Wig Out! Sep 18 2021 Enter the legendary House of Light, a hyper-glamorous, uber-competitive drag queen refuge where a daughter who was once a son can find a family. While the House are primping and preening for a catwalk showdown with the other houses, drag queen Nina is wooing the delectable Eric as Wilson, a de-camped, make-up free 'straight' gay man. How can Nina/Wilson strut the thorny divide between opposite genders and differing worlds? (from back cover).

Before Middle Passage: Translated Portuguese Manuscripts of Atlantic Slave Trading from West Africa to Iberian Territories, 1513-26 Jul 17 2021 On the 20th of January 1526, the Santiago left Lisbon bound for Africa with a cargo of iron and cloth; by early October the ship was back in Portugal with a very different cargo, 108 enslaved Africans. This volume consists of a translation into English of the receipt book from the customs office of the Cape Verde Islands. In it, Portuguese customs agents recorded import duties on over 3,000 slaves transported from nearby West Africa in 36 ships. The book also provides details of export taxes paid on c.600 African slaves by merchants from Portugal, Spain, and the Spanish Canary Islands, when they exchanged European merchandise for slaves. The final chapter of the volume translates the Santiago's log, providing an example of an actual slave trading expedition. Taken together these documents open a rare window into the workings and scope of the early Atlantic slave trade.

Making Sense of Data II Apr 13 2021 A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This second installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminant analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the TraceITM software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, Making Sense of Data II is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization.

Nadav Kander Mar 13 2021 Nude bodies painted white, faces turned away from the viewer: this is how Nadav Kander (*1961 in Israel) photographed the sitters in his latest series. Accessories are minimal, as is the aesthetic, yet at the same time the arrangement makes the mostly voluptuous bodies seem Baroque. One is reminded of the portraits of Elizabeth I with their white lead "masks." In Kander's precisely lit images, with their exquisite colors, white mice run across white skin, a small bird seems tiny perched next to an oidalisque. Red hair plays a role, flowing down over doll-like bodies as if it had a life of its own. Despite the abundance of flesh on display, the images do not have a superficial sense of the erotic. The lack of eye contact and the white makeup function as barriers, and the massiveness of the limbs recalls the works of Hans Bellmer or Lucian Freud. Exhibition: Philips de Pury & Company, London, UK (11.2012-).

Walker Evans May 27 2022 "As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work." - Jacket.

Stories in Stone Jun 03 2020 In a series of entertaining essays, geoscientist Jelle Zeilenga de Boer describes how early settlers discovered and exploited Connecticut's natural resources. Their successes as well as failures form the very basis of the state's history: Chatham's gold played a role in the acquisition of its Charter, and Middletown's lead helped the colony gain its freedom during the Revolution. Fertile soils in the Central Valley fueled the state's development into an agricultural power house, and iron ores discovered in the western highlands helped trigger its manufacturing eminence. The Statue of Liberty, a quintessential symbol of America, rests on Connecticut's Stony Creek granite. Geology not only shaped the state's physical landscape, but also provided an economic base and played a cultural role by inspiring folklore, paintings, and poems. Illuminated by 50 illustrations and 12 color plates, Stories in Stone describes the marvel of Connecticut's geologic diversity and also recounts the impact of past climates, earthquakes, and meteorites on the lives of the people who made Connecticut their home.

America Unchained Nov 28 2019 The plan was simple. Go to America. Buy a second-hand car. Drive coast-to-coast without giving any money to The Man™. What could possibly go wrong? Dismayed by the relentless onslaught of faceless American chains muscling in where local businesses had once thrived, Dave Gorman set off on the ultimate American road trip - in search of the true, independent heart of the U S of A. He would eat cherry pie from local diners, re-fuel at dusty gas stations and stock up on supplies from Mom and Pop's grocery store. At least that was the idea. But when did you last see an independent gas station? Gately, Dave beds down in a Colorado trailer park, sleeps in an Oregon forest treehouse, and even spends Thanksgiving with a Mexican family in Kansas. But when his road trip mutates into an odyssey of near-epic proportions and he finds himself being threatened at gun point in Mississippi, Dave starts to worry about what's going to break down next. The car... or him?

Oakland Noir Nov 20 2021 "Wonderfully, in Akashic's Oakland Noir, the stereotypes about the city suffer the fate of your average noir character—they die brutally." —San Francisco Chronicle In the wake of San Francisco Noir, Los Angeles Noir, and Orange County Noir—all popular volumes in the Akashic Noir Series—comes the latest California installment, Oakland Noir. Masterfully curated by Jerry Thompson and Eddie Muller (the "Czar of Noir"), this volume will shock, titillate, provoke, and entertain. The diverse cast of talented contributors will not disappoint. Oakland Noir offers stories by Nick Petruklakis, Kim Addonizio, Keenan Norris, Keri Miki-Lani Schroeder, Katie Gilmartin, Dorothy Lazard, Harry Louis Williams II, Carolyn Alexander, Phil Canalin, Judy Juanita, Jamie DeWolf, Nayomi Munaweera, Mahmud Rahman, Tom McElravey, Joe Loya, and Eddie Muller. "From the Oakland hills to the heart of downtown, each story brings Oakland to life." —San Jose Mercury News "Oakland is a natural for the series, with its shadowy crimes and disgruntled cops." —Zoom Street Magazine "San Francisco's grittier next-door neighbor gets her day in the sun in 16 new stories in this tightly curated entry in Akashic's Noir series. The hardcrabble streets of Oakland offer crime aplenty . . . Thompson and Muller have taken such pains to choose stories highlighting Oakland's diversity and history that the result is a volume rich in local culture as well as crime." —Kirkus Reviews

308 Circuits Mar 25 2022 This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

Latin American Dendroecology May 15 2021 Latin America is a megadiverse territory hosting several hotspots of plant diversity and many types of forest biomes, ecosystems and climate types, from tropical rainforest to semi-arid woodlands. This combination of diverse forests and climates generates multiple responses to ecological changes affecting the structure and functioning of forest ecosystems. Recently, there have been major efforts to improve our understanding of such impacts on ecosystems processes. However, there is a dearth of studies focused on Latin-American forest ecosystems that could provide novel insights into the patterns and mechanisms of ecological processes in response to environmental stress. The abundance of "New World" tree species with dendrochronological potential constitutes an ideal opportunity to improve the ecological state of knowledge regarding these diverse forest types, which are often threatened by several impacts such as logging or conversion to agricultural lands. Thus, detailed information on the dendroecology of these species will improve our understanding of forests in the face of global change. Accordingly, this book identifies numerous relevant ecological processes and scales, ranging from tree species to populations and communities, and from both dendrochronological and dendroecological perspectives. It offers a valuable reference guide for the exploration of long-term ecological interactions between trees and their environmental conditions, and will foster further research and international projects on the continent and elsewhere.
