[The Globalization of Asian Cuisines](#) Mar 29 2022 This volume is a collection of historical and ethnographic accounts of Asia's increasingly globalized cuisines. Using extensive empirical research, the authors describe the increasingly transnational organization of culinary fields, multicultural culinary contact zones, and state-led culinary politics. Chapters include studies of the pathways in which Asian cuisines cross borders and subsequently interact with local culinary systems. Authors also study how cuisines from abroad enter into Asian cities and are modified in transnational urban settings. Multi-sited and cross-border ethnographic fieldwork and comparative qualitative case studies uncover the culinary networks and the cultural politics of these traveling cuisines. This volume shows that cuisines in Asia are less and less produced locally but rather in networks of producers, suppliers, entrepreneurs and patrons moving across borders.

The Globalization of Irish Traditional Song Performance Dec 14 2020 In The Globalization of Irish Traditional Song Performance Susan Motherway examines the ways in which performers mediate the divide between local and global markets by negotiating this dichotomy in performance practice. In so doing, she discusses the globalizing processes that exert transformative influences upon traditional musics and examines the response to these influences by Irish traditional song performers. In developing this thesis the book provides an overview of the genre and its subgenres, illustrates patterns of musical change extant within the tradition as a result of globalization, and acknowledges music as a medium for re-negotiating an Irish cultural identity within the global. Given Ireland's long history of emigration and colonisation, globalization is recognised as both

a synchronic and a diachronic phenomenon. Motherway thus examines Anglo-Irish song and songs of the Irish Diaspora. Her analysis reaches beyond essentialist definitions of the tradition to examine evolving sub-genres such as Country & Irish, Celtic and World Music. She also recognizes the singing traditions of other ethnic groups on the island of Ireland including Orange-Order, Ulster-Scots and Traveller song. In so doing, she shows the disparity between native conceptions and native realities in respect to Irish cultural Identity."

Globalization and Its Discontents Aug 29 2019 From Nobel laureate Joseph Stiglitz, *Globalization and its Discontents* is the bestselling exposé of the all-powerful organizations that control our lives. Joseph Stiglitz's landmark book lifted the lid on how globalization was hurting those it was meant to help. Many of its predictions came true, and it became a touchstone in the debate. This major new edition looks afresh at the continuing mismanagement of globalization, and how it has led to our current political and economic discontents. Globalization can still be a force for good, Stiglitz argues. But the balance of power has to change. Here he offers real, tough solutions for the future. 'A massively important political as well as economic document ... we should listen to him urgently' Will Hutton, *Guardian* 'Stiglitz is a rare breed, an heretical economist who has ruffled the self-satisfied global establishment that once fed him. Globalization and its Discontents declares war on the entire Washington financial and economic establishment' Ian Fraser, *Sunday Herald* 'Gripping ... this landmark book shows him to be a worthy successor to Keynes' Robin Blackburn, *Independent*

Civil Aviation and the Globalization of the Cold War Feb 02 2020 This book focuses on the highly complex and intertwined relationship between civil aviation, technological globalization and Cold War politics. It explores how the advancement of Soviet civil aircraft engineering during the 1950s technically triggered the globalization of the Cold War. The study also shows how the processes of technological standardization facilitated transfers of technology and knowledge across the Iron Curtain and how East-West as well as East-South connections evolved. It uncovers the motives and reasons for this transfer of knowledge and expertise, and aims to identify the specific roles played by states, international organizations and interpersonal networks. By taking a global approach to this history, the book advances ongoing debates in the field. It reassesses Europe's role in the Cold War, pointing out the substantial differences in how Western Europe and the United States viewed the Communist world. This book will be of interest to scholars of international history, the history of technology and Cold War history.

Crazy Like Us Jan 15 2021 The most devastating consequence of the spread of American culture across the globe has not been our golden arches or our bomb craters, but our bulldozing of the human psyche itself. American-style depression, post-traumatic stress disorder, and anorexia have begun to spread around the world like contagions, and the virus is us. Traveling from Hong Kong to Sri Lanka to Zanzibar to Japan, acclaimed journalist Ethan Watters witnesses firsthand how Western healers often steamroll indigenous expressions of mental health and madness and replace them with

our own. In teaching the rest of the world to think like us, we have been homogenizing the way the world goes mad.

