**Serial Killers in Contemporary Television** Apr 18 2021 "This volume examines the significant increase in representations of serial killers as central characters in popular television over the last two decades. Via critical analyses of the philosophical and existential themes presented to viewers and their place in the cultural landscape of contemporary America, the authors ask: What is it about serial killers that incited such a boom in these types of narratives in popular television post-9/11? Looking past the serial format of television programming as uniquely suited for the presentation of the serial killer's actions, the chapters delve into deeper reasons as to why TV has proven to be such a fertile ground for serial killer narratives in contemporary popular culture. An international team of authors question: What is it about serial killers that makes these characters deeply enlightening representations of the human condition that, although horrifically deviant, reflect complex elements of the human psyche? Why are serial killers intellectually fascinating to audiences? How do these characters so deeply affect us? Shedding new light on a contemporary phenomenon, this book will be a fascinating read for all those at the intersection of television studies, film studies, psychology, popular culture, media studies, philosophy, genre studies and horror studies"--

**Female Serial Killers** Oct 05 2022 In this fascinating book, Peter Vronsky exposes and investigates the phenomenon of women who kill—and the political, economic, social and sexual implications buried with each victim. How many of us are even remotely prepared to imagine our mothers, daughters, sisters or grandmothers as fiendish killers? For centuries we have been conditioned to think of serial murderers and psychopathic predators as men—with women registering low on our paranoia radar. Perhaps that's why so many trusting

husbands, lovers, family friends, and children have fallen prey to “the female monster.” From history’s earliest recorded cases of homicidal females to Irma Grese, the Nazi Beast of Belsen, from Britain’s notorious child-slayer Myra Hindley to ‘Honeymoon Killer’ Martha Beck to the sensational cult of Aileen Wuornos—the first female serial killer-as-celebrity—to cult killers, homicidal missionaries, and our pop-culture fascination with the sexy femme fatale, Vronsky not only challenges our ordinary standards of good and evil but also defies our basic accepted perceptions of gender role and identity. *Talking with Female Serial Killers - A chilling study of the most evil women in the world* Jun 08 2020 Christopher Berry-Dee, criminologist and bestselling author of books about the serial killers Aileen Wuornos and Joanne Dennehy, turns his uncompromising gaze upon women who not only kill, but kill repeatedly. Because female murderers, and especially serial murderers, are so rare compared with their male counterparts, this new study will surprise as well as shock, particularly in the cases of women like Beverley Allitt, who kill children, and Janie Lou Gibbs, who killed her three sons and a grandson, as well as her husband. Here too are women who kill under the influence of their male partners, such as Myra Hindley and Rosemary West, and whose lack of remorse for their actions is nothing short of chilling. But the author also turns his forensic gaze on female killers who were themselves victims, like Aileen Wuornos, whose killing spree, for which she was executed, can be traced directly to her treatment at the hands of men. Christopher Berry-Dee has no equal as the author of hard-hitting studies of the killers who often walk among us undetected for many years, and who in so many cases seem to be acting entirely against their natures.

Serial Killers and the Media Nov 13 2020 This book examines the media and cultural responses to the awful crimes of Brady and Hindley, whose murders provided a template for future media reporting on serial killers. It explores a wide variety of topics relating to the Moors Murders case including: the historical and geographical context of the murders, the reporting of the case and the unique features which have become standard for other murder cases e.g. nicknames for the serial killers, and it discusses the nature of evil and psychopaths and how they are represented in film, drama, novels and art. It also questions the ethics of the “serial killing industry” and how the modern cultural fixation on celebrity has extended to serial killers, and it explores the impact on the journalists and police officers from being involved in such cases including some interviews with them. The treatment of Brady and Hindley by the media also raises profound questions about the nature of punishment including the links between mental illness and crime and whether there is ever the prospect of redemption. This book draws on cultural studies, criminology, sociology and socio-legal studies to offers a multi-dimensional analysis of the impact of this case and then uses this as a basis for the analysis of more recent cases such as the crimes of Peter Sutcliffe and Harold Shipman.

