The Oxford Companion to American Theatre Jul 28 2019 First published in 1984, Gerald Bordman's Oxford Companion to American Theatre is the standard one-volume source on our national theatre. Critics have hailed its "wealth of authoritative information" (Back Stage), its "fascinating picture of the volatile American stage" (The Guardian), and its "well-chosen, illuminating facts" (Newsday). Now thoroughly revised, this distinguished volume once again provides an up-to-date guide to the American stage from its beginnings to the present. Completely updated by theater professor Thomas Hischak, the volume includes playwrights, plays, actors, directors, producers, songwriters, famous playhouses, dramatic movements, and much more. The book covers not only classic works (such as Death of a Salesman) but also many commercially successful plays (such as Getting Gertie's Garter), plus entries on foreign figures that have influenced our dramatic development (from Shakespeare to Beckett and Pinter). New entries include recent plays such as Angels in America and Six Degrees of Separation, performers such as Eric Bogosian and Bill Irwin, playwrights like David Henry Hwang and Wendy Wasserstein, and relevant developments and issues including AIDS in American theatre, theatrical producing by Disney, and the rise in solo performance. Accessible and authoritative, this valuable A-Z reference is ideal not only for students and scholars of theater, but everyone with a passion for the stage.

Integrated Air Quality Management Nov 04 2022 The steady growth in the number of vehicles on the road, heavy reliance on coal, use of dirty fuels for residential combustion, and extensive open burning are some of the major factors leading to the progressive deterioration of air quality in developing countries in Asia. And despite efforts to establish and implement air quality measurement systems, the development of infrastructure, environmental technology, and management practices continues to lag behind the rate of emission increase. Based on ten years of coordinated research, *Integrated Air Quality Management: Asian Case Studies* discusses technical and policy tools for the integrated air quality management of developing countries in Asia. The book begins with an overview of major issues of air quality management practices in developing Asia and potential approaches to reduce pollution, including opportunities for integration of air quality improvement and climate migration strategies. It covers the methodology and results of fine particulate matter monitoring using traditional filter-based and satellite monitoring techniques. It examines the applications of a 3D dispersion modeling tool for urban and regional air quality management focusing on surface ozone, fine particulate matter, and acid deposition. The final chapters discuss innovative control technologies for gaseous air pollutants and illustrate the integrated air quality management in developing Asia through case studies for target source categories including agricultural residue field burning, vehicle emissions, brick kilns, and industrial VOC emission. Illustrated with case studies, this book presents an integrated air quality management methodology that employs technical and policy tools to achieve air quality goals. It includes technical information and policy recommendations based on the outcomes of several multi-year air quality research programs coordinated by the Asian Institute of Technology. The text combines fundamental information and advanced knowledge useful to large audiences dealing with subjects of integrated air quality management.

Hai Darling! Oct 03 2022 Hai, Darling! Ianya adalah sebuah artikel sketsa rumah tangga khas ditujukan buat pasangan veteran atau otai seperti saya. Pasangan veteran yang bersungguh-sungguh berusaha memeriahkan dan menyuntik semula nilai-nilai romantis yang kian pupus dan menipis dalam rumah tangga. Zaman awal perkahwinan "Hai Darling!", "Sayanggg", "I love you" dan sebagainya sentiasa basah dibibir, tetapi bila dah punyai anak dan anak-anak semakin membesar, bait-bait menggetar sukma tersebut semakin menyepi dari bibir kita. Masalahnya, bila ada cubaan dari pasangan veteran ini untuk menghangatkan semula istilah ini, ianya pantas disalah ertikan pula. Buang tabiatlah, orang tua gatal lah, tak sedar dirilah dan sebagainya. Kononnya istilah tersebut hanya layak didendang oleh pasangan muda nan jelita sahaja.

Born to Believe May 06 2020 *Born to Believe* was previously published in hardcover as *Why We Believe What We Believe*. Prayer...meditation...speaking in tongues. What do these spiritual activities share and how do they differ? Why do some people believe in God,

while others embrace atheism? From the ordinary to the extraordinary, beliefs give meaning to the mysteries of life. They motivate us, provide us with our individual uniqueness, and ultimately change the structure and function of our brains. In *Born to Believe*, Andrew Newberg, MD, and Mark Waldman reveal -- for the very first time -- how our complex views, memories, superstitions, morals, and beliefs are created by the neural activities of the brain. Supported by groundbreaking original research, they explain how our brains construct our deepest convictions and fondest assumptions about reality and the world around us. Using science, psychology, and religion, the authors offer recommendations for exercising your brain in order to develop a more life-affirming, flexible range of attitudes. Knowing how the brain builds meaning, value, spirituality, and truth into your life will change forever the way you look at yourself and the world.

Conflict Without Casualties Feb 24 2022 Make Conflict Your Partner for Positive Change! Clinical psychologist and transformative communication expert Dr. Nate Regier believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is compassionate accountability: struggling with others through conflict.
