George III Nov 28 2019 This book is a political study of the reign of George III which draws upon unpublished sources and takes account of recent research to present a rounded appreciation of one of the most important and controversial themes in British history. It examines the historical reputation of George III, his role as a European figure and his religious convictions, and offers a discussion of the domestic and imperial policies with which he was associated.

Thinking from the Underside of History Jul 25 2019 Enrique Dussel's writings span the theology of liberation, critiques of discourse ethics, evaluations of Marx, Levinas, Habermas, and others, but most importantly, the development of a philosophy written from the underside of Eurocentric modernist teleologies, an ethics of the impoverished, and the articulation of a unique Latin American theoretical perspective. This anthology of original articles by U.S. philosophers elucidating Dussel's thought, offers critical analyses from a variety of perspectives, including feminist ones. Also included is an essay by Dussel that responds to these essays.

History and Society Jan 23 2022 R. H. Tawney believed that the subject of economic history raises questions which touch the fundamental concerns of all thinking people. By setting economic development firmly within the framework of cultural and political life, he provided an alternative to the recent fragmentation of economic history into a number of increasingly technical specialisms. First published as a collection in 1978, these ten essays, spanning the length of Professor Tawney's career remain as controversial and potent as ever, and the original introduction by J. M. Winter provides the first full evaluation and significance of R. H. Tawney's approach to economic history. Among the essays included in this volume are the indispensable studies of 'The Rise of the Gentry' and 'Harrington's Interpretation of His Age', as well as 'The Abolition of Economic Controls, 1918-1921', here published in full for the first time. Other selections, such as Tawney's celebrated inaugural lecture as Professor of Economic History at the London School of Economics in 1933, 'the Study of Economic History', offer a representative sample of the range and sweep of Tawney's historical imagination. Taken together, these essays demonstrate the validity of Tawney's conviction that economic historians must confront not only the creation of wealth, but also the moral questions surrounding its distribution.

The Oxford World History of Empire Nov 08 2020 This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume Two: The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases.

A Companion to World History Aug 25 2019 A Companion to World History presents over 30 essays from an international group of historians that both identify continuing areas of contention, disagreement, and divergence in world and global history, and point to directions for further debate. Features a diverse cast of contributors that include established world historians and emerging scholars Explores a wide range of topics and themes, including and the practice of world history, key ideas of world historians, the teaching of world history and how it has drawn upon and challenged "traditional" teaching approaches, and global approaches to writing world history Places an emphasis on non-Anglophone approaches to the topic Considers issues of both scholarship and pedagogy on a transnational, interregional, and world/global scale

The Essential Guide to Writing History Essays Sep 30 2022 The Essential Guide to Writing History Essays is a step-by-step guide to the typical assignments of any undergraduate or master's-level history program in North America. Effective writing is a process of discovery, achieved through the continual act of making choices--what to include or exclude, how to order elements, and which style to choose--each according to the author's goals and the intended audience. The book integrates reading and specialized vocabulary with writing and revision and addresses the evolving nature of digital media while teaching the terms and logic of traditional sources and the reasons for citation as well as the styles. This approach to writing not only helps students produce an effective final product and build from writing simple, short essays to completing a full research thesis, it also teaches students why and how an essay is effective, empowering them to approach new writing challenges with the freedom to find their own voice.

A History of the World in 6 Glasses Jun 27 2022 The New York Times Bestseller "There aren't many books this entertaining that also provide a cogent crash course in ancient, classical and modern history." -Los Angeles Times Beer, wine, spirits, coffee, tea, and Coca-Cola: In Tom Standage's deft, innovative account of world history, these six beverages turn out to be much more than just ways to quench thirst. They also represent six eras that span the course of civilization--from the adoption of agriculture, to the birth of cities, to the advent of globalization. A History of the World in 6 Glasses tells the story of humanity from the Stone Age to the twenty-first century through each epoch's signature refreshment. As Standage persuasively argues, each drink is in fact a kind of technology, advancing culture and catalyzing the intricate interplay of different societies. After reading this enlightening book, you may never look at your favorite drink in quite the same way again.

