Sweet-potato Storage May 27 2022 "The proper storage of sweet potatoes is one of the most important food-conservation measures that can be put into effect in the southern states. No perishable product produced in the South is as of great importance as the sweet potato, and none is so poorly handled. This bulletin describes in considerable detail the types of storage houses that have proved successful and the proper method of handling sweet potatoes from harvesting to marketing. For those growers who are not able to build storage houses, directions are given for saving the sweet-potato crop by using outdoor cellars and banks." -- p. 2.

Data for Agrarian Development Nov 01 2022 This book provides a comprehensive guide to collecting and managing farm-level agricultural data in developing countries. Many development workers face the need to collect data for planning, monitoring or evaluation of a project, or to use data collected by other people. The book explains how to plan, design and manage a survey, and introduces basic analysis and report writing. Unlike other books in this field, the authors deal with the statistical aspects of practical sample designs, and give worked examples to help the reader. The techniques and practical advice will help readers who are collecting data to improve the quality of their surveys and will help people who have to use data assess how reliable those data are.

Cost and policy determinants of features of tractor markets in Nigeria: Case studies of tractor sellers in Kaduna state and tractor owners in Benue state Oct 20 2021 In this study, we contribute to such efforts to enhance the use of tractors in Africa by describing the key characteristics of markets for tractors in Nigeria. Nigeria is among a set of countries in Africa that has both low agricultural productivity and low agricultural mechanization growth (Malabo Montpellier Panel 2018). Current understanding of the tractor market in Nigeria mainly highlights only specific aspects of mechanization issues or only delves into the application of specific emergent mechanization technologies. Consequently, many stakeholders do not have sufficient understanding of how tractor markets in Nigeria are organized both in vertical and in geographic terms.

Kansas Labor Laws and Laws Especially Affecting the Employment of Labor (annotated) Nov 08 2020

Lords of the Lebanese Marches Nov 20 2021 Michael Gilson looks at the relations between different forms of power, violence, and hierarchy in Akkar, the northernmost province of Lebanon, during the 1970s. Often regarded as backward and feudal, in reality this area was controlled primarily by groups with important roles in government and business in Beirut. The most "feudal" landowners had often done most to introduce capitalist methods to their estates, and "backwardness" was a condition produced by this form of political and social control. Gilson uses material from his stay in Akkar and a variety of historical sources to analyze the practices that guaranteed the rule of the large landowners. He traces shifts in power, and he examines the importance of narratives and rhetoric in constituting social honor, collective biography, and shared memory/forgetting. His lively account shows how changes in hierarchy were expressed in ironic commentary regarding idealized masculinity and violence, how subversive laughter and humor counterpointed the heroic ethic of challenge and revenge, and how peasant narratives both countered and reproduced the values of hierarchy.

Innovation In Forestry Apr 25 2022 Innovation is increasingly recognized as a key factor in environmental protection and balanced sustainable development within the forestry sector. This volume provides a comprehensive theoretical foundation for the analysis of innovation processes and policies in a traditional, rural sector as well as presenting empirical analyses of innovation processes from major innovation areas. Territorial services of the forest sector are examined, including

various types of forest ecosystem services such as carbon sequestration or recreation and wood value chains, including timber frame construction and. Classified Index of National Labor Relations Board Decisions and Related Court Decisions Jun 23 2019
