What Great Service Leaders Know and Do Dec 07 2020 Entire service businesses have been built around the ideas of Heskett, Sasser, and Schlesinger, pioneers in the world of service. Now they test their ideas against the actual experiences of successful and unsuccessful practitioners, as well as against demands of the future, in a book service leaders around the world will use as a guide for years to come. The authors cover every aspect of optimal service leadership: the best hiring, training, and workplace organization practices; the creation of operating strategies around areas such as facility design, capacity planning, queue management, and more; the use—and misuse—of technology in delivering top-level service; and practices that can transform loyal customers into "owners." Looking ahead, the authors describe the world of great service leaders in which "both/and" thinking replaces trade-offs. It's a world in which new ideas will be tested against the sine qua non of the "service trifecta"—wins for employees, customers, and investors. And it's a world in which the best leaders admit that they don't have the answers and create organizations that learn, innovate, "sense and respond," operate with fluid boundaries, and seek and achieve repeated strategic success. Using examples of dozens of companies in a wide variety of industries, such as Apollo Hospitals, Châteaufort, Starbucks, Amazon, Disney, Progressive Insurance, the Dallas Mavericks, Whole Foods, IKEA, and many others, the authors present a narrative of remarkable successes, unnecessary failures, and future promise.

Summary of Denise Lee Yohn's What Great Brands Do Oct 05 2020 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The three steps to rebuilding a brand's culture are developing a strong internal corporate culture that aligns and integrates with your brand, rallying all your external stakeholders around those common cultural values, and using your culture to optimize the company's operations and engage everyone who touches the brand in delivering a focused, unique customer experience. #2 Palmisano had to lead IBM to meet the requirements of the company's new business model and set expectations for how his employees would work within it. He knew that the company's scope would continue to change, so he wanted to establish a globally consistent set of values. #3 The IBM values are a good example of how a company can imbue its values with importance. The values describe what makes the IBM brand distinctive and valuable. Every company would like to have a strong culture and values supported by inspiring decisions, but with great brands, culture and values become the brand itself. #4 A company's brand is the strongest engagement tool it has. Employees who are engaged with the brand connect to customers more effectively, to each other more fully, and to the brand's higher purpose.

Rescuing Socrates May 12 2021 A Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds. What is the value of a liberal education? Traditionally characterized by a rigorous engagement with the classics of Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In *Rescuing Socrates*, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities.

Montás emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University's renowned Core Curriculum, one of America's last remaining Great Books programs. The experience changed his life and determined his career—he went on to earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary reflection, *Rescuing Socrates* describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

The Whole Five Feet Nov 18 2021 This unique memoir of reading the classics to find strength and wisdom "makes an elegant case for literature as an everyday companion" (The New York Times Book Review). While undergoing a series of personal and family crises, Christopher Beha discovered that his grandmother had used the Harvard Classics—the renowned "five foot shelf" of great world literature compiled in the early twentieth century by Charles William Eliot—to educate herself during the Great Depression. He decided to follow her example and turn to this series of great books for answers—and recounts the experience here, in a smart, big-hearted, and inspirational mix of memoir and intellectual excursion that "deftly illustrates how books can save one's life" (Helen Schulman). "As he grapples with the death of his beloved aunt, a debilitating case of Lyme disease, and other major and minor calamities, Beha finds that writers as diverse as Wordsworth, Pascal, Kant, and Mill had been there before, and that the results of their struggles to find meaning in life could inform his own." —The Seattle Times "An important book [and] a sheer blast to read." —Heidi Julavits

Burn the Business Plan Jun 01 2020 "Carl Schramm, the man described by The Economist as 'the evangelist of Entrepreneurship', has written a myth-busting guide packed with tools and techniques to help you get your big idea off the ground. Carl believes that entrepreneurship has been completely misrepresented by the media, business books, University programmes and MBA courses. He believes that the perception of what it takes to start a business no longer matches the reality - which is bad news for everyone because it stops great ideas coming to life. *Burn the Business Plan* punctures the myth of the cool, tech-savvy 20-something entrepreneur with nothing to lose and venture capital to burn, showing that most people who start businesses are juggling careers and mortgages just like you. *Burn the Business Plan* is written to encourage you to get started. It demystifies the entrepreneurial process portrayed on television shows like *Dragon's Den*. It doesn't rely on largely irrelevant stories of overvalued tech startups, nor does it build on the largely mistaken narrative of a linear path from cold start to great success that is the essence of business planning, as taught in universities. This is the guide to starting and running a business that will actually work for the rest of us. *Burn the Business Plan* is for regular people who just want practical, real-world advice on how to start and run a successful business. It shows you how to avoid the common mistakes and what you need to do to put your enterprise on track for success."--
