Drafting Limited Liability Company Operating Agreements Jan 25 2022 Aspen Publishers' new Third Edition of Drafting Limited Liability Company Operating Agreements provides crystal-clear analysis and hands-on guidance from John M. Cunningham, one of the acknowledged leaders in the field. You'll find virtually everything you need to negotiate, draft, and fine-tune LLC operating agreements for all basic types of LLCs--member-managed, manager-managed, single-member, and multi-member--in any U.S. jurisdiction! Drafting Limited Liability Company Operating Agreements, Third Edition identifies the 10 main stages of the LLC formation process and gives you detailed, practice-oriented comments on each. In addition, you'll find valuable "red flags" spotlighting common pitfalls and risks; the text of key federal tax materials, including the "Check-the-Box Regulations" and the IRS's guidelines on the application of the Self-Employment Tax to LLC members; and the current text of the Delaware Limited Liability Company Act . Drafting Limited Liability Company Operating Agreements, Third Edition ensures that you're prepared to handle all legal and tax aspects

of the LLC formation process including fiduciary issues and other critical business organization law issues facing the managers of multi-member LLCs; multi-member LLC partnership tax issues; the unique legal and tax issues confronting owners of single-member LLCs; hidden issues in drafting articles of organization; and the complex issues of legal ethics when representing two or more clients in forming multi-member LLCs. To assist in your analysis, you'll find a comprehensive survey of the rapidly expanding body of federal and state LLC case law--complete with clear summaries of the cases and indexes by both state and subject matter. Newly updated and expanded, *Drafting Limited Liability Company Operating Agreements, Third Edition* now offers a timely overview of the more than 1,100 significant LLC cases reported to date, and spotlights those specific cases with which every LLC practitioner should have detailed familiarity. *Drafting Limited Liability Company Operating Agreements, Third Edition* contains comprehensive, authoritative forms for all basic agreements and contract clauses likely to arise in LLC formations. These forms are designed for use in all 50 states and are accompanied by line-by-line instructions telling you exactly how and when to use them.

Committed Worship: Adult conversion and initiation Jan 01 2020 Volume II develops a sacramental theology that addresses the needs of all adult Christians. The chapters on Marriage show how conversion both humanizes and Christianizes human sexuality, providing the context for a foundational rethinking of the meaning of the context for a foundational rethinking of the meaning of Christian Marriage. The discussion of Orders examines the responsibilities of ordained leaders and throws light on the rise of clericalism and on the meaning of priestly identity and ministry, in addition to clarifying the relationship between the priesthood of the laity and that of the ordained. A discussion of Christian nurture explains the practical and theoretical meaning of infant Baptism. This volume also examines the three sacraments that most foster ongoing conversion: Reconciliation, Anointing and Eucharist. After situating each of these rituals in its Biblical and historical setting, the author shows how each contributes to ongoing Christian conversion.

Math Curriculum for Gifted Students Mar 27 2022 The Math Curriculum for Gifted Students series: Provides gifted and advanced learners with challenging activities to extend their mathematical thinking. Includes lessons, activities, and extensions that are aligned to national standards. Is designed to provide high-ability learners advancement beyond the general curriculum. Is ideal for gifted classrooms or gifted pull-out groups. Was developed by the Center for Gifted Education at William & Mary. In Math Curriculum for Gifted Students (Grade 4), the 24 lessons cover mathematics content for grade 4 and are divided into five sections: number and operations in Base Ten, operations and algebraic thinking, number and operations-fractions, measurement and data, and geometry. Each lesson includes a teacher page that outlines the estimated time, key terms, materials, and objectives; a challenging activity to allow students to explore the concepts in depth; practice problems; and an assessment similar to standards-based grade-level standardized assessments.

The Sacred Cosmos Sep 08 2020 "In this careful and closely argued book, Terence Nichols presents a vigorous challenge to naturalistic thinking. We are offered the persuasive vision of a world of many-leveled richness, whose Creator is continually active within its unfolding history." --John Polkinghorne, University of Cambridge "This is a uniquely valuable work for our time. The Sacred Cosmos takes on the ambitious task of a synthesis of the contributions of contemporary science, basic Thomistic philosophy of being and the human person, and basic themes of Christian theology on God, creation, and the relations between God and the world. The author, a theologian, brings to his task an amazing background and range of competence both in contemporary science and . . . Christian theology. . . . The most valuable part of the book is the author's powerful and cogent critique of the widely influential 'scientific naturalism' of our day, which claims the only reliable way of knowing is that of modern science, and all that exists can be explained by the evolving interaction of material elements, leaving no place for anything of the spiritual order, like the human soul, moral values, or God." --W. Norris Clarke, S.J., Fordham University "In this sensible and solid reply to scientific atheism (or 'naturalism'), Nichols charts the way for a new harmony between science and spirituality. I recommend it to anyone interested in the interaction of religion and science." --Alan Padgett, author of Science and the Study of God: A Mutuality Model for Theology and Science

Banning Transgender Conversion Practices Aug 20 2021 Survivors of conversion practices – interventions meant to stop gender transition – have likened the process to torture. Florence Ashley rethinks and pushes forward the banning of these practices by surveying these bans in different jurisdictions, and addressing key

issues around their legal regulation. Ashley also investigates the advantages and disadvantages of legislative approaches to regulating conversion therapies, and provides guidance for how prohibitions can be improved. Finally, Ashley offers a carefully annotated model law that provides detailed guidance for legislatures and policymakers. Most importantly, this book centres the experiences of trans people themselves in its analysis and recommendations.

A History of Christian Conversion Jun 05 2020 Conversion has played a central role in the history of Christianity. In this first in-depth and wide-ranging narrative history, David Kling examines the dynamic of turning to the Christian faith by individuals, families, and people groups. Global in reach, the narrative progresses from early Christian beginnings in the Roman world to Christianity's expansion into Europe, the Americas, China, India, and Africa. Conversion is often associated with a particular strand of modern Christianity (evangelical) and a particular type of experience (sudden, overwhelming). However, when examined over two millennia, it emerges as a phenomenon far more complex than any one-dimensional profile would suggest. No single, unitary paradigm defines conversion and no easily explicable process accounts for why people convert to Christianity. Rather, a multiplicity of factors-historical, personal, social, geographical, theological, psychological, and cultural-shape the converting process. A History of Christian Conversion not only narrates the conversions of select individuals and peoples, it also engages current theories and models to explain conversion, and examines recurring themes in the conversion process: divine presence, gender and the body, agency and motivation, testimony and memory, group- and self-identity, "authentic" and "nominal" conversion, and modes of communication. Accessible to scholars, students, and those with a general interest in conversion, Kling's book is the most satisfying and comprehensive account of conversion in Christian history to date; this major work will become a standard must-read in conversion studies.

FastLane Jun 25 2019 The unique history and development of FastLane, the central nervous system of the National Science Foundation. Since 2000, the National Science Foundation has depended upon its pioneering FastLane e-government system to manage grant applications, peer reviews, and reporting. In this behind-the-scenes account Thomas J. Misa and Jeffrey R. Yost examine how powerful forces of science and computing came together to create this influential grant-management system, assessing its impact on cutting-edge scientific research. Why did the NSF create FastLane, and how did it anticipate the development of web-based e-commerce? What technical challenges did the glitch-prone early system present? Did the switch to electronic grant proposals disadvantage universities with fewer resources? And how did the scientific community help shape FastLane? Foregrounding the experience of computer users, the book draws on hundreds of interviews with scientific researchers, sponsored project administrators, NSF staff, and software designers, developers, and managers.
