Rethinking the Case Study in International Business and Management Research Jan 20 2022 This important and original book places the case study in international business research in its historical context, critically evaluates current case study practices in the field and proposes a more pluralistic future for case research within international business and international management research. While the case study is the most popular qualitative research strategy in the field, only a narrow selection of possible approaches is currently used. IB and IM researchers typically rely on a case study approach that could be characterized as 'qualitative positivism'. The editors and contributors look beyond this disciplinary convention and encourage greater pluralism in IB and IM case research. Their key argument is that increased awareness of prevailing disciplinary conventions - and their limitations - increases the potential for methodological innovation and versatility in case research. The contributions provide critical, novel and innovative perspectives on the case study in IB and IM research. The book offers inspiration to case authors and an authoritative methodological

reference for those publishing and reviewing case research. It will also be highly regarded by postgraduate and doctoral students in IB and IM as well as both qualitative and quantitative researchers in the field.

The Case Study: Part 3 Apr 23 2022 This unit is the final part of the case studying which the overall structure (or architecture) of the case study's system software is considered. In particular, how the software that implements the model given in Unit 8 fits with a user interface. You will see how the system is implemented, including the construction of the user interface, and how to select unit and system tests. The software development activities followed are carried through for a small partition of the whole system; only limited functionality is implemented, to produce quickly an initial working system that can be used as a prototype, to allow us to confirm with users some of the requirements, and make refinements where appropriate.

Case study research is not an easy option and this book points out where the challenges are and what needs to be done to become a competent case study researcher. Issues which are given

particular attention include different types of case study, the issue of how many cases are required, research proposals and research protocols when using case studies, the collection and analysis of data. The process also can be used to investigate broadly occurring phenomena without programmatic links, such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful reproducible worksheets facilitate multicase recording and analysis.

Pragmatic Approach to Qualitative Case Study Research Learning by Doing: A Case of Distance Learning Research in Malaysia (UUM Press) Sep 23 2019 This book for anyone who wants to undertake an engaging, satisfying, productive, and a more successful career as a qualitative researcher. This book is intended to contribute to the popularisation of qualitative research in Malaysia. Qualitative studies in educational research are very limited in many countries; and to date, there has been very little work done using this form of educational inquiry in Malaysia. The dominant tradition has followed the positivist paradigm. A qualitative case study offers a different approach and generates a range of information of different qualities from that obtained using traditional approaches. This book provides both the theories and practical practices to undertake a qualitative study. The conception of this book began from the assumption that our world is interpreted through language as means of communication and understanding. Writing narratives

of experience is becoming a common way of describing how people make sense of their experience or problems at hand. At the root of the naturalistic inquiry exhibited in this book, is an interest in understanding the experience of learners and the meanings they make of the distance learning experience at Universiti Utara Malaysia (UUM). This study was designed as a single case focusing on distance learners of different backgrounds in UUM.

Case Study Research Jun 13 2021 *Case Study Research: Principles and Practices* aims to provide a general understanding of the case study method as well as specific tools for its successful implementation. These tools can be utilized in all fields where the case study method is prominent, including business, anthropology, communications, economics, education, medicine, political science, social work, and sociology. Topics include the definition of a 'case study,' the strengths and weaknesses of this distinctive method, strategies for choosing cases, an experimental template for understanding research design, and the role of singular observations in case study research. It is argued that a diversity of approaches - experimental, observational, qualitative, quantitative, ethnographic - may be successfully integrated into case study research. This book breaks down traditional boundaries between qualitative and quantitative, experimental and nonexperimental, positivist and interpretivist.

The Case for Case Studies May 24 2022 This book seeks to narrow two gaps: first, between the widespread use of case studies and their frequently 'loose' methodological moorings; and second, between the scholarly community advancing methodological frontiers in case study research and the users of case studies in development policy and practice. It draws on the contributors' collective experience at this nexus, but the underlying issues are more broadly relevant to case study researchers and practitioners in all fields. How does one prepare a rigorous case study? When can causal inferences reasonably be drawn from a single case? When and how can policy-makers reasonably presume that a demonstrably successful intervention in one context might generate similarly impressive outcomes elsewhere, or if massively 'scaled up'? No matter their different starting points - disciplinary base, epistemological orientation, sectoral specialization, or practical concerns - readers will find issues of significance for their own field, and others across the social sciences. This title is also available Open Access.

The Facilitator Era Jun 20 2019 Some time ago, Ralph Winter brilliantly identified three eras of modern missions: Era 1: William Carey focused on the coastlands; Era 2: Hudson Taylor focused on the inlands; Era 3: Donald McGavran and Cameron Townsend focused on unreached peoples. With all the fast and furious changes swirling around us today in twenty-first century missions, have we entered a Fourth Era? If so, who are the people primarily involved? How are they selected? How are they trained? How long do they serve? Has the Third Era ministry focus--reaching the unreached--changed? If so, to what? Are there any successful case studies out there? Have McGavran and Townsend passed the baton to a new leader(s)? If so, to whom? This book seeks to answer these and related questions.
