Execution Without the Drama Aug 31 2022 The power of metrics is astounding Actually, its the RIGHT metrics that carry all the power. What can you measure NOW that will give you insight into the FUTURE of your business? Measuring the right things right now can help you to predict outcomes. Predicting outcomes allows you to solve problems today instead of being blindsided by them tomorrow. I was running an Inc500 company. Growing in excess of 100% a year, with my hair on fire, we measured various metrics including the usual financial Key Performance Indicators (KPIs). But wait These KPIs are about past and current performance. They allow you to celebrate with ice cream parties, but do not provide insight regarding future problems and outcomes. It wasn't until I discovered the RIGHT THINGS to measure that we began sharing bonuses along with the ice cream. This is my story, my journey of discovering the right things to measure and the dashboards that changed my future.

The Politics-Administration Dichotomy Sep 27 2019 The politics-administration dichotomy is much mentioned and often criticized in the Public Administration literature. The Politics-Administration Dichotomy: Toward a Constitutional Perspective, Second Edition offers a book-length treatment of this classical notion. While public administration academics typically reject it as an outdated and even dangerous idea, it re-emerges implicitly in their analyses. This book tells the story of how this has happened and suggests a way to get out of the quandary. It analyzes the dichotomy position in terms of content, purpose, and relevance. What's in the Second Edition Extensive study of the politics-administration dichotomy as a classic idea in Public Administration A much-overlooked constitutionalist line of argument in defense of this widely discredited notion Exploration and further development of the intellectual legacy of Dwight Waldo Coverage of the dichotomy's conceptual origins in 18th and 19th century Continental-European thought An assessment of main criticisms against and alternatives for the dichotomy presented in the literature Contributions to the newly emerging Constitutional School in the study of public administration An argument against the institutional separation of Political Science and Public Administration in academia Completely revised and updated, the book examines the idea that politics and public administration should be separated in our theories and practices of government. A combination of history of ideas and theoretical analysis, it reconstructs the dichotomy's conceptual origins and classical understandings and gives an assessment of the main criticisms raised against it and the chief alternatives suggested for it. Arguing that one-sided interpretations have led to the dichotomy's widespread but wrongful dismissal, the study shows how it can be recovered as a meaningful idea when understood as a constitutional principle. This study helps readers make sense of highly confused debates and challenge the issues with an original and provocative stance.

The Aging Mind Nov 29 2019 No-one approaches aging with enthusiasm. Activities we accomplish easily in our 20s and 30s become more difficult as we grow old but, though change is inevitable, recognising and understanding precisely what is happening to our bodies and minds allows us to continue to manage and enjoy our lives. Patrick Rabbitt is a cognitive gerontologist who has researched physical and mental aging for over 50 years and so can interpret his personal daily experiences of the aging process through a comprehensive understanding of what gerontological research has revealed about how our bodies and brains age, and how these changes affect our everyday experiences and lives. Engagingly written, Professor Rabbitt's book is a fascinating account of why our sensory and cognitive experiences change as we get older, and what these developments mean for our overall physical and emotional well-being. Describing the latest research the book covers the mental changes that affect our daily lives such as those in memory, intelligence, attention, sleep, vision and hearing, taste and smell, touch and balance, anxiety, depression and perception of the passage of time. It also discusses how far we can keep and develop the skills we have mastered over our lifetimes. The book debunks unhelpful myths about the aging process and offers guidance on how we can age better. This is an absorbing account of the aging process from one of the most eminent gerontologists working today. Its warmth and candour make it an engaging and helpful guide for those interested in understanding their own, or their relatives' ageing. Its rigour and comprehensiveness make ideal for students seeking an accessible alternative to standard textbooks on aging and for health professionals working with older people.

On Learning From the Patient May 28 2022 "On Learning from the Patient is concerned with the potential for psychoanalytic thinking to become self-perpetuating. Patrick Casement explores the dynamics of the helping relationship - learning to recognize how patients offer cues to the

therapeutic experience that they are unconsciously in search of. Using many telling clinical examples, he illustrates how, through trial identification, he has learned to monitor the implications of his own contributions to a session from the viewpoint of the patient. He shows how, with the aid of this internal supervision, many initial failures to respond appropriately can be remedied and even used to the benefit of the therapeutic work. By learning to better distinguish what helps the therapeutic process from what hinders it, ways are discovered to avoid the circularity of pre-conception by analysts who aim to understand the unconscious of others. From this lively examination of key clinical issues, the author comes to see psychoanalytic therapy as a process of re-discovering theory - and developing a technique that is more specifically related to the individual patient. The dynamics illustrated here, particularly the processes of interactive communication and containment, occur in any helping relationship and are applicable throughout the caring professions. Patrick Casement's unusually frank presentation of his own work, aided by his lucid and non-technical language, allows wide scope for readers to form their own ideas about the approach to technique he describes. This Classic Edition includes a new introduction to the work by Andrew Samuels and, together with its sequel *Further Learning from the Patient*, will be an invaluable training resource for trainee and practising analysts or therapists."--

Writing Scientific Research Articles Mar 26 2022 "Margaret Cargill's background as a linguist and research communications educator and Patrick O'Connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing. If the authors' goal is to give scientists the tools to write and publish compelling, well documented, clear narratives that convey their work honestly and in proper context, they have succeeded admirably." *Veterinary Pathology*, July 2009 "[The book is] clearly written, has a logical step-by-step structure, is easy to

read and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing." Aquaculture International, April 2009 Writing Scientific Research Articles: Strategy and Steps guides authors in how to write, as well as what to write, to improve their chances of having their articles accepted for publication in international, peer reviewed journals. The book is designed for scientists who use English as a first or an additional language; for research students and those who teach them paper writing skills; and for early-career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments, as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is designed for use by individuals or in a class setting. Visit the companion site at www.writersresearch.com.au for more information.

