**Contemporary Issues of Equity in Education** Jul 31 2022 Contemporary Issues of Equity in Education argues that equity and social justice must be brought back to the centre of discussions about education. It traces international, system-wide and local effects of policies that increase marketization and competition between students, schools and systems, whilst erasing wider considerations of the socio-cultural contexts that shape educational experiences and outcomes. Leading researchers interrogate the design of educational systems for social justice, fairness and inclusion at multiple levels from classrooms and schools through to universities and initial teacher education. Chapters trace the ways in which gender, ethnicity, class, and refugee experiences intersect with indices of socio-economic disadvantage in ways that directly impact on young people's learning and on the pedagogical work of teachers. The book demonstrates collaborative and inclusive approaches for researching schooling in disadvantaged communities. It offers strategies and practices for reimagining schools and universities in ways that enable young people in high poverty and culturally and linguistically diverse communities to effectively engage with education.

**An Introduction to LTE** Oct 22 2021 Following on from the successful first edition (March 2012), this book gives a clear explanation of what LTE does and how it works. The content is expressed at a systems level, offering readers the opportunity to grasp the key factors that make LTE the hot topic amongst vendors and operators across the globe. The book assumes no more than a basic knowledge of mobile telecommunication systems, and the reader is not expected to have any previous knowledge of the complex mathematical operations that underpin LTE. This second edition introduces new material for the current state of the industry, such as the new features of LTE in Releases 11 and 12, notably coordinated multipoint transmission and proximity services; the main short- and long-term solutions for LTE voice calls, namely circuit switched fallback and the IP multimedia subsystem; and the evolution and current state of the LTE market. It also extends some of the material from the first edition, such as inter-operation with other technologies such as GSM, UMTS, wireless local area networks and cdma2000; additional features of LTE Advanced, notably heterogeneous networks and traffic offloading; data transport in the evolved packet core; coverage and capacity estimation for LTE; and a more rigorous treatment of modulation, demodulation and OFDMA. The author breaks down the system into logical blocks, by initially introducing the architecture of LTE, explaining the techniques used for radio transmission and reception and the overall operation of the system, and concluding with more specialized topics such as LTE voice calls and the later releases of the specifications. This methodical approach enables readers to move on to tackle the specifications and the more advanced texts with confidence.

**Hardware Protection through Obfuscation** Nov 30 2019 This book introduces readers to various threats faced during design and fabrication by today's integrated circuits (ICs) and systems. The authors discuss key issues, including illegal manufacturing of ICs or "IC Overproduction," insertion of malicious circuits, referred as "Hardware Trojans", which cause in-field chip/system malfunction, and reverse engineering and piracy of hardware intellectual property (IP). The authors provide a timely discussion of these threats, along with techniques for IC protection based on hardware obfuscation, which makes reverse-engineering an IC design infeasible for adversaries and untrusted parties with any reasonable amount of resources. This exhaustive study includes a review of the hardware obfuscation methods developed at each level of abstraction (RTL, gate, and layout) for conventional IC manufacturing, new forms of obfuscation for emerging integration strategies (split manufacturing, 2.5D ICs, and 3D ICs), and on-chip infrastructure needed for secure exchange of obfuscation keys- arguably the most critical element of hardware obfuscation.

Education System in Saudi Arabia Jun 05 2020 This book is a comprehensive study on the education system of Saudi Arabia, placing the reforms and changes it has undergone in the past two decades within the context of the historical evolution of the education system. An education system cannot be seen in isolation of the society; it plays a significant role in shaping the individual, state and the society, that in turn, have a bearing on the education system and its evolution. Therefore, this book locates Saudi education in the backdrop of the changes in the society, how they have facilitated or hindered the education reforms and how the education reforms have impacted the society. The book does not ignore the immediate trigger for the beginning of a comprehensive reforms process but goes beyond it to find much deeper socio-political and economic rationales that paved the way for the reforms. It provides a nuanced understanding of the interplays of various socioeconomic as well as political factors that have shaped the education system in Saudi Arabia.

**Militant Anti-Fascism** Jul 27 2019 Fascism is not a thing of the past and, in this era of crisis and austerity, it is growing even stronger. The fight against it must be aggressive and unrelenting. Using a mixture of orthodox history and eyewitness accounts, "M. Testa" makes the case for a resolutely militant anti-fascism, taking us from proto-fascists in nineteenth-century Austria to modern-day street-fights in London. Provocative, unapologetic, and based on extensive research. M. Testa, undercover anti-fascist blogger, has analyzed the changing fortunes of the British far right since 2009. He has written for the anarchist magazine Freedom and is a member of the Anti-Fascist Network.

**Urban Music and Entrepreneurship** May 29 2022 Youth unemployment in the UK remains around the one million mark, with many young people from impoverished backgrounds becoming and remaining NEET (Not in Education, Employment, or Training). However, the NEET categorisation covertly disguises and obscures the significance of the diverse range of activities, achievements and accomplishments of those who operate in the informal creative economy. With grime music and its related enterprise a key component of the urban music economy, this book employs the inherent contradictions and questions that emerge from an exploration of the grime music scene to build a complex reading of the socio-economic significance of urban music. Incorporating insightful dialogue with the participants in this economy, White challenges the prevailing wisdom on marginalised young people, whilst also confronting the assumption that the inertia and localisation of the grime culture results from its close links to NEET "members" and the informal sector. Offering an ethnographic and timely critique of the NEET classification, this compelling book would be suitable for undergraduate and post-graduate students interested in urban studies, business, work and labour, education and employment, ethnography, music, and cultural studies.

**An Empire of Others** Apr 03 2020 Ethnographers helped to perceive, to understand and also to shape imperial as well as Soviet Russia's cultural diversity. This volume focuses on the contexts in which ethnographic knowledge was created. Usually, ethnographic findings were superseded by imperial discourse: Defining regions, connecting them with ethnic origins and conceiving national entities necessarily implied the mapping of political and historical hierarchies. But beyond these spatial conceptualizations the essays particularly address the specific conditions in which ethnographic knowledge appeared and changed. On the one hand, they turn to the several fields into which ethnographic knowledge poured and materialized, i.e., history, historiography, anthropology or ideology. On the other, they equally consider the impact of the specific formats, i.e., pictures, maps, atlases, lectures, songs, museums, and exhibitions, on academic as well as non-academic manifestations.