World History and the Eonic Effect Sep 06 2020 At a time when theories of evolution are undergoing renewed controversy, the study of the Eonic

Effect can break the deadlock, by looking at world history in the light of 'evolution'. The assumption that evolution occurs at random is the crux of the dispute, and one confused with issues of religion and secularism. We can detect a non-random pattern in the record of civilization itself, to see 'evolution in action' on a stupendous scale. We live in the first generations with enough data to detect this phenomenon. In the confusion of evolutionary theories, the unexpected discovery of deep level structure can allow us to deconstruct 'fl at history', and assess claims of directionality in evolution. In the process the theory of natural selection applied to human evolution is seen to fail a photo finish test. The book provides a new model for the study of the overlap of history and evolution, and a critique of current views of the descent of man.

Encounters Old and New in World History May 15 2021 This collection of essays asserts the specific value of world history research and teaching, showing how the field contributes to the larger historical profession and offering concrete suggestions to develop more interaction between the academy and the public. The twelve contributors, each with their own academic areas of interest, are experienced scholars and classroom teachers. Uniting them together in this volume is their professional relationship with Jerry H. Bentley (1949–2012). This shared connection served as a catalyst to showcase Bentley's enduring legacy: a commitment to investigating large-scale questions with detailed empirical evidence that explains the human condition—documenting both patterns of similarity and difference in ways that account for regional and temporal variations. The volume continues Bentley's meticulous attention to world historical methods: focus on scale, cross-cultural encounter, comparison, periodization, critical geography, and interdisciplinarity. *Encounters Old and New in World History* responds to provocations that Jerry Bentley tendered in his scholarship and through his professional activities. Contributors interrogate the institutional settings, disciplinary proclivities, methodological choices, and diverse source bases of world history research and teaching. Several essays address the ways in which present-day concerns influence research on local and global scales. Other essays pay particular attention to the production and circulation of knowledge across regional, temporal, and class boundaries, as well as between the academy and the wider public. Claiming the centrality of globally informed and focused approaches to historical inquiry, researchers continue the conversations that Bentley carried on through his own scholarship, teaching, editing of the *Journal of World History*, participating in public forums, and contributing to public discussions about the place of history in understanding today's global integration. The stakes involved in asking questions about the shared history of humankind continue to increase in the current era of intensified globalization. It is incumbent upon scholars with the skills to work across linguistic, geographic, temporal, and disciplinary boundaries to show the ways that cross-cultural encounters happened historically, and to point out how such interactions play out in the institutions, classrooms, and public debates where historical interpretations are created and shared.

Globalization in World History Sep 18 2021 Globalization will become a major theme of historical research during the next decade - this book will help to set a new agenda.

The End of History Sep 26 2019 History ended, according to Hegel according to Kojève, with the establishment and proliferation in Europe of states organized along Napoleonic lines: rational, bureaucratic, homogenous, atheist. This state lives in some tension with the popular slogan that helped give it birth: Liberty, Equality, Fraternity. But there is now also totalitarianism - the only new kind of regime, according to Arendt, created since the national state. Man is now in charge of nature, technology, and society; much of political life has become a gavotte elaborating the meaning of the Napoleonic model. This interpretation, however opposed it seems to common sense, has been influential, particularly in France where the course of existentialism is unintelligible without taking it into account. Professor Cooper argues that it is inherently plausible and examines the arguments of Hegel and Kojève to reveal its consistency and explanatory power. And he applies it to more contemporary events - the experience of the atomic bomb, the Gulag system of extermination, and the growth of multinational corporations. The work concludes by pulling together the presuppositions and theories of the totalitarian system, the Hegelian version of the Napoleonic state, and our contemporary technological society. Overall, the reader will find here a complete and challenging presentation of how the modern world understands its collective life.

