**Jump at Home Grade 5** Apr 08 2021 John Mighton's JUMP program is changing the way math is taught, and his powerful math workbooks give children the tools they need to master this crucial subject. The key is a step-by-step teaching method that isolates and describes concepts so clearly that anyone can understand them: students build on their successes, becoming proficient at solving problems with confidence and enthusiasm. Now, parents and caregivers can bring the JUMP program home. These workbooks follow the current student worksheets used by JUMP tutors and classroom teachers, including: an introduction for parents and caregivers that clearly explains the thinking behind the program and provides hours of activities, worksheets carefully designed to enable children to move from one success to the next, a glossary of math terms, and a selected answer key.

**Mindset Mathematics** Aug 24 2022 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low floor, high ceiling tasks that will help you do just that, by looking at the big ideas at the fifth-grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message—that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement, with tasks that reflect the latest brain science on learning. Open, creative, and visual mathematics tasks have been shown to improve student test scores, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that: There is no such thing as a math person - anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.

**enVision Math** Feb 24 2020 Engage Every Learner with enVisionMATH As your child continues through his or her math education, he or she will be ready to take on more challenging coursework.

enVisionMATH: Grade 5 not only provides the appropriate difficulty level, it also ensures your child has built up to it. enVisionMATH is a math curriculum for homeschooling that uses visual aids and interactive activities to develop and solidify your child's subject knowledge. By the time you start using enVisionMATH: Grade 5, your child will have a strong foundation in mathematics that will help him or her master math education in the future. The enVisionMATH curriculum will be your guide from K-6 as you prepare lessons for your child's homeschool program. Grade 5 is the next step in that journey. With the help of the colorful and detailed images provided in the curriculum materials, you'll be able to educate your child to the best of their abilities. enVisionMATH: Grade 5 is a unique program because it addresses the needs of children multiple learning styles. The graphs and drawings help visual learners digest the information, while computer-based quizzes and on-paper activities help kinesthetic learners grasp and absorb math concepts. No matter what style your child prefers, he or she will complete Grade 5 being able to: Understand and properly execute the order of operations in math equations (i.e., multiplication takes place before addition, and so on). Perform addition, subtraction, multiplication and division using multi-digit numbers, with or without decimals. Grasp and use numeric expressions of equations, such as  $(3 \times 5) - 8$ . Use fractions in addition, subtraction, multiplication and division. Use graphs and charts to express numbers. Understand and find volume and area of a shape. Use prior knowledge to solve word problems. enVisionMATH: Grade 5 brings out your child's problem-solving skills, helping him or her to use abstract and quantitative reasoning. As you work through the curriculum, you should notice your child not only using math concepts, but explaining them accurately. enVisionMATH has been proven successful by independent scientific research, but you don't have to take our word for it. You can learn more about the specific items included in Grade 5 by visiting the Features and Benefits page.
