The Emerging Middle East-East Asia Nexus Jul 24 2019 As the economies of East Asia grow ever stronger, their need for energy resources increases, which in turn compels closer relations with the countries of the Middle East. This book examines the developing relations between the countries of East Asia, especially China and Japan, with the countries of the Middle East. It looks at various key bilateral relationships, including with Iran and Syria, discusses the impact on the United States' hegemony in both regions, considers whether the new relations represent a contribution to, or a threat to, peace and stability, and assesses the implications of the changes for patterns of regional and global international relations systems. Connecting ICTs to Development Oct 26 2019 Over the past two decades, projects supported by the International Development Research Centre (IDRC) have critically examined the ways in which information and communications technologies (ICTs) can be used to improve learning, empower the disenfranchised, generate income opportunities for the poor, and facilitate access to healthcare in Africa, Asia, Latin America and the Caribbean. Considering that most development institutions and governments are currently attempting to integrate ICTs into their practices, it is an opportune time to reflect on the research findings that have emerged from IDRC's work and research in this area. "Connecting ICTs to Development" discusses programmatic investments made by IDRC in a wide variety of areas related to ICTs, including infrastructure, access, regulations, health, governance, education, livelihoods, social inclusion, technical innovation, intellectual property rights and evaluation. Each chapter in this book analyzes the ways in which research findings from IDRC-supported projects have contributed to an evolution of thinking, and discusses successes and challenges in using ICTs as tools to address development issues. The volume also presents key lessons learned from ICT4D programming and recommendations for future work.

11th International Symposium on Process Systems Engineering - PSE2012 Feb 29 2020 While the PSE community continues its focus on understanding, synthesizing, modeling, designing, simulating, analyzing, diagnosing, operating, controlling, managing, and optimizing a host of chemical and related industries using the systems approach, the boundaries of PSE research have expanded considerably over the years. While early PSE research was largely concerned with individual units and plants, the current research spans wide ranges of scales in size (molecules to processing units to plants to global multinational enterprises to global supply chain networks; biological cells to ecological webs) and time (instantaneous molecular interactions to months of plant operation to years of strategic planning). The changes and challenges brought about by increasing globalization and the the common global issues of energy, sustainability, and environment provide the motivation for the theme of PSE2012: Process Systems Engineering and Decision Support for the Flat World. Each theme includes an invited chapter based on the plenary presentation by an eminent academic or industrial researcher Reports on the state-of-the-art advances in the various fields of process systems engineering Addresses common global problems and the research being done to solve them

The EU and the Eurozone Crisis Mar 31 2020 The global financial crisis, which started in the United States in 2007, spread to Europe in 2009. It especially hit Portugal, Ireland, Italy, Greece, and Spain, countries which have introduced the single currency, the euro. These eurozone countries no longer have monetary policy autonomy, so they do not have the option of devaluation to increase competitiveness. The crisis has shown that the Economic and Monetary Union (EMU) created in 1993, and which led to the single currency in 1999, is faulty. Its built-in asymmetry, with centralised monetary policy and decentralised fiscal policy, should be expected to create problems. Part of the response to the crisis so far has been incremental moves towards fiscal and banking union, which will mean a deepening of European integration at a time when many observers believed that a certain equilibrium had been reached after the entry into force of the Lisbon Treaty in 2009. This book focuses on these developments as well as analysing other economic policies that affect the general economic welfare of the EU, including agriculture, trade and immigration policies. The book puts the eurozone crisis into the wider context of deepening and widening.

International Asia Conference on Industrial Engineering and Management Innovation (IEMI2012) Proceedings Jun 22 2019

The International Conference on Industrial Engineering and Engineering Management is sponsored by the Chinese Industrial Engineering Institution, CMES, which is the only national-level academic society for Industrial Engineering. The conference is held annually as the major event in this arena. Being the largest and the most authoritative international academic conference held in China, it provides an academic platform for experts and entrepreneurs in the areas of international industrial engineering and management to exchange their research findings. Many experts in various fields from China and around the world gather together at the conference to review, exchange, summarize and promote their achievements in the fields of industrial engineering and engineering management. For example, some experts pay special attention to the current state of the application of related techniques in China as well as their future prospects, such as green product design, quality control and management, supply chain and logistics management to address the need for, amongst other things low-carbon, energy-saving and emission-reduction. They also offer opinions on the outlook for the development of related techniques. The proceedings offers impressive methods and concrete applications for experts from colleges and universities, research institutions and enterprises who are engaged in theoretical research into industrial engineering and engineering management and its applications. As all the papers are of great value from both an academic and a practical point of view, they also provide research data for international scholars who are investigating Chinese

style enterprises and engineering management.

