Pop Science Nov 12 2020 A Pulitzer Prize-winning journalist uses data, facts, and science to deliver hilarious, fascinating answers to some of the most famous questions in pop music history. "Is there life on Mars? Where have all the flowers gone? Pop songs can pose excellent questions and James Ball has given them the answers they deserve."—The Times (UK) Some of the most famous questions of our time have come to us in pop songs. "What is love?" "How soon is now?" "How do you solve a problem like Maria?" But do you know the answers? Breaking down lyrics from Bob Dylan, Queen, Rihanna, the Ting Tings, Billy Joel, and a variety of other genre- and decade-spanning artists with colorful graphs and Venn diagrams, Pop Science reveals the exact points where lowbrow pop culture and the highest science and philosophy meet. By revealing the economic status of doggies in windows, what war is good for, and what becomes of the brokenhearted, James Ball uncovers what we have always known—that pop music is the key to life itself.

The Philosophy of Law and Legal Science Jun 27 2019 The book explores a variety of problems connected to philosophy and philosophy of law. It discusses the problem of monism-pluralism in philosophy and philosophy of law, criticizes philosophy of post-positivism and postmodernism, and investigates dialectics as a universal global methodological basis of scientific cognition and philosophy of law. The volume also pays particular attention to contemporary legal education, offering potential solutions to problems in this field. The book is the result of a range of sociological studies conducted both in Russia and abroad concerning the legal process and legal consciousness.

Religion and the Natural Sciences Dec 02 2019 The first half of 'Religion and the Natural Sciences' is an introduction to the discussion of science and religion. Here the reader learns why there is any debate at all and what resources exist for responding to it. The second half deals with specific issues that arise in the individual sciences, from astronomy and physics to biology and ecology. Any project hoping to connect science and religion must supply the categories of connection, which are found primarily, although not exclusively, in philosophy. The simplicity of the arrangement and the nature of the selections are intended to make 'Religion and the Natural Sciences' available to as wide an audience as possible, including students from the sciences and technology, the professions, the humanities and liberal studies, and theology.
