[Hear & Beyond](#) Nov 04 2022 Hearing loss doesn't come with an operating manual—until now. If you have hearing loss, you already know that the conventional approach to treatment is focused on hearing-aid technology. Without a handbook to help you figure out how to actually live with it, you've likely been getting by on information pieced together from various sources—and yet, communication often seems incomplete and unsatisfying. What's missing from this hearing care model is the big picture—a real-life illustration of how hearing loss, its emotions, and its barriers affect every corner of your life. Now, hearing-health advocates, consultants, and speakers Shari Eberts and Gael Hannan offer a new skills-based approach to hearing loss that is centered not on hearing better, but on communicating better. With honesty and humor, they share their own hearing loss journeys, and outline invaluable insights, strategies, and workarounds to help you engage with the world and be heard. You'll gain tips for navigating all areas impacted by hearing loss, including relationships, work, technology; strategies for adopting a new, empowering mindset towards your hearing loss; and communication behaviors that can make almost any listening situation manageable. Informed by the lived experiences of thousands of people living with hearing loss, and corroborated by hearing science, technological advances, and modern hearing-care principles, Hear & Beyond offers a new way forward to greater connection and engagement—whether you're new to hearing loss or have been living with it for a long time. Hearing loss is just one aspect of who you are, among many others. You may have hearing loss, but it doesn't have to have you.

The Adolescent Owner's Manual Feb 12 2021 How do you fix your troubled adolescent? After years of working as an in-home therapist and probation officer, author William Glover grew frustrated with the conventional wisdom that said medication and/or therapy offered the only hope for angry, defiant, unmotivated, ADHD, ADD, oppositional, defiant, drug involved, juvenile court involved, and behaviorally handicapped kids. Based on his work with adolescents and their parents, he became convinced that the solution for the majority of troubled kids resided not with the professionals, but with the parents of these children. With this as a starting point, Glover began developing "The Adolescent Owner's Manual," a unique and effective resource designed to provide parents with the practical, common-sense tools and skills essential to parenting troubled adolescents.

Planning and Structuring User Assistance Mar 16 2021 Even the best information is worthless if users can't find it. Providing user-friendly structure and navigation is just as important as providing well-written content. However, structuring user assistance isn't as simple and obvious as it may seem. If you think that your document structure should follow the structure of your product's components and functions: You're wrong. If you think that the type of document that you prefer is the same type of document that your clients prefer: You're wrong. If you think that all the information that you have is important: You're also wrong. This book tells you how to structure, index, and link your documents so that readers actually find the information that your documents contain. Topics covered: General structuring principles that all structural decisions have in common. Choosing media: Should you provide a printed or printable user manual (PDF), online help, or both? What information should go into the user manual, and what information should go into online help? Which help format should you use? Can context-sensitive help calls be implemented? Should you provide interactive features and social features? Planning documents: Should you put all information into one document, or should you supply several user manuals for specific purposes and user groups?

How should you name your documents? Planning document sections: What are the major sections that your documents should consist of? Are there any standard sections that you shouldn't forget? Planning topics: What types of information do your clients need? How should you build and name the individual topics within the document? Planning the order of sections and topics: How should you organize the sections and topics within your documents? What comes first? What comes later? Planning navigation: Which navigational devices should you provide in printed documents and in online help systems? Where should you provide links or cross-references and where not? Audience: Technical writers Developers Marketing professionals Product managers