The Globalization of Gender Nov 24 2021 This book provides an insightful approach to understanding the contemporary circulations of feminist repertoires and shows how the international/transnational circulations of gender are interconnected, even coextensive, with the globalization process itself. Fed by a shared reflexivity on relations among activist groups, state institutions, and international actors involved in the production and dissemination of contemporary norms dealing with gender, each chapter shares methodological premises and studies the circulation of gender-related norms and knowledge in situ and by varying standpoints. Specifically, the authors de-compartmentalize the academic disciplines and go beyond classical geographic divisions, in order to map social spaces and networks of actors involved in the production and circulation of gender-related repertoires. Last, the book grasps circulatory processes and entangled social phenomena, which are usually subject to disciplinary and thematic divisions separating collective action and public action, development aid and feminism, law and international relations. Focused on collective and individual experiences within women's organizations, activist careers, unstable mobilizations, public policies temporalities, the chapters reveal the mechanisms through which these arrangements are made and shed light on strategies deployed by actors rooted in specific social and political contexts. This book will be of key interest to students and scholars of gender studies and more broadly to politics, International Relations, sociology, geography, history, and anthropology.

The Globalization of Corporate Governance Sep 10 2020 The process of economic globalization, as product and capital markets have become increasingly integrated since WWII, has placed huge, and it is argued by some, irresistible pressures on the world's 'insider' stakeholder oriented corporate governance systems. Insider corporate governance systems in countries such as Germany, so the argument goes, should converge or be transformed by global product and capital market pressures to the 'superior' shareholder oriented 'outsider' corporate governance model prevalent in the UK and the US. What these pressures from globalization are, how they manifest themselves, whether they are likely to cause such a convergence/transformation and whether these pressures will continue, lie at the heart of the exploration in this volume. *The Globalization of Corporate Governance* provides a detailed analysis of the evolution of the key corporate governance systems in the UK, the US and Germany from the perspective of the development of economic globalization. As such it is a valuable resource for those interested in how economic and legal reforms interact to produce change within corporate governance systems.

The Globalization of Russian Gas Apr 29 2022 Since the collapse of the Soviet Union, Gazprom has dominated the Russian gas industry. However, the markets in which it operates have changed dramatically, with the company increasingly being challenged at home and abroad. At this critical moment, this insightful book analyses the involvement of the Russian gas industry in the changing international gas market and the dramatic implications for Russia's role as a global supplier of gas in the future. James Henderson and Arild Moe explore the link between changes in Russia's domestic market, where new players have recently emerged, and the development of Russia's gas export business. In particular, they assess the growing importance of LNG exports and the role of Novatek in developing this new business area for Russia. They also review changes in European gas trade and the development of new EU regulations, analysing the ambiguities in Europe's position on gas exports from Russia and showing why

efforts to limit expansion of Russian gas exports have been unsuccessful. Timely and comprehensive, this book is critical reading for academics and researchers interested in the development of the global gas market. Policymakers and economists, particularly Russian specialists, will benefit from this book's key insights into the economic and political consequences of Russia's changing role in the global gas market.

The Globalization of Internationalization Oct 24 2021 The Globalization of Internationalization is a timely text which gives voice to emerging perspectives as an increasing range of countries engage in the process of internationalization. The pressure to internationalize cannot be ignored by institutions anywhere in today's world, yet the dominant paradigms in the conception of internationalization traditionally come from the English-speaking world and Western Europe. This book sets out to offer alternative viewpoints. Different dimensions and interpretations of internationalization in countries and regions whose perspectives have received little attention to date provide food for thought, and help to broaden understanding of its application in alternative contexts. Combining diverse perspectives from around the world, this new volume in the Internationalization in Higher Education series seeks answers to key questions such as: What are the main characteristics of internationalization viewed from different cultural and regional backgrounds and how do they differ from traditional models such as in Western Europe, North America and Australasia? What issues in different global contexts have an impact on internationalization processes? What are the key challenges and obstacles encountered in developing innovative and non-traditional models of internationalization? With contributions from world-renowned international authors, and perspectives from countries and contexts seen only rarely in the literature, The Globalization of Internationalization offers distinctive overviews and insights while exploring a range of thematic and regional issues arising from these considerations. This will be essential reading both as an academic resource and a practical manual for university leaders, academics, higher education policy advisers and non-governmental organizations which fund higher education.

The Globalization of Musics in Transit Jul 09 2020 This book traces the particularities of music migration and tourism in different global settings, and provides current, even new perspectives for ethnomusicological research on globalizing musics in transit. The dual focus on tourism and migration is central to debates on globalization, and their examination—separately or combined—offers a useful lens on many key questions about where globalization is taking us: questions about identity and heritage, commoditization, historical and cultural representation, hybridity, authenticity and ownership, neoliberalism, inequality, diasporization, the relocation of allegiances, and more. Moreover, for the first time, these two key phenomena—tourism and migration—are studied conjointly, as well as interdisciplinary, in order to derive both parallels and contrasts. While taking diverse perspectives in embracing the contemporary musical landscape, the collection offers a range of research methods and theoretical approaches from ethnomusicology, anthropology, cultural geography, sociology, popular music studies, and media and communication. In so doing, *Musics in Transit* provides a rich exemplification of the ways that all forms of musical culture are becoming transnational under post-global conditions, sustained by both global markets and musics in transit, and to which both tourists and diasporic cosmopolitans make an important contribution.

