IPS policy, User Management, Advanced Network Analysis and more!Experience the detailed step-by-step building of an intense and detailed Access Control Policy (ACP), designed by the most experienced Firepower instructor/consultant that you can use in your own network!Learn how to tune your Cisco FMC policies with advanced network analysis tools found only in this book! Create, configure and manage a Cisco Snort IPS policy in detail, and fine tune it!Created by an author with more than 30 years' experience in Cisco, and over 10,000 FTD device installs! The amount of Cisco Firepower knowledge in this book cannot be beat!This book is focused on the CCNP Security Cisco Firepower SNCF objectives! Rheological Measurement Sep 28 2019 In many cases rheological measurements are carried out in the simplest of geometries, but the interpretation involved in obtaining the rheological parameters of the test fluids from these measurements is surprisingly complex. The purpose of this book is to emphasise the points on which most workers in the field agree, and to let the authors deal with the contentious points according to their own beliefs and experience. This work represents a summary of the current thought on rheological meas urement by experts in the various techniques. When making measurements and obtaining from them parameters that describe the flow behaviour of the test fluids, it is essential that the experimentalist understands the underlying theory and shortcomings of the measurement technique, that he is aware of the likely microstructure of the fluid, and that from this he can appreciate how the fluid and the measuring system will interact with each other. It is this interaction that gives both the required rheological parameters of the fluids and the artefacts that confuse the issue. This book covers the main rheological measurement techniques from capillary, slit and stretching flows to rotational and oscillatory rheometry in various geometries including sliding plate measurements. These topics are backed up by chapters on more practical aspects, such as commercial instruments, and on computer control and data acquisition. The chapters deal with the basic methods, how the measurements are taken, and what assumptions and interpretations are made to obtain valid data on the test fluids.

Energy Research Abstracts Jun 29 2022 Semiannual, with semiannual and annual indexes. References to all scientific and technical literature coming from DOE, its laboratories, energy centers, and contractors. Entry gives bibliographical information and abstract. Corporate, author, subject, report number indexes.

Indonesia's Fires and Haze Aug 27 2019 From September to November of 1997, raging fires in Indonesia pumped enough smoke into the air to blanket the entire region in haze, reaching as far north as southern Thailand and the Philippines, with Malaysia and Singapore being particularly affected. This book conservatively assesses the damage at US $4.5 billion, more than the Exxon Valdez oil spill and India's Bhopal chemical spill combined. It looks at the causes of the fires, the physical damages that resulted, and their effects on heath, industrial production, and tourism, among others.

Format and Content of the Safety Analysis Report for Nuclear Power Plants Jan 31 2020 This Safety Guide is intended primarily for use with land based stationary thermal nuclear power plants but it may, in parts, have a wider applicability to other nuclear facilities. It provides recommendations and guidance on the possible format and content of a SAR in support of a request to the State regulatory body for authorization to construct and or operate a nuclear power plant. As such, it contains recommendations on meeting the requirements of Safety guide GS-R-1 "Legal and governmental infrastructure for nuclear, radioactive waste and transport safety" (2000, ISBN 9201008007)

Applied Linear Statistical Models Jan 13 2021 Applied Linear Statistical Models 5e is the long established leading authoritative text and reference on statistical modeling. For students in most any discipline where statistical analysis or interpretation is used, ALSM serves as the standard work. The text includes brief introductory and review material, and then proceeds through regression and modeling for the first half, and through ANOVA and Experimental Design in the second half. All topics are presented in a precise and clear style supported with solved examples, numbered formulae, graphic illustrations, and "Notes" to provide depth and statistical accuracy and precision. Applications used within the text and the hallmark problems, exercises, and projects are drawn from virtually all disciplines and fields providing motivation for students in virtually any college. The Fifth edition provides an increased use of computing and graphical analysis throughout, without sacrificing concepts or rigor. In general, the 5e uses larger data sets in examples and exercises, and where methods can be automated within software without loss of understanding, it is so done.

The Cup of Destiny Jun 17 2021 Reading tea leaves is a traditional divinatory method passed on through generations. The Cup of Destiny reveals the secrets of this ancient method, allowing you to make predictions for yourself and your friends. This kit includes a beautiful, decorated cup and saucer for making readings, and an illustrated book explaining how to interpret the patterns you will find in your cup. The first part of the book describes the ritual of turning the cup counter-clockwise and draining the left-over tea into the saucer. It goes on to explain the meanings of over 200 of the signs and symbols you are likely to see in the leaves when making a reading. The explanations accompanying these allow you to relate them to real events and future possibilities, providing clear insights which can be startlingly accurate: a heart near the rim of the cup means that love is not far away, while a cake may signify a celebration or a party. So, have a cup of tea and see what the leaves have to say about your future!

Software and Data Technolgoies Nov 22 2021 This book contains the best papers of the Third International Conference on Software and Data Technologies (ICSOFT 2008), held in Porto, Portugal, which was organized by the Institute for Systems and Technologies of Information, Communication and Control (INSTICC), co-sponsored by the Workflow Management Coalition (WfMC), in cooperation with the Interdisciplinary Institute for Collaboration and Research on Enterprise Systems and Technology (IICREST). The purpose of ICSOFT 2008 was to bring together researchers, engineers and practitioners interested in information technology and software development. The conference tracks were "Software Engineering", "Information Systems and Data Management", "Programming Languages", "Distributed and Parallel Systems" and "Knowledge Engineering". Being crucial for the development of information systems, software and data te- nologies encompass a large number of research topics and applications: from imp- mentation-related issues to more abstract theoretical aspects of software engineering; from databases and data-warehouses to management information systems and kno- edge-base systems; next to that, distributed systems, pervasive computing, data qu- ity and other related topics are included in the scope of this conference.

"*Smart Technologies*" *for Society, State and Economy* Jul 07 2020 This proceedings book presents a comprehensive view of "smart" technologies and perspectives of their application in various areas of economic activity. The authors of the book combined the results of the cutting-edge research on the topic of "smart" technologies in the digital economy and Industry 4.0 and developed a unified scientific concept. The current experience has been considered, and the prospects for the application of "smart" technologies in society to promote social advance have been identified. "Smart" technologies in public administration and law, as well as the experience in development of e-government, have been examined. "Smart" technologies in business activity have been studied, and the transition from digital business to business 4.0 has been justified. The book contains the collection of the best works following the results of the 13th International Research-to-Practice Conference "Smart Technologies" for society, state and economy which was run by the Institute of Scientific Communications (ISC) and was held on July 2–3, 2020. The target audience of this book includes researchers investigating fundamental and applied problems of development of "smart" technologies, as well as concerned parties outside the academic community, in particular, representatives of the digital society, high-tech business entities and officials regulating the digital economy and Industry 4.0.
