Backup and Recovery Jun 18 2021 Packed with practical, freely available backup and recovery solutions for Unix, Linux, Windows, and Mac OS X systems -- as well as various databases -- this new guide is a complete overhaul of Unix Backup & Recovery by the same author, now revised and expanded with over 75% new material. Backup & Recovery starts with a complete overview of backup philosophy and design, including the basic backup utilities of tar, dump, cpio, ntbackup, ditto, and rsync. It then explains several open source backup products that automate backups using those utilities, including AMANDA, Bacula, BackupPC, rdiff-backup, and rsnapshot. Backup & Recovery then explains how to perform bare metal recovery of AIX, HP-UX, Linux, Mac OS, Solaris, VMWare, & Windows systems using freely-available utilities. The book also provides overviews of the current state of the commercial backup software and hardware market, including overviews of CDP, Data De-duplication, D2D2T, and VTL technology. Finally, it covers how to automate the backups of DB2, Exchange, MySQL, Oracle, PostgreSQL, SQL-Server, and Sybase databases - without purchasing a commercial backup product to do so. For environments of all sizes and budgets, this unique book shows you how to ensure data protection without resorting to expensive commercial solutions. You will soon learn to: Automate the backup of popular databases without a commercial utility Perform bare metal recovery of any popular open systems platform, including your PC or laptop Utilize valuable but often unknown open source backup products Understand the state of commercial backup software, including explanations of CDP and data de-duplication software Access the current state of backup hardware, including Virtual Tape Libraries (VTLs)

Strategies and Communications for Innovations Nov 11 2020 The innovation economy sets new standards for global business and requires efficient innovation management to plan, execute and evaluate innovation activities, establish innovative capability and coordinate resources and capacities for innovation on an intra- and inter-organizational level. Moreover, communication of innovation is one essential impact factor of innovation success due to successful launches of innovations into markets, establishment of stakeholder relationships, and strengthened corporate reputation in the long-run. Consequently, the portfolio of communication activities for innovations has to be mastered by a company or collaborative network equal to the innovation portfolio. Thus, management of innovation and innovation communication on a strategic level play an important role in business nowadays. This new book concentrates on new approaches and methods for strategies and communications for innovations. As one part of the book, integrated perspectives on strategy and communication for innovation intend to bridge the gap between innovation management and communication management. This new book shall contribute to management science and answer current question in business. It provides cutting-edge information and offers a knowledge source for researchers, students, and business representatives who design, implement and manage innovation and innovation communication / marketing of innovation.

PDE Dynamics Sep 21 2021 This book provides an overview of the myriad methods for applying dynamical systems techniques to PDEs and highlights the impact of PDE methods on dynamical systems. Also included are many nonlinear evolution equations, which have been benchmark models across the sciences, and examples and techniques to strengthen preparation for research. PDE Dynamics: An Introduction is intended for senior undergraduate students, beginning graduate students, and researchers in applied mathematics, theoretical physics, and adjacent disciplines. Structured as a textbook or seminar reference, it can be used in courses titled Dynamics of PDEs, PDEs 2, Dynamical Systems 2, Evolution Equations, or Infinite-Dimensional Dynamics.

Tourism and Mobilities Jan 14 2021 In the current trend of increasing globalization, relationships are evolving between global and local realities, rich and poor regions of the world and 'old' and 'new' leisure and tourism patterns. The tourist has become an active agent in their travel experiences, moving between and among multiple localities, in an environment of transnational, interconnected social networks. In order to understand the modern tourist, concepts of mobility have begun to be applied to tourism studies and have questioned whether the word tourism is any longer sufficient to describe the complex socio-political milieu of people on the move. Bringing together theoretical and practical issues, this edited volume analyses tourism's wider role as an agent for the mobile modern population of the world. Themes range from post-modern youth and independent mobility to theoretical texts on hypermobility and citizenship within global space and mobility, media and citizenship. Offering a thought-provoking examination of modern tourism, this will be an important text for students of tourism and human geography as well as tourism professionals.

A Mathematical Approach to Research Problems of Science and Technology Jun 06 2020 This book deals with one of the most novel advances in mathematical modeling for applied scientific technology, including computer graphics, public-key encryption, data visualization, statistical data analysis, symbolic calculation, encryption, error correcting codes, and risk management. It also shows that mathematics can be used to solve problems from nature, e.g., slime mold algorithms. One of the unique features of this book is that it shows readers how to use pure and applied mathematics, especially those mathematical theory/techniques developed in the twentieth century, and developing now, to solve applied problems in several fields of industry. Each chapter includes clues on how to use "mathematics" to solve concrete problems faced in industry as well as practical applications. The target audience is not limited to researchers working in applied mathematics and includes those in engineering, material sciences, economics, and life sciences.

