**Making Sense of the Unfeasible** May 18 2021 Before he received his diagnosis of Asperger Syndrome (AS) in the 1970s, Marc Fleisher was considered mentally retarded; yet he went on against the odds to gain two maths degrees and to undertake post-graduate studies in maths. In this engaging story Marc relates how, supported by his family and by services for people with autism, and despite family tragedy and personal difficulties, he learnt to get the most out of life. He shares, with humour and candour, a multitude of practical tips for people with AS, and those around them, rounding off his story with appendices on astronomy, parallel universes, and the mathematics of unfeasibly large numbers.

Clausewitz's Puzzle Apr 04 2020 Blending detailed contextual analysis with issues in modern-day international relations this book provides a major new analysis of the theory of Clausewitz and its relevance to contemporary society. This book argues that Clausewitz developed a wide-ranging political theory of war by reflecting on the success, the limitations, and the failure of Napoleon's method of waging war, a theory, which is still relevant in light of contemporary conflict. This new interpretation is the result of reflecting on Clausewitz's theory in light of the new developments and lays down the foundation of a general theory of war by concentrating on Clausewitz's historical analyses of war campaigns. For the first time analysis of three paradigmatic military campaigns is placed at the centre of understanding surrounding Clausewitz's 'On War': The author argues that the limitations of Napoleon's strategy, as revealed in Russia and in his final defeat, enabled Clausewitz to develop a general theory of war. This book is a project of the Oxford Leverhulme Programme on the Changing Character of War.

Rethinking Schubert Jul 28 2019 What this volume provides, then, is not only a fresh portrait of one of the most loved composers of the nineteenth century but also a conspectus of current Schubertian research. Whether perusing unknown repertoire or refreshing canonical works, *Rethinking Schubert* reveals the extraordinary methodological variety that is now available to research, painting a contemporary portrait of Schubert that is vibrant, plural, trans-national and complex. - Lorraine Byrne Bodley is Senior Lecturer and Director of Research at the Department of Music, Maynooth University. Julian Horton is Professor of Music and Head of Department at Durham University.

**The Biographical Dictionary of Women in Science: L-Z** Mar 16 2021 Volume 2 of 2.

**The Crimes of Women in Early Modern Germany** Mar 04 2020 A study of the crimes of women in early modern Germany, this text draws on court records to examine the lives of shrewd cutpurses, quarrelling artisan wives, and soldiers' concubines.

The Power of Music Jan 26 2022 There is accruing evidence which indicates that actively making music can contribute to the enhancement of a range of non-musical skills and lead to other beneficial outcomes. Research continues to explore the circumstances under which these benefits may occur. A recent review of the evidence from neuroscience suggests that early engagement may be important (before the age of seven), the length of musical engagement and commitment to it, the type of training, and the instrument learned. The quality of teaching is also crucial as to whether any

benefits are realised. When teaching is poor there may be no benefits and negative outcomes. The common characteristics of musical programmes which are beneficial are emerging. They need to be highly interactive and enjoyable with opportunities for: developing new skills and performing; acquiring cultural capital; developing interpersonal bonds and solidarity in pursuing shared goals; on-going intensity and frequency of contact; developing mutual respect; and recognition and rewards for excellence. Receiving positive affirmation from others relating to musical activities, particularly performance is crucial in enhancing self-beliefs whatever the age of the participants. If performances are in high status cultural venues the impact is enhanced. The research undertaken to date suggests that: active engagement with making music should start early for the greatest benefits to be realised; engagement needs to be sustained over a long period of time to maximise the benefits; the activities need to include group work; opportunities need to be available for performance; the quality of teaching needs to be high; the curriculum needs to be broadly based including activities related to pitch and rhythm, singing, instrumental work, composition and improvisation, and the reading of notation; to have a positive impact on disaffected and at-risk young people, the musical activities need to be in a genre with which they can relate.

*The Remnants of the Rechtsstaat* Dec 25 2021 This book offers an intellectual history of Ernst Fraenkel's classic *The Dual State* (1941), recently republished by OUP, and one of the most erudite books on the theory of dictatorship ever written. It was the first comprehensive analysis of the nature and rise of Nazism, and the only such analysis written from within Hitler's Germany.