China-Africa Relations in an Era of Great Transformations Nov 27 2019 This collection juxtaposes a variety of approaches about China and Africa, and their interrelations seeking to go beyond early, simplistic formulations. Perspectives informed by Polanyi advance nuanced analysis of varieties of capitalisms and double-movements. It seeks to put contemporary China-Africa relations in critical, comparative context and in doing so, it will go beyond descriptions of inter-regional trade and investment, large- and small-scale sectors, to ask whether structural change is underway. Already it is apparent that the growing presence of China in Africa presents the latter with some novel options but whether these will generate a new embeddedness remains problematic. Highlighting the 'varieties of capitalisms' in the new century, given the undeniable difficulties of extreme neo-liberalism in the US and UK by contrast, to the apparent ebullience of the emerging economies in the global South, this book examines such implications for international relations, international political economy, development studies and policies.

Theme-based Chinese Vocabulary for CIE IGCSE 0547 (3038 words) 0000000000000000 Aug 24 2019 Theme-based learning is a way of teaching and learning, whereby many areas of the curriculum are connected together and integrated within a theme. For Chinese International exams, like IGCSE, IB, are evolving into Theme-based curriculum. Students develop the ability to communicate in the target language through the study of language, themes and texts. By referring IGCSE 0547 Syllabus and HSK (Chinese Proficiency Test) Version 2021 New Standards for International Chinese Language Education, we added more vocabulary and give the HSK classification, both Version 2009 and the latest Version 2021. Within each topic, the vocabulary are arranged by HSK V2021 levels. This will give teachers a guidance for difficulty level and allow students to set priority on the vocabulary they should know to read, write or both. It will also help a lot for student to do revision. Some students call them as "LIFESAVING" book before their examinations.

Engineering Ethics May 02 2020 Engineering Ethics: Challenges and Opportunities aims to set a new agenda for the engineering profession by developing a key challenge: can the great technical innovation of engineering be matched by a corresponding innovation in the acceptance and expression of ethical responsibility? Central features of this stimulating text include: · An analysis of engineering as a technical and ethical practice providing great opportunities for promoting the wellbeing and agency of individuals and communities. · Elucidation of the ethical opportunities of engineering in three key areas: Engineering for Peace, emphasising practical amelioration of the root causes of conflict rather than military solutions. Engineering for Health, focusing on close collaboration with healthcare professionals for both the promotion and restoration of health. Engineering for Development, providing effective solutions for the reduction of extreme poverty. · Innovative strategies for implementing these ethical opportunities are described: Emphasis on the personal responsibility of every engineer and on the benefits of supporting social structures. Use of language and concepts that are appealing to business managers and political decision makers. · Future prospects for increasing the acceptance and expression of ethical responsibility by engineers are envisaged. · Engineering Ethics: Challenges and

Opportunities provides engineers, decision makers and the wider public with new understanding of the potential of engineering for the promotion of human flourishing.

The International Criminal Court and Global Social Control Jan 28 2020 The International Criminal Court was established in 2002 to prosecute war crimes, crimes against humanity, and genocide. At its genesis the ICC was expected to help prevent atrocities from arising or escalating by ending the impunity of leaders and administering punishment for the commission of international crimes. More than a decade later, the ICC's ability to achieve these broad aims has been questioned, as the ICC has reached only two guilty verdicts. In addition, some of the world's major powers, including the United States, Russia and China, are not members of the ICC. These issues underscore a gap between the ideals of prevention and deterrence and the reality of the ICC's functioning. This book explores the gaps, schisms, and contradictions that are increasingly defining the International Criminal Court, moving beyond existing legal, international relations, and political accounts of the ICC to analyse the Court from a criminological standpoint. By exploring the way different actors engage with the ICC and viewing the Court through the framework of late modernity, the book considers how gaps between rhetoric and reality arise in the work of the ICC. Contrary to much existing research, the book examines how such gaps and tensions can be productive as they enable the Court to navigate a complex, international environment driven by geopolitics. The International Criminal Court and Global Social Control will be of interest to academics, researchers, and advanced practitioners in international law, international relations, criminology, and political science. It will also be of use in upper-level undergraduate and postgraduate courses related to international criminal justice and globalization.