Active Margins and Marginal Basins of the Western Pacific May 18 2021 Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 88. This volume focuses on

the volcanic, fluid, sedimentary, and tectonic processes occurring in the trencharc-backarc systems of the western Pacific—a natural regional focus for studies of these themes. The results of ocean drilling and associated site surveys in the western Pacific have brought fundamental changes to our understanding of volcanism, crustal deformation, fluid circulation, and sedimentation in active margins and marginal basins. Our goal here is to synthesize the results of ocean drilling in a multi-disciplinary manner, including a comparison of the findings from drilling legs having similar themes, and to emphasize the significance of these results to the broader geoscience community.

Educational Media and Technology Yearbook May 06 2020 This book is an annual publication entering its 40th year. What School Leaders Need to Know About Digital Technologies and Social Media Aug 28 2019 Facebook, Twitter, Google...today's tech-savvy students are always plugged in. However, all too often their teachers and administrators aren't experienced in the use of these familiar digital tools. If schools are to prepare students for the future, administrators and educators must harness the power of digital technologies and social media. With contributions from authorities on the topic of educational technology, What School Leaders Need to Know About Digital Technologies and Social Media is a compendium of the most useful tools for any education setting. Throughout the book, experts including Will Richardson, Vicki Davis, Sheryl Nussbaum-Beach, Richard Byrne, Joyce Valenza, and many others explain how administrators and teachers can best integrate technology into schools, helping to make sense of the often-confusing world of social media and digital tools. They offer the most current information for the educational use of blogs, wikis and podcasts, online learning, open-source courseware, educational gaming, social networking, online

mind mapping, mobile phones, and more, and include examples of these methods currently at work in schools. As the book clearly illustrates, when these tools are combined with thoughtful and deliberate pedagogical practice, it can create a transformative experience for students, educators, and administrators alike. What School Leaders Need to Know About Digital Technologies and Social Media reveals the power of information technology and social networks in the classroom and throughout the education community.

Adolescent Literacies in a Multicultural Context Jul 28 2019 This book presents results from a four-year project addressing the central question: What factors, challenges, and contexts contribute to and constrain literacy achievement among at-risk adolescent learners with culturally diverse backgrounds? Researchers consider the importance of several, interrelated factors that support the development of adolescents' literacies in multilingual contexts: support from educators, community groups, families, and peers; recognition of the multi-faceted complexity of literacy through multiple, complementary methods of research and assessment; approaches to pedagogy that engage learners' zones of proximal development in humanistic and purposeful ways; and promoting students' vocabulary knowledge, strategies for reading, writing, and learning, and orientations to engaging with epistemic purposes of literacy critically, through multiple media, and with self-confidence.

Spoken Language Understanding Sep 29 2019 Spoken language understanding (SLU) is an emerging field in between speech and language processing, investigating human/ machine and human/ human communication by leveraging technologies from signal processing, pattern recognition, machine learning and artificial intelligence. SLU systems are designed to extract the meaning from speech utterances and its applications are vast, from voice search in mobile devices to meeting summarization, attracting interest from both commercial and academic sectors. Both human/machine and human/human communications can benefit from the application of SLU, using differing tasks and approaches to better understand and utilize such communications. This book covers the state-of-the-art approaches for the most popular SLU tasks with chapters written by well-known researchers in the respective fields. Key features include: Presents a fully integrated view of the two distinct disciplines of speech processing and language processing for SLU tasks. Defines what is possible today for SLU as an enabling technology for enterprise (e.g., customer care centers or company meetings), and consumer (e.g., entertainment, mobile, car, robot, or smart environments) applications and outlines the key research areas. Provides a unique source of distilled information on methods for computer modeling of semantic information in human/machine and human/human conversations. This book can be successfully used for graduate courses in electronics engineering, computer science or computational linguistics. Moreover, technologists interested in processing spoken communications will find it a useful source of collated information of the topic drawn from the two distinct disciplines of speech processing and language processing under the new area of SLU.

Strategy and Communication for Innovation Dec 01 2019 The innovation economy sets new standards for global business and requires efficient innovation management to plan, execute and evaluate innovation activities, establish innovation capability and coordinate resources and capacities for innovation on an intra- and inter-organizational level. Communication has become a critical factor underpinning successful innovation. As a new communication field, innovation communication facilitates the successful launches of new products and services, the establishment of stakeholder relationships, and the strengthening of corporate reputation in the long-run. Consequently, firms today need to develop a strong portfolio of communication tools as an integral part of their strategic innovation management activities. This new edition mainly concentrates on emerging approaches and methods for integrating communication as part of strategic innovation management. A key theme is the provision of an integrated perspective to bridge the gap between innovation management and communication management at both strategic and operational levels. This book makes an important contribution to this evolving academic domain by providing multiple perspectives on the latest research on innovation communication and strategic open innovation. It also provides guidance for managers seeking to understand the diverse ways by which they can leverage communication to support successful innovation.
