*Mental Capacity Act 2005 code of practice* Mar 02 2020 The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved.

A Scrap of Paper Nov 29 2019 A century after the outbreak of the Great War, we have forgotten the central role that international law and the dramatically different interpretations of it played in the conflict's origins and conduct. In *A Scrap of Paper*, Isabel V. Hull compares wartime decision making in Germany, Great Britain, and France, weighing the impact of legal considerations in each. Throughout, she emphasizes the profound tension between international law and military necessity in time of war, and demonstrates how differences in state structures and legal traditions shaped the way in which each of the three belligerents fought the war. Hull focuses on seven cases in which each government's response was shaped by its understanding of and respect for the law: Belgian neutrality, the land war in the west, the occupation of enemy territory, the blockade, unrestricted submarine warfare, the introduction of new weaponry (including poison gas and the zeppelin), and reprisals. Drawing on voluminous research in German, British, and French archives, the author reconstructs the debates over military decision making and clarifies the role played by law—where it constrained action, where it was manipulated to serve military need, where it was simply ignored, and how it developed in the crucible of combat. She concludes that Germany did not speak the same legal language as the two liberal democracies, with disastrous and far-reaching consequences. The first book on international law and the Great War published since 1920, *A Scrap of Paper* is a passionate defense of the role that the law must play to govern interstate relations in both peace and war.

**Machine Habitus** Dec 11 2020 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. *Machine Habitus* will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

**Scholarly Writing for Law Students** Aug 31 2022 This book fills an important niche in legal-writing literature by teaching law students how to write scholarly papers for seminars, law reviews, and law-review competitions and how to have their work recognized. It covers both traditional doctrinal topics and newer areas like empirical studies. There are also chapters on footnotes, avoiding plagiarism, law review practice, and dissemination of student work through publication and submission to national writing competitions. Appendices provide a sample law-review competition paper, answers to in-text exercises, sample syllabi for scholarly writing courses, and a rubric for evaluating and editing scholarly papers and articles.

**Power and the Law. A Question of Justice or Political Elites' Interests?** Dec 31 2019 Research Paper (postgraduate) from the year 2018 in the subject Politics - International Politics - Topic: Public International Law and Human Rights, grade: 10, , course: Social Sciences / Power and Society, language: English, abstract: This paper contributes to the understanding of the relationship between law and power. Premised on the Hobbesian conceptualization of law as the command of the sovereign, this paper traces the resilience of this conceptualization through to the modern democratic states. It looks at the change of the sovereign from an individual to an office and now the diffusion of power through different systems of checks and balances instituted by the modern political system of democracy. In doing this, the paper answers the question; to what extent is law the reflection of the wishes of political elites in a society? It

explores the sources of law and the role of law as an organizing agent with a view of exposing the resilience of the political elite's interests in law and in the use of law. The paper finally concludes that despite the changing nature of political systems, political elites have been able to preserve the law as a tool at their service. They have used their law making power to express their wishes in the law as well as used the complex procedural nature of law with several actors involved to serve their interest.

**Administrative redress** May 04 2020 In this report the Law Commission sets out conclusions from its review of administrative redress in public and private law following consultation (Law Commission consultation paper 187, 2008, ISBN 9780118404532). The aim of the Commission's review was to consider when and how individuals should be able to obtain redress against public bodies that have acted in a substandard way. The report discusses individuals' access to remedies through the courts, as well as through avenues outside the court system, such as the public sector ombudsmen. In examining court-based remedies, the Commission concludes that there are good arguments for reform but, given the level of opposition to its earlier proposals and the absence of available data on the costs of compensation paid by public bodies, work will not be taken forward on reviewing this area of the law. The report does, however, recommend that government should establish a process for collecting and publishing information on the cost of public compensation. The Commission is taking forward its review of the public sector ombudsmen, following a favourable response to its proposals. The scope of the review will be extended and include suggestions for improving citizens' access to the public sector ombudsmen, and increasing the powers of ombudsmen to refer points of law to the courts. The Commission will consult on its proposals for reform of public sector ombudsmen later in 2010 and expects to make final recommendations to government the following year.

Mackenzie Prize for Best Political Science Book of the Year 2010 The relentless rise of Communism was the most momentous political development of the first half of the twentieth century. No political change has been more fundamental than its demise in Europe and its decline elsewhere. In this hugely acclaimed book Archie Brown provides an indispensable history that examines the origins of the ideology, its development in different countries, its collapse in many states following the Soviet perestroika, and its current incarnations around the globe. The Rise and Fall of Communism explains how and why Communists came to power; how they were able, in a variety of countries on different continents to hold on to power for so long; and what brought about the downfall of so many Communist systems. **Review of Contract Law** Mar 14 2021 This report, further to a Discussion Paper on Formation of Contract published in March 2012 (ISBN 9780108882630) undertaken as part of the Eighth Programme of Law Reform, looks at the specific difficulties of "execution in counterpart". The phrase describes the process by which parties to a formal document intended to have effect (e.g. as a contract) may be able to apply their respective signatures to it (execution) to make it binding without having to meet to do so or, indeed, having all to sign the same physical copy of the document. The main recommendations are: a document may be validly executed under Scots law by parties subscribing a counterpart of the document remotely from each other and then each delivering their subscribed counterpart to the other parties; delivery may be to a person nominated for the purpose rather than to the other parties; delivery of a traditional document may be effected by electronic means; a document takes effect either when each and every party has subscribed and delivered its counterpart, or at such later date as parties may agree; where all parties sign their counterpart in self-proving form, the document as a whole is self-proving; if desired, a "registration copy" of a document may be compiled by making up a single version which includes the signing pages from each of the

counterparts; the reforms will not affect any document executed before they come into statutory force

