The Romulan War: Beneath the Raptor's Wing Apr 23 2022 With nothing left to lose, the Romulan Star Empire engages in all-out war against humanity, determined once and for all to stop the human menace from spreading across the galaxy. At the start of the twenty-first century, unconditional war swept across the Earth. A war that engulfed the great and the small, the rich and the poor, giving no quarter. Each side strove for unconditional victory, and as battle built upon battle, the living began to envy the dead. Chastised by the cataclysm that they had unleashed, the governments of Earth came together. Humanity vowed to put an end to war and to strive for the betterment of every living creature. A united Earth created Starfleet, an interstellar agency whose mission was to explore the cosmos, to come in peace for all mankind. It was a naïve wish that was battered by interstellar realities, yet man persists in the belief that peace is the way. Banding together with other powers to form a Coalition of Planets, humanity hopes that the strength each can offer the other will allow for peaceful exploration. However, the rise of the Coalition strikes dread within the Romulan Star Empire. They feel its growing reach will cut them off from what is rightfully theirs. The Romulans know that the alliance is fragile, that the correct strategy could turn allies into foes. Perfecting a way of remotely controlling Coalition ships and using them as weapons against one another, the Romulans hope to drive a wedge of suspicion and mistrust between these new allies. One Starfleet captain uncovers this insidious plot: Jonathan Archer of the Enterprise. Determined not to lose what they have gained, outmanned and outgunned, the captains of Starfleet stand tall, vowing to defend every inch of Coalition space until the tide begins to turn.

[Think Straight](#) Aug 03 2020 Put simply, Think Straight is an owner's manual for the human brain. Drawing from the vast history of scientific and cognitive research, this book is a tour de force through the science and philosophy of the human mind, and what it means to think as a rational human being in the 21st century. Our world is awash in mis- and disinformation, baseless conspiracy theories, New Age ideology, anti-science propaganda, and all manner of magical thinking. Pseudo-experts fill the airwaves with false and bogus claims, news media twist and spin information to suit their ends, celebrities and corporations push evidence-free beliefs on their followers, and politicians continue to mislead the masses with false promises and bad thinking. In careful detail, author Jon Guy investigates the art of thinking critically, offering readers the ability to empower themselves and our society at large. In order to think critically, we must also learn what it means to know, what knowledge is, how to investigate, how to question, and how everything from computer algorithms written by geniuses to psychological traits embedded in us from our evolutionary origins conspire to construct a model of reality that we have much reason to doubt. The human mind is not only the most powerful and complex structure ever discovered, it is also riddled with a host of flaws, shortcomings, errors, and limitations, most of which none of us are ever made aware of. Critical thinking is the ability to both capitalize on the strengths and power of human cognition, as well as understand and combat the error-prone nature of our brains. Think Straight encourages us to accept that not everything we think is true and explores how we can compensate for the many errors of our minds. Backed by the best available research and data, and written in clear and decisive language, Think Straight provides readers with the proper guidance and tools to improve your thinking, inform your decisions, avoid fraud and deceit, and make the world a better place to live and prosper.

F-22 Model Oct 05 2020 This book contains detailed instructions on building the F-22 Raptor 1/48 scale model aircraft from Hasegawa. A spiral bound version is available at glennhoovermodels.com You really need this book to successfully build this model. This model has over 600 kit and aftermarket parts with hundreds of decals. Can any sane modeler keep track of this build? The likelihood of you missing a part or doing a step out of order where you can't go back and fix because it's too late are high. In addition to the kit's instructions, there are 6 aftermarket kits each with their own instruction. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Hasegawa and break them up into individual steps. I reorder the steps so that the small pieces (antennas, etc.) are assembled last which reduces the risk of damage when building the model. The steps are organized to insert the paint and decal steps in the best spot. I also incorporate Eduard's Photo Etch sets 48619, 48669, 49514, and 49534 along with Hasegawa's QG39 PE set and Wolfpack's Nozzle Set in with Hasegawa's instructions. As most modelers know, it can be tricky to go back and forth between the model kit instructions and the aftermarket kit instructions. I took out the guesswork and did that for you. The aftermarket steps are color coded making them easy to skip if you just have the basic model. This book provides a little history of the Raptor, photos of the model kit contents including the aftermarket kits, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 1208 steps and 140 plus figures over 194 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Hasegawa or aftermarket instruction) along with a block to mark that you completed the step. The major instruction sequence for this model is 1. Cockpit 2. Main Weapon Bay 3. Sub-weapon Bay 4. Nose Landing Gear Wheel Well 5. Main Landing Gear Wheel Well 6. Engine Exhausts 7. Engine Intake 8. Join Upper & Lower Fuselage Sections 9. Flaps and Stabilizer Dry Fit 10. Paint Prep with Canopy 11. Camo Paint 12. Decals 13. Exhaust Nozzles 14. Landing Gear 15. Weapons Bay Doors 16. Canopy 17. Pilot 18. Engine Covers 19. Ladde rI provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I did a lot of research and didn't see anything this detailed about a model build. Most articles or videos concentrate on parts of their build or just give a summary review. I wanted to go down to the piece level and take you thru the whole build. Anyway, I hope you find this book useful. See a 16-page sample along with photos of finished models and other books at glennhoovermodels.com.