We know the names: Ted Bundy, Ed Gein, Jeffrey Dahmer, John Wayne Gacy, among them—serial killers transformed by the media into ghoulish celebrities. And their iconic fictional counterparts—from Norman Bates to Hannibal Lecter to Dexter—reveal just how eager we are to watch a psychopath in action. But why? Are we curious about the root of their terrifying compulsions? Or is it something more? *Why We Love Serial Killers* “attempts to solve some of these mysteries . . . What made serial killers this way? Why did they kill, and why did they do it so gruesomely? How are they different from us? (Please let them be different from us)” (The Atlantic). In exploring our appetite for the macabre, criminology professor Dr. Scott Bonn also provides a unique view into the world of serial killers, having corresponded with two of the most notorious examples: David Berkowitz, a.k.a. Son of Sam, and the BTK Killer, Dennis Rader. In addition, Bonn examines the criminal profiling techniques used to identify serial predators, the charisma of the sociopath, the rise in “murderabilia” collecting, and how and why these killers often become pop-culture icons, escalating both our fears and our fascination. The result is “powerful and a must-read . . . Insightful, compelling, and an excellent source of myth-busting information for laymen and professionals alike” (Burl Barer, Edgar Award–winning author of *The Saint*).

**My Life Among the Serial Killers** Aug 30 2019 Over the course of twenty-five years, Dr. Helen Morrison has profiled more than eighty serial killers around the world. What she learned about them will shatter every assumption you've ever had about the most notorious criminals known to man. Judging by appearances, Dr. Helen Morrison has an ordinary life in the suburbs of a major city. She has a physician husband, two children, and a thriving psychiatric clinic. But her life is much more than that. She is one of the country's leading experts on serial killers, and has spent as many as four hundred hours alone in a room with depraved murderers, digging deep into killers' psyches in ways no profiler before ever has. In *My Life Among the Serial Killers*, Dr. Morrison relates how she profiled the Mad Biter, Richard Otto Macek, who chewed on his victims' body parts, stalked Dr. Morrison, then believed she was his wife. She did the last interview with Ed Gein, who was the inspiration for Alfred Hitchcock's *Psycho*. John Wayne Gacy, the clown-obsessed killer of young men, sent her crazed Christmas cards and gave her his paintings as presents. Then there was Atlanta child killer Wayne Williams; rapist turned murderer Bobby Joe Long; England's Fred and Rosemary West, who killed girls and women in their "House of Horrors"; and Brazil's deadliest killer of children, Marcelo Costa de Andrade. Dr. Morrison has received hundreds of letters from killers, read their diaries and journals, evaluated crime scenes, testified at their trials, and studied photos of the gruesome carnage. She has interviewed the families of the victims -- and the spouses and parents of the killers -- to gain a deeper understanding of the killer's environment and the public persona he adopts. She has also studied serial killers throughout history and shows how this is not a recent phenomenon with psychological autopsies of the fifteenth-century French war hero Gilles de Rais, the sixteenth-century Hungarian Countess Bathory, H. H. Holmes of the late nineteenth century, and Albert Fish of the Roaring Twenties. Through it all, Dr. Morrison has been on a mission to discover the reasons why serial killers are compelled to murder, how they choose their victims, and what we can do to prevent their crimes in the future. Her provocative conclusions will stun you.

Bringing depth and shadow to our collective portrait of what a serial killer must be, Mark Seltzer draws upon popular sources, scholarly analyses, and the language of psychoanalysis to explore the genesis of this uniquely modern phenomenon. Revealed is a fascination with machines and technological reproduction, with the singular and the mass, with definitions of self, other, and intimacy. What emerges is a disturbing picture of how contemporary culture is haunted by technology and the instability of identity.