Islam and World History Jun 15 2021 Published in 1974, Marshall Hodgson's *The Venture of Islam* was a watershed moment in the study of Islam. By locating the history of Islamic societies in a global perspective, Hodgson challenged the orientalist paradigms that had stunted the development of Islamic studies and provided an alternative approach to world history. Edited by Edmund Burke III and Robert Mankin, *Islam and World History* explores the complexity of Hodgson's thought, the daring of his ideas, and the global context of his world historical insights into, among other themes, Islam and world history, gender in Islam, and the problem of Muslim universality. In our post-9/11 world, Hodgson's historical vision and moral engagement have never been more relevant. A towering achievement, *Islam and World History* will prove to be the definitive statement on Hodgson's relevance in the twenty-first century and will introduce his influential work to a new generation of readers.

End of History and the Last Man Nov 01 2022 Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

The History of Books as a Field of Study Aug 30 2022

The Edited Collection Jul 29 2022 Edited collections are widely supposed to contain lesser work than scholarly journals; to be incoherent as volumes, no more than the sum of their parts; and to be less visible to potential readers once published. It is also often taken as axiomatic that those who make decisions in relation to hiring, promotion, tenure, and funding do so agree. To publish in or edit an essay collection is thought to risk being penalised for the format before even a word is read. After examining the origins of this critique, this *Element* explores the modern history of the edited collection and the particular roles it has played. It examines each component part of the critique, showing that they are either largely unfounded or susceptible of solution. It proposes the edited collection as a model of one possible idea of scholarly community: collaboration, trust, and mutual obligation in pursuit of a wider good.

Personalities, War and Diplomacy Mar 01 2020 Combines essays on the "personality dimension" in the 19th and 20th century international history, placing in a proper historical perspective the impact of individual diplomats, politicians and military strategists on foreign policy-making.

Religion and the Rise of History Aug 18 2021 As a historical inquiry and synthesis, this intellectual history is the first study to apply the ideal-type or model-building methodology of Otto Hintze (1861-1940) to Western historical thought or to what R. G. Collingwood called *The Idea of History*, for it contains succinct and useful models for seeing and teaching classical, Christian, and modern professional historiography. *Religion and the Rise of History* is also the first work to suggest that, in addition to his well-known paradoxical, simul, and/or at-the-same-time way of thinking and viewing life, Martin Luther also held to a way that was deeply incarnational, dynamic, and/or in-with-and-under. This dual vision and a Lutheran ethos strongly influenced Leibniz, Hamann, and Herder, and was therefore a matter of considerable significance for the rise of a distinctly modern form of historical consciousness (commonly called historicism) in Protestant Germany. Smith's essay suggests a new time period for the formative age of modern German thought, culture, and education: *The Cultural Revolution in Germany*. This age began in the early 1760s and culminated in 1810 with the founding of the University of Berlin, the first fully modern and modernizing university. This university first became the recognized center for the study of history, however, through the work of Leopold von Ranke (1795-1886). Here the story shows how a young Ranke derived his individualizing way of thinking and viewing life mainly from Luther, how his life-work is the best example in Western literature of the rise of history from a calling to a profession, and how the three-way discussion between Troeltsch, Meinecke, and Hintze concerning the nature of modern historical thought was of central importance for the reorientation of Western social-historical thought in the twentieth century.

The Making of History Apr 25 2022 A Marxist scholar and historian, Irfan Habib has been a towering presence in the Indian intellectual scene for over four decades. Professor Habib's undiminished commitment to the cause of socialism is reflected in these highly original and bold analyses of Marxist

historiography and theories of socialist construction.

**Connected History Mar 25 2022** A collection of essays that span many regions and cultures, by an award-winning historian Sanjay Subrahmanyam is becoming well known for the same sort of reasons that attach to Fernand Braudel and Carlo Ginzburg, as the proponent of a new kind of history - in his case, not *longue durée* or micro-history, but 'connected history': connected cross-culturally, and spanning regions, subjects and archives that are conventionally treated alone. Not a research paradigm, he insists, it is more of an *oppositiowissenschaft*, a way of trying to constantly break the moulds of historical objects. The essays collected here, some quite polemical - as in the lead text on the notion of India-as-civilization, or another, assessing such a literary totem as V. S. Naipaul - illustrate the breadth of Subrahmanyam's concerns, as well as the quality of his writing. **Connected History** considers what, exactly, is an empire, the rise of 'the West' (less of a place than an idea or ideology, he insists), Churchill and the Great Man theory of history, the reception of world literature and the itinerary of subaltern studies, in addition to personal recollections of life and work in Delhi, Paris and Lisbon, and concluding remarks on the practice of early-modern history and the framing of historical enquiry.

