[Developing Applications with IBM FileNet P8 APIs](#) Jun 14 2021 This IBM® Redbooks® publication can
help you develop content and process management applications with IBM FileNet® APIs. The IBM FileNet
P8 suite of products contains a set of robust APIs that range from core platform APIs to supporting
application APIs. This book focuses specifically on Content Engine and Process Engine APIs. Content
Engine API topics that we discuss include creating, retrieving, updating, and deleting objects; querying and
viewing documents; and batching and batch execution. We also explore more complex topics, including
permissions and authorization, versioning, relationships, annotations, workflow subscriptions and event
actions, metadata discovery, and dynamic security inheritance. Process Engine API topics that we discuss

include launching a workflow, searching for and processing work items, and working with process status. The more complex topics we cover include, Component Integrator application space, role, workbasket, resource navigation in Process Engine REST API, ECM Widgets, and building a custom Get Next In-basket widget. To help you better understand programming with IBM FileNet APIs, we provide a sample application implemented for a fictional company. We include the data model, security model, workflows, and various applications developed for the sample. You can download them for your reference. This book is intended for IBM FileNet P8 application developers. We recommend using this book in conjunction with the online ECM help.

A Source Book for Mediæval History Apr 12 2021 "A Source Book for Mediæval History" by Oliver J. Thatcher, Edgar Holmes McNeal. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten – or yet undiscovered gems – of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Globality Feb 29 2020 Globality primarily involves large western corporations expanding their operations and moving aggressively into new overseas markets. GLOBALITY radically defines a 'post-globalization' world, where companies from India, China, Russia, eastern Europe, Brazil and Mexico are expanding beyond their home base, entering and building new markets, creating whole industries, and competing for customers, resources, market share and attention. In short, the tide has turned. As a result, western companies need to understand these emerging new businesses and the economies they come from in order to stay ahead and stay alive.

A Little History of the World Feb 20 2022 E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Sanctuaries in Roman Dacia Oct 07 2020 This book focuses on lived ancient religious communication in Roman Dacia. Testing for the first time the ' Lived Ancient Religion ' approach in terms of a peripheral province from the Danubian area, this work looks at the role of ' sacralised ' spaces, known commonly as sanctuaries in the religious communication of the province.
