***Foraging Theory Applied to Medical Information Searching* May 22 2022**
Workload and other constraints prevent General Practitioners from accessing medical evidence for clinical decisions. This problem was studied in New Zealand GPs using Optimal Foraging Theory developed in ecology. GPs' information search strategies were modelled as sequential steps associated with costs and benefits measured from logbooks of actual searches. By consulting the most profitable sources, switching sources when unsuccessful, and double checking, GPs seem close to an optimal trade-off between maximizing search success and information reliability, and minimizing searching time. Subsidised training in

information searching and provision of a literature search service are two inferred avenues to access medical evidence.

***Hybrid Artificial Intelligent Systems* Nov 16 2021** This volume constitutes the proceedings of the 10th International Conference on Hybrid Artificial Intelligent Systems, HAIS 2015, held Bilbao, Spain, June 2014. The 60 papers published in this volume were carefully reviewed and selected from 190 submissions. They are organized in topical sections such as data mining and knowledge discovery; video and image analysis; bio-inspired models and evolutionary computation; learning algorithms; hybrid intelligent systems for data mining and applications; classification and cluster analysis, HAIS applications.

Impossibly Hard Word Search May 30 2020 100 puzzles, 40 words to find for each. Typically, you would find all 40 words. But this isn't your typical word search book. This is THE BOOK to buy for your friends that you don't really like, or anyone you'd like to tick off. Because they won't find all 40 words for each puzzle. They may find 5. They may find 4 1/2. They may find words that aren't even in the list. But one thing is guaranteed: They will go crazy trying to find the rest. There are no answers at the back, because answers are for chumps. Find your own stuff.

Notices to Correspondents Consisting of Several Thousand Editorial Answers, Selected from the Best Authorities, Supplying a Fund of Information which Cannot be Obtained from Any Other Source. The 12th Thousand Jan 06 2021

Keyword Search in Databases Jan 18 2022 It has become highly desirable to provide users with flexible ways to query/search information over databases as simple as keyword search like Google search. This book surveys the recent developments on keyword search over databases, and focuses on finding structural information among objects in a database using a set of keywords. Such structural information to be returned can be either trees or subgraphs representing how the objects, that contain the required keywords, are interconnected in a relational database or in an XML database. The structural keyword search is completely different from finding documents that contain all the user-given keywords. The former focuses on the interconnected object structures, whereas the latter focuses on the object content. The book is organized as follows. In Chapter 1, we highlight the main research issues on the structural keyword search in different contexts. In Chapter 2, we focus on supporting structural keyword search in a relational database management system using the SQL query language. We concentrate on how to generate a set of SQL queries that can find all the structural information among records in a relational database completely, and how to evaluate the generated set of SQL queries efficiently. In Chapter 3, we discuss graph algorithms for structural keyword search by treating an entire relational database as a large data graph. In Chapter 4, we discuss structural keyword search in a large tree-structured XML database. In Chapter 5, we highlight several interesting research issues regarding keyword search on databases. The book can be used as either an extended survey for people who are interested in the structural keyword search or a reference book for a postgraduate course on the related topics. Table of Contents: Introduction / Schema-Based Keyword Search on Relational Databases / Graph-Based Keyword Search / Keyword Search in XML Databases / Other Topics for Keyword Search on Databases

Education 2.0 Apr 28 2020 Thirty years of spirited school reforms have failed to improve our schools and instead have left our public school systems in disarray. Meanwhile, employment prospects for high school and college graduates are fading, and the public is losing faith in its schools. The education paradigm inherited from the Industrial Era is in crisis. In the last decade, however, the Internet and new Web 2.0 technologies have placed the entirety of human knowledge in the hands of everyone. What will our educational institutions make of this unprecedented flood of Web-based learning resources? How can schools be transformed to accommodate the new possibilities for personal and social learning? Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book. Drawing on new organizational models grounded in complexity theory, Waks maps out an inspiring new paradigm for education in the Internet age, and connects all the dots in constructing detailed models for new schools-now transformed into "open learning centers." Finally, Waks details action steps readers can take to speed this transformative process along in their own locations.

Psychology: Modules for Active Learning Oct 03 2020 PSYCHOLOGY: MODULES FOR ACTIVE LEARNING is a best-selling text by renowned

author and educator Dennis Coon and co-authors John O. Mitterer and Tanya Martini. This fourteenth edition continues to combine the highly effective SQ4R (Survey, Question, Read, Recite, Reflect, Review) active learning system, an engaging style, appealing visuals, and detailed coverage of core topics and cutting-edge research in one remarkable, comprehensive text. Fully updated, the new edition builds on the proven modular format and on the teaching and learning tools integrated throughout the text. While the text provides a broad overview of essential psychology topics ideal for introductory courses, its modular design also readily supports more specialized curricula, allowing instructors to use the self-contained instructional units in any combination and order. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Questions and Information Systems Feb 25 2020 The design and functioning of an information system improve to the extent that the system can handle the questions people ask. Surprisingly, however, researchers in the cognitive, computer, and information sciences have not thoroughly examined the multitude of relationships between information systems and questions -- both question asking and answering. The purpose of this book is to explicitly examine these relationships. Chapter contributors believe that questions play a central role in the analysis, design, and use of different kinds of natural or artificial information systems such as human cognition, social interaction, communication networks, and intelligent tutoring systems. Their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information.

10 Answers for Skeptics Sep 21 2019 In 10 Answers for Skeptics, McFarland identifies the 10 most common types of skepticism that plague doubters' minds and offers believers proven strategies for connecting intellectually and spiritually with those who are skeptical about the claims of Christianity. Today's skeptics are looking for authenticity, integrity and straightforward truth. Readers will learn how to answer intimidating questions, identify the root issue behind those questions and dismantle the "spiritual bombshells" dropped by atheists. Plus, they'll find encouragement to face hostility by persevering in love—the ultimate apologetic Christians can offer as witness to our loving God.