**Modern Typography Jan 29 2020** *Modern Typography, 2nd Edition* is a completely updated and revised edition of Robin Kinross's classic survey of European and North American typography since 1700, first published in 1992. In addition to numerous new illustrations and revised text, *Modern Typography* has been re-scaled to a new, convenient pocket format. Kinross's overview breaks ground by focusing on the history of typography as an intricate web of social, technical, and material processes, rather than a parade of typeface styles. *Eye* magazine calls *Modern Typography* the book that tells "how modern typography got to be the way it is." Together, Kinross's clear, concise writing combined with his extensive knowledge of the history of typography create a gold standard for how design history ought to be written.

**Empire: A Very Short Introduction Jun 23 2019** A great deal of the world's history is the history of empires. Indeed it could be said that all history is colonial history, if one takes a broad enough definition and goes far enough back. And although the great historic imperial systems, the land-based Russian one as well as the seaborne empires of western European powers, have collapsed during the past half century, their legacies shape almost every aspect of life on a global scale. Meanwhile there is fierce argument, and much speculation, about what has replaced the old territorial empires in world politics. Do the United States and its allies, transnational companies, financial and media institutions, or more broadly the forces of 'globalization', constitute a new imperial system? Stephen Howe interprets the meaning of the idea of 'empire' through the ages, disentangling the multiple uses and abuses of the labels 'empire', 'colonialism', etc., and examines the aftermath of imperialism on the contemporary world. **ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.**

**The Natural History Essays Apr 13 2021** Celebrate the tradition of literary naturalists and writers who embrace the natural world as the setting for some of our most euphoric and serious experiences. These books map the intimate connections between the human and the natural world. Literary naturalists transcend political boundaries, social concerns, and historical milieus; they speak for what Henry Beston called the "other nations" of the planet. Their message acquires more weight and urgency as wild places become increasingly scarce. HENRY DAVID THOREAU was an American author, poet, abolitionist, naturalist, tax resister, development critic, surveyor, historian, philosopher and leading transcendentalist. His writings on natural history and philosophy have become two sources of modern-day environmentalism.

**The Sense of the Past Mar 13 2021** Before his death in 2003, Bernard Williams planned to publish a collection of historical essays, focusing primarily on the ancient world. This posthumous volume brings together a much wider selection, written over some forty years. His legacy lives on in this

masterful work, the first collection ever published of Williams's essays on the history of philosophy. The subjects range from the sixth century B.C. to the twentieth A.D., from Homer to Wittgenstein by way of Socrates, Plato, Aristotle, Descartes, Hume, Sidgwick, Collingwood, and Nietzsche. Often one would be hard put to say which part is history, which philosophy. Both are involved throughout, because this is the history of philosophy written philosophically. Historical exposition goes hand in hand with philosophical scrutiny. Insights into the past counteract blind acceptance of present assumptions. In his touching and illuminating introduction, Myles Burnyeat writes of these essays: "They show a depth of commitment to the history of philosophy seldom to be found nowadays in a thinker so prominent on the contemporary philosophical scene." The result celebrates the interest and importance to philosophy today of its near and distant past. *The Sense of the Past* is one of three collections of essays by Bernard Williams published by Princeton University Press since his death. In *The Beginning Was the Deed: Realism and Moralism in Political Argument*, selected, edited, and with an introduction by Geoffrey Hawthorn, and *Philosophy as a Humanistic Discipline*, selected, edited, and with an introduction by A. W. Moore, make up the trio.