Ecological Ethics Mar 02 2020 In this thoroughly revised and updated second edition of the highly successful Ecological Ethics, Patrick Curry shows that a new and truly ecological ethic is both possible and urgently needed. With this distinctive proposition in mind, Curry introduces and

discusses all the major concepts needed to understand the full range of ecological ethics. He discusses light green or anthropocentric ethics with the examples of stewardship, lifeboat ethics, and social ecology; the mid-green or intermediate ethics of animal liberation/rights; and dark or deep green ecocentric ethics. Particular attention is given to the Land Ethic, the Gaia Hypothesis and Deep Ecology and its offshoots: Deep Green Theory, Left Biocentrism and the Earth Manifesto. Ecofeminism is also considered and attention is paid to the close relationship between ecocentrism and virtue ethics. Other chapters discuss green ethics as post-secular, moral pluralism and pragmatism, green citizenship, and human population in the light of ecological ethics. In this new edition, all these have been updated and joined by discussions of climate change, sustainable economies, education, and food from an ecocentric perspective. This comprehensive and wide-ranging textbook offers a radical but critical introduction to the subject which puts ecocentrism and the critique of anthropocentrism back at the top of the ethical, intellectual and political agenda. It will be of great interest to students and activists, and to a wider public.

The Most Dangerous Detective Jul 30 2022 The Most Dangerous Detective is a sensational expose of crime, sexual intrigue, corruption and Machiavellian politics by former Fleet Street investigative reporter Steve Bishop. With a foreword by former Queensland Premier Mike Ahern, this true story contains the key elements of a whodunnit and a thriller, with complex plots to disentangle, clues to analyse and false leads which lead to tension as the hunt closes in on the villain who time and again escapes his pursuers. The devious and cunning political plotting could stand alone as a tale of

intrigue as Premiers of different eras select crooked police officers as commissioners, supposedly independent inquiries produce the results desired by government and the leading anti-corruption campaigner has his parliamentary career killed off. Come on a journey through three states and the Northern Territory; three gruesome murders in the scorched, red heart of the outback; a miscarriage of justice in the prim and proper city of Adelaide; the creation of a luxury brothel empire in Sydney in the swinging sixties; and there's even a side trip to genteel Eastbourne, in England, to meet a serial lady-killer. But you'll be spending most of your time in sub-tropical Brisbane with its verandah wooden houses on quarter-acre blocks, palms and poincianas, hilltop views and shady valleys, its broad convoluted river and its laid back lifestyle. The result of a quarter of a century's research and interviews with political leaders, senior police and barristers, *The Most Dangerous Detective* also charts the awakening of Australians from the naive innocence of the late 50s through to the cynicism of the 80s. Did Glen Patrick Hallahan, who became famous as the ace detective who solved the Sundown Murders and won the George Medal for bravery send an innocent man to the gallows? Did he execute Jack 'Bingo' Cooper who kept his eyes down when talking but kept his ears open and may have learned too much? Did he murder his mistress, the brothel queen who had once lied at a Royal Commission in order to protect him and his colleagues? *The Most Dangerous Detective* provides the evidence to help answer these questions but this is also a multi-layered story in which two state premiers, three judges and a crime reporter who rose to be an editor are shown to have made decisions or reached conclusions which were at least perverse. The book calls for a posthumous pardon in one murder case and for another murder case to be re-opened. Holding the stage through this story of murders, organised crime, perjury, planted evidence, invented confessions, protection from on high, a major heroin importation, a bank robbery, political

corruption, protection rackets and other appalling behaviour is the man who struck fear into even a federal political leader, Glen Patrick Hallahan, the most dangerous detective. Meet memorable characters, such as: Shirley Brifman, who wore the cast-offs from 12 brothers and sisters growing up in country Queensland before becoming Sydney's richest madame; Col Bennett, a 43-year-old bespectacled barrister who's prepared to fight with his fists as well as with eloquence; John Milligan, a slightly effeminate former judge's associate with the IQ of a genius who gets his kicks by becoming a criminal; Gunther Bahnemann, double Iron Cross winner and crocodile wrestler, who becomes a successful author from a prison cell. Author Steve Bishop was a senior reporter and feature writer for Queensland's Sunday Sun from 1982 to 1989 and finished his career as principal media advisor to Premier Peter Beattie from 1998 to 2007. A journalist since 1965, he gained a master's degree in journalism in 1998 with research which included an 85,000-word thesis on why and how the media had failed to expose endemic corruption in Queensland in the 30 years between 1957 and 1987.
