The Leopard's Call Jan 26 2022 The Leopards Call, An Anglo-Indian Love Story, is a gripping account of a young husband and wife team. Norma and Reginald Shires, a nurse and minister, just two years into their marriage, set out to live in the wilderness grasslands of West Bengal, India, down from Bhutan. There they began teaching and building up a high school for students from rare tribal groups. From the very first page of this eloquent brief on living a simple life and raising a family in a jungle area, you become engrossed in a hilarious yet moving true story of their unforgettable world. Anglo-Indians have often distinguished themselves in sports, entertainment, medicine, education, the railway and telegraphs and in the armed services. This story is an example of those who devote their lives to those in need.

British Piston Aero-engines and Their Aircraft Mar 16 2021 This book records 3,116 types of aircraft in which British aero-engines were flown, including examples of the many foreign-built aircraft. It is the first serious attempt to link these engines, their design and development with the aircraft which they powered. There are 873 types of engine reviewed in the book which were built and flown in Britain up to

1955. The working day of the big, powerful and noisy piston aero-engine may now seem to be almost over, but this book is also a reminder that the ancestry of the present huge jet engines goes back to the supercharger, the principal mechanical means by which the piston engine developed its great power.

The Tank Book Aug 21 2021 Pivotal to modern warfare, tanks have dominated the battlefield for over a century. Get up close to more than 400 military colossuses with this definitive visual guide to armoured vehicles. In 1916, the British built a vehicle that could pound the battlefield impervious to enemy fire, crushing obstacles and barbed wire in its path. The first tank, or "Mother" as it was known, had arrived. In *The Tank Book* you can view it in detail, along with other iconic models including the German Panzer, the legendary Tiger, the Vickers Medium Mark II, the Centurion, and the Hellcat - the fastest armoured fighting vehicle ever. This comprehensive volume takes you through the most exciting story in recent military history with the development of heavy artillery, anti-tank weaponry, and the men - such as Mikail Koshkin and Sir William Tritton - who designed these awe-inspiring beasts. Produced with The Tank Museum, *The Tank Book* traces the tank's development in response to two world wars, Korea, Vietnam, the Cold War and many other conflicts. It shows each model in detail, highlighting details such as their performance, specification, armour, weaponry, and much more. If you are interested in modern warfare, *The Tank Book* is truly unmissable reading.

Sacred and Mythological Animals Feb 24 2022 From the household cat to horses that can fly, a surprisingly wide range of animals feature in religions and mythologies all across the world. The same animal can take on different roles: the raven can be a symbol of evil, a harbinger of death, a wise messenger or a shape-changing trickster. In Norse mythology, Odin's magical ravens perch on his shoulders and bring him news. This compendium draws upon religious texts and myths to explore the ways sacred traditions use animal images, themes and associations in rituals, ceremonies, texts, myths, literature and folklore across the world. Sections are organized by the main animal classifications such as mammals, birds, reptiles, fish, amphibians and insects. Each chapter covers one significant grouping (such as dogs, cats or horses), first describing an animal scientifically and then detailing the mythological attributes. Numerous examples cite texts or myths. A final section covers animal hybrids, animal monsters and mythical animals as well as stars, constellations and Zodiac symbols. An appendix describes basic details of the religions and mythologies covered. A glossary defines uncommon religious terms and explains scientific animal names.