The Constitutional Balance Mar 26 2022 In *The Constitutional Balance* Sir John Laws has left a vivid and timely commentary on one of the most pressing issues in the legal world today. The debate continues whether or not judges venture too far into issues of Government policy, and whether or not there are any limits on the power of the executive and the legislature to propose and enact legislation that unduly restricts fundamental freedoms in a democratic society subject to the rule of law. Sir John Laws examines the relationship between constitutional fundamentals and values. He finds basic ideals of reason, fairness and the presumption of liberty in the common law, and recognises that a democratically accountable executive and legislature must be able to make policy and enact and implement legislation to pursue social goals. The courts then interpret the laws. As Sir John puts it – “The meeting of Parliament and the common law, in the crucible of statutory interpretation, is close to the core of [the constitutional balance]”. These fundamental values can compete with each other, giving rise to tensions within and between key state institutions, in particular the executive and the judiciary. A 'constitutional balance' between them must be found if the constitution is to function properly, each institution is to understand the proper extent and limits of its authority, and the rule of law is to be maintained. Sir John draws on his life-long experience as a barrister, judge and academic, and on case-law and learning, to explain in vibrant and engaging terms how such a 'constitutional balance' might be achieved.

The Defective in Jewish Law and Literature Aug 07 2020 Excerpt from *The Defective in Jewish Law and Literature: A Paper Read Before the New York Board of Jewish Ministers* There are two typical attitudes toward the phenomena of existence. One may simply take these phenomena for granted, unquestioningly, uncomplainingly. Whatever their cause and origin, they are here and must be dealt with somehow. They must be adjusted to men and men must be adjusted to them, according to the demands and limitations of the individual and of society. Or again, one may refuse to take them for granted. One may go behind these phenomena and inquire into their cause. To him who adopts the latter attitude, practical means of adjustment are not satisfactory, his concern being to find those higher, ideal adjustments whereby life as a whole, with its light and shadow, may be shown to conform to the laws of mind and morals, of reasonableness and righteousness. The difference between these two attitudes is particularly apparent in the case of such phenomena as introduce jarring discord into human life. *International Business Law: Cases and Materials* Sep 19 2021 *INTERNATIONAL BUSINESS LAW: CASES AND MATERIALS* is a timely and useful book. Uncounted millions of “international” transactions occur daily, as goods and services are purchased across the national boundaries of some 200 political units. Capital flows from nation to nation, and so—to a lesser extent—do jobs, as companies seek more favorable locations for their business operations. The “rules” (laws) governing these exchanges quickly become complex, as persons (and governments) from different countries are involved. If problems arise in a cross-border relationship, whose rules apply? What forums are available to resolve disputes? Are there tax implications to the transaction? If so, where? These and similar questions need to be factored into the decision to “go overseas.” Each of the six chapters in this book begins with a brief overview of the subject-matter, followed by short previews of the chosen case examples. The primary content of the chapters consists of some 120 court and arbitration decisions in real disputes, between real parties. The actual text of the decisions in these cases has been edited; some excerpts are quite brief, others are more substantial. Most “background” facts have been summarized by the author, but the edited-decision part of each case is quoted from the actual recorded text of the court or arbitrator who decided it. Clearly, a minute sample from tens of thousands of cases cannot provide comprehensive coverage of what all the world’s legal rules are. Our objectives here are simply to indicate some of the major potential “flash points” of doing international business, to illustrate some of the significant differences in the applicable legal rules, and to provide an exposure to the language and process by which international business disputes are resolved. “Fore-warned is fore-armed.” Being aware of these potential trouble spots, a sensible business manager will presumably consider them in making the decision to engage in cross-border transactions, and take appropriate steps to avoid or minimize potential adverse consequences. Chapter I of this book introduces International Law—its course of development and its two major sources (custom and treaties). Chapter II examines the use of national and international courts and arbitrators to resolve cross-border disputes. Chapter III provides basic coverage of the United Nations Convention on Contracts for the International Sale of Goods: when it applies, how the sale contract is formed, when risk of loss on the goods passes from Seller to Buyer, and what responsibilities the Seller has for the quality of the goods sold. Chapter IV looks at some of the legal questions that might arise in conducting cross-border commercial operations—employment issues, intellectual property issues, and investment issues. Chapter V considers potential questions regarding taxation of international activities, and the regulation of adverse environmental effects. Chapter VI reviews the efforts by national governments to apply their competition regulations to international business transactions, and the difficulties that private parties might have in attempting to enforce legal claims against governments and their agencies. While these are surely not the only legal issues that might arise in connection with international business, they do constitute a significant set of concerns of which managers need to be aware as they venture into the international “stream of commerce.”