The Globalization of Inequality Nov 12 2020 Why national and international equality matter and what we can do to ensure a fairer world In *The Globalization of Inequality*, distinguished economist and policymaker François Bourguignon examines the complex and paradoxical links between a vibrant world economy that has raised the living standard of over half a billion people in emerging nations such as China, India, and Brazil, and the exponentially increasing inequality within countries. Exploring globalization's role in the evolution of inequality, Bourguignon takes an original and truly international approach to the decrease in inequality between nations, the increase in inequality within nations, and the policies that might moderate inequality's negative effects. Demonstrating that in a globalized world it becomes harder to separate out the factors leading to domestic or

international inequality, Bourguignon examines each trend through a variety of sources, and looks at how these inequalities sometimes balance each other out or reinforce one another. Factoring in the most recent economic crisis, Bourguignon investigates why inequality in some countries has dropped back to levels that have not existed for several decades, and he asks if these should be considered in the context of globalization or if they are in fact specific to individual nations. Ultimately, Bourguignon argues that it will be up to countries in the developed and developing world to implement better policies, even though globalization limits the scope for some potential redistributive instruments. An informed and original contribution to the current debates about inequality, this book will be essential reading for anyone who is interested in the future of the world economy.

This book is a skilful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically. The Globalization of Science Curricula Mar 17 2021 Globalization is a powerful force with far reaching impacts on education and education policy. The growth of large scale international surveys of student achievement and the increasing role played by intergovernmental agencies in education means that the influence that globalization exerts on education is likely to increase even further in the future. This open access book provides a significant and timely investigation into the impacts that globalization has exerted on science curricula in a diverse range of countries using extensive data sets collected by the IEA between 1995 and 2015. Using a combination of quantitative and qualitative methods, this book considers the extent to which there have been changes to the intended and implemented science curricula in different countries over the last 20 years. Consideration is then given as to whether science curricula are becoming increasingly similar across countries over time. Finally the issue of whether the basis of an international core curriculum can be identified is addressed. Readers will gain a unique insight into the extent to which globalization and large scale international assessments have influenced science curricula in the last 20 years within both the primary and secondary phases.

The Globalization of Foreign Aid Jun 27 2019 Why do aid agencies from wealthy donor countries with diverse domestic political and economic contexts arrive at very similar positions on a wide array of aid policies and priorities? This book suggests that this homogenization of policy represents the effects of common processes of globalization manifest in the aid sector. Drawing on both quantitative and qualitative analysis of policy adoption, the book argues that we need to examine macro-level globalizing influences at the same time as understanding the micro-level social processes at work within aid agencies, in order to adequately explain the so-called *emerging global consensus* that constitutes the globalization of aid. The book explores how global influences on aid agencies in Canada, Sweden, and the United States are mediated through micro-level processes. Using a mixed-methods approach, the book combines cross-national statistical analysis at the global level with two comparative case studies which look at the adoption of common policy priorities in the fields of gender and security. The Globalization of Foreign Aid will be useful to researchers of foreign aid, development, international relations and globalization, as well as to the aid policy community.

The Globalization of Pentecostalism May 19 2021 ""This book, comprising a sweeping range of well-documented articles on Pentecostal theology,

hermeneutics, missiology, and the social sciences, provides for the student of Pentecostals a window on contemporary Pentecostal scholarship that discloses vigorous engagement with critical issues. The editors have provided a resource that promises to stimulate further research and reflection." William Menzies, Chancellor, Asia Pacific Theological Seminary, Baguio City, Philippines. Excerpts from Respondents Jose Miguez Bonino on Changing Paradigms: "An updating of Pentecostal thinking on a whole spectrum of theological disciplines: systematics, missiology, biblical studies, history, and praxis . . . a wealth of information and reflection." Vinay Samuel on Global Culture: "Global Pentecostalism can bring a new impetus to the movement for Christian unity . . . it has much to contribute to the shaping of a new 21st century definition for Christian unity." Harvey Cox on A Postmodern World: "There was a time when Pentecostals warned themselves and anyone else who would listen not to become entangled with and dependent on the 'things of the world.' Pentecostals were suspicious of the passing fads of stylish clothing, the latest hairdo, and glitzy new consumer products. They were also, as it turns out rightly, suspicious that the powerful new mass media could be a seductive lure, tricking people into the empty values of the consumer market culture. Perhaps it is time for a rebirth of that ethic of simplicity, that suspicion for 'the things for the world' for which the early Pentecostals were so famous."
