bernoulli differential equation wikipedia Mar 10 2021 web in mathematics an ordinary differential equation is called a bernoulli differential equation if it is of the form $y' + p(x)y = q(x)y^n$ where n is a real number some authors allow any real whereas others require that $n \neq 0$ or 1 the equation was first discussed in a work of 1695 by jacob bernoulli after whom it is named the earliest solution however was offered by
