Helping People Win at Work Mar 15 2021 Ken Blanchard's *Leading at a Higher Level* techniques are inspiring thousands of leaders to build high-performing organizations that make life better for everyone. Now, in *Helping People Win at Work*, Blanchard and WD-40 Company leader Garry Ridge reveal how WD-40 has used Blanchard's techniques of *Partnering for Performance* with every employee—achieving levels of engagement and commitment that have fortified the bottom line. Ridge introduces WD-40 Company's year-round performance review system, explaining its goals, features, and the cultural changes it requires. Next, he shares his leadership point of view: what he expects of people, what they can expect of him, and where his beliefs about leadership and motivation come from. Finally, Blanchard explains why WD-40 Company's *Partnering for Performance* system works so well—and how to leverage its high-value techniques in your organization. In this book, you'll learn how to: · Stop building failure into your mentoring of employees · Set goals using the SMART approach: specific, motivational, attainable, relevant and trackable · Help people move through all four stages of mastery · Create a culture that shares knowledge and encourages nonstop learning "I'm thrilled that the first book in our *Leading at a Higher Level* series is with Garry Ridge, president of WD-40 Company. For years I've been concerned about how people's performance is evaluated. People are often forced into a normal distribution curve, or even worse, rank ordered. Not only does this not build trust, it also does not hold managers responsible for coaching people and helping them win. The manager's responsibility is focused on sorting people out. When I was a college professor, I always gave my students the final exam at the beginning of the course and spent the rest of the semester helping them answer the questions so that they could get an A. Life is all about getting As, not some stupid normal distribution curve. Garry Ridge got this, and wow! What a difference it has made in WD-40 Company's performance." --Ken Blanchard "When I first heard Ken talk about giving his final exam at the beginning of the course and then teaching students the answers so they could get an A, it blew me away. Why don't we do that in business? So that's exactly what I did at WD-40 Company when we set up our 'Don't Mark My Paper, Help Me Get an A' performance management system. Has it made a difference? You'd better believe it. Ever since we began the system, our company's annual sales have more than tripled, from \$100 million to more than \$339 million. And we've accomplished this feat while making the company a great place to work." --Garry Ridge

Women's Perspectives on Ancient and Medieval Philosophy Nov 30 2019 This book promotes the research of present-day women working in ancient and medieval philosophy, with more than 60 women having contributed in some way to the volume in a fruitful collaboration. It contains 22 papers organized into ten distinct parts spanning the sixth century BCE to the fifteenth century CE. Each part has the same structure: it features, first, a paper which sets up the discussion, and then, one or two responses that open new perspectives and engage in further reflections. Our authors' contributions address pivotal moments and players in the history of philosophy: women philosophers in antiquity, Cleobulina of Rhodes, Plato, Lucretius, Bardaisan of Edessa, Alexander of Aphrodisias, Plotinus, Porphyry, Peter Abelard, Robert Kilwardby, William Ockham, John Buridan, and Isotta Nogarola. The result is a thought-provoking collection of papers that will be of interest to historians of philosophy from all horizons. Far from being an isolated effort, this book is a contribution to the ever-growing number of initiatives which endeavour to showcase the work of women in philosophy.

The World and Language in Wittgenstein's Philosophy Mar 03 2020 This book explores the interrelated concepts of representation and grammar in the philosophy of Ludwig Wittgenstein. Throughout his life, Wittgenstein was obsessed with the problem of the nature of language and the relationship between language and the world. His intellectual journey, one of the most compelling in twentieth century thought, is the detailed adventure told by Gordon Hunnings in *The World and Language in Wittgenstein's Philosophy*. This book surveys Wittgenstein's elucidation of how the world is represented in language, including the posthumously published material of his middle period. Early in his career, Wittgenstein's answer to the problem explored the representational connection between language and the world through the analogy of propositions as logical pictures of facts. Later, his mature answer elucidated the concept of the world as a construction of logical grammar. Hunnings shows how these shifting images of reality reflected in language also mirror the changes in Wittgenstein's philosophy.

On Philosophy and Philosophers Aug 20 2021 "Philosophers suffer from a peculiar occupational hazard; people are always coming up and asking them just what it is that they do and how they do it. This is not the sort of question that biologists or economists or musicians get asked; people know, pretty well, what they do, and they may or may not be interested in the details. But a philosopher is different - it is very hard to imagine just what he does with his time"--

Analytic Philosophy in Finland Jul 27 2019 Finland is internationally known as one of the leading centers of twentieth century analytic philosophy. On Bullshit Dec 24 2021 A #1 NEW YORK TIMES BESTSELLER One of the most salient features of our culture is that there is so much bullshit. Everyone knows this. Each of us contributes his share. But we tend to take the situation for granted. Most people are rather confident of their ability to recognize bullshit and to avoid being taken in by it. So the phenomenon has not aroused much deliberate concern. We have no clear understanding of what bullshit is, why there is so much of it, or what functions it serves. And we lack a conscientiously developed appreciation of what it means to us. In other words, as Harry Frankfurt writes, "we have no theory." Frankfurt, one of the world's most influential moral philosophers, attempts to build such a theory here. With his characteristic combination of philosophical acuity, psychological insight, and wry humor, Frankfurt proceeds by exploring how bullshit and the related concept of humbug are distinct from lying. He argues that bullshitters misrepresent themselves to their audience not as liars do, that is, by deliberately making false claims about what is true. In fact, bullshit need not be untrue at all. Rather, bullshitters seek to convey a certain impression of themselves without being concerned about whether anything at all is true. They quietly change the rules governing their end of the conversation so that claims about truth and falsity are irrelevant. Frankfurt concludes that although bullshit can take many innocent forms, excessive indulgence in it can eventually undermine the practitioner's capacity to tell the truth in a way that lying does not. Liars at least acknowledge that it matters what is true. By virtue of this, Frankfurt writes, bullshit is a greater enemy of the truth than lies are.

Afrikiology, Philosophy and Wholeness. An Epistemology Aug 08 2020 How do we understand and create knowledge? Does scientific knowledge cover all knowledge? Afrikiology tries to answer these questions by tracing the issue of epistemology to the Cradle of Humanity in Africa and through such a reflection the Monograph establishes a basis for holistic and integrated ways of knowledge production that makes it possible to interface scientific knowledge with other forms of knowledge. In this way Afrikiology responds to the crisis created by the fragmentation of knowledge through existing academic disciplines. Afrikiology therefore advances transdisciplinarity and hermeneutics to a level where they attain a coherent basis for interacting with Afrikiology as an epistemology which returns wholeness to understanding and knowledge production.

Music in German Philosophy Apr 15 2021 Though many well-known German philosophers have devoted considerable attention to music and its aesthetics, surprisingly few of their writings on the subject have been translated into English. Stefan Lorenz Sorgner, a philosopher, and Oliver F urbeth, a musicologist, here fill this important gap for musical scholars and students alike with this compelling guide to the musical discourse of ten of the most important German philosophers, from Kant to Adorno. Music in German Philosophy includes contributions from a renowned group of ten scholars, including some of today's most prominent German thinkers, all of whom are specialists in the writers they treat. Each chapter consists of a short biographical sketch of the philosopher concerned, a summary of his writings on aesthetics, and finally a detailed exploration of his thoughts on music. The book is prefaced by the editors' original introduction, presenting music philosophy in Germany before and after Kant, as well as a new introduction and foreword to this English-language addition, which places contemplations on music by these German philosophers within a broader intellectual climate.