Memoir of Fleeming Jenkin Dec 01 2019

**Infinity and Truth** Aug 09 2020 This volume is based on the talks given at the Workshop on Infinity and Truth held at the Institute for Mathematical Sciences, National University of Singapore, from 25 to 29 July 2011. The chapters cover topics in mathematical and philosophical logic that examine various aspects of the foundations of mathematics. The theme of the volume focuses on two basic foundational questions: (i) What is the nature of mathematical truth and how does one resolve questions that are formally unsolvable within the Zermelo–Fraenkel Set Theory with the Axiom of Choice, and (ii) Do the discoveries in mathematics provide evidence favoring one philosophical view over others? These issues are discussed from the vantage point of recent progress in foundational studies. The final chapter features questions proposed by the participants of the Workshop that will drive foundational research. The wide range of topics covered here will be of interest to students, researchers and mathematicians concerned with issues in the foundations of mathematics. Contents:Invited Lectures:Absoluteness, Truth, and Quotients (Ilijas Farah)A Multiverse Perspective on the Axiom of Constructibility (Joel David

Hamkins)Hilbert, Bourbaki and the Scorning of Logic (A R D Mathias)Toward Objectivity in Mathematics (Stephen G Simpson)Sort Logic and Foundations of Mathematics (Jouko Väänänen)Reasoning about Constructive Concepts (Nik Weaver)Perfect Infinites and Finite Approximation (Boris Zilber)Special Session:An Objective Justification for Actual Infinity? (Stephen G Simpson)Oracle Questions (Theodore A Slaman and W Hugh Woodin) Readership: Mathematicians, philosophers, scientists, graduate students, academic institutions, and research organizations interested in logic and the philosophy of mathematics. Keywords:Mathematical Logic;Foundations of Mathematics;Philosophy of Mathematics;Mathematical Truth;Infinity;Set Theory;Proof Theory;MultiverseKey Features:All the contributors are world-renownedThe final chapter is written by Theodore A Slaman and W Hugh Woodin, who are two of the leading logicians in the world. They are also the volume editors

**Ladies in the Laboratory II** Feb 24 2022 A survey of nineteenth-century women whose journal publications are listed in the 19 volume London Royal Society's Catalogue of scientific papers, 1800-1900, comprising an author index to scientific papers contained in the transactions of societies, journals, and other periodical works, being the major index of scientific journal literature for the period.

The Poetics of Sovereignty Apr 28 2022 Emperor Taizong (r. 626–49) of the Tang is remembered as an exemplary ruler. This study addresses that aura of virtuous sovereignty and Taizong's construction of a reputation for moral rulership through his own literary writings—with particular attention to his poetry. The author highlights the relationship between historiography and the literary and rhetorical strategies of sovereignty, contending that, for Taizong, and for the concept of sovereignty in general, politics is inextricable from cultural production. The work focuses on Taizong's literary writings that speak directly to the relationship between cultural form and sovereign power, as well as on the question of how the Tang negotiated dynastic identity through literary stylistics. The author maintains that Taizong's writings may have been self-serving at times, representing strategic attempts to control his self-image in the eyes of his court and empire, but that they also become the ideal image to which his self was normatively bound. This is the paradox at the heart of imperial authorship: Taizong was simultaneously the author of his representation and was authored by his representation; he was both subject and object of his writings.

**Handbook of Contemporary Biography** Sep 09 2020

*The End and the Beginning* Sep 29 2019 First published in Germany in 1929, *The End and the Beginning* is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Muhlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a

precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Mühlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

*The Universal Dictionary of Biography and Mythology* Jan 14 2021 Once considered the largest and most extensive source of biographies in the English language, *The Universal Dictionary of Biography and Mythology* contains information on nearly every historical figure, notable name, and important subject of mythology from throughout the world prior to the 20th century. Spanning all fields of human effort - from literature and the arts to philosophy and science - and touching on topics from multiple areas of mythological study, including Norse, Greek, and Roman, this extraordinary reference guide continues to be one of the most thorough and accurate collections of biographical data ever created. Combining mythological and biographical entries into a single, comprehensive list, and incorporating a unique system of indicating pronunciation and orthography, *The Universal Dictionary of Biography and Mythology* offers readers an unparalleled record of historically significant identities, from the obscure and forgotten newsmakers of yesteryear to the highly celebrated shapers of history that remain influential today. Volume III (IAC-PRO) of this exquisite four-volume set includes information on such names as Egyptian goddess Isis, American statesman Thomas Jefferson, German astronomer Johann Kepler, Spartan king Leonidas, Abraham Lincoln, Medusa, Mohammed, Roman emperor Nero, Orion, Plutarch, Ponce de Leon, and many more. JOSEPH THOMAS (1811-1891) also wrote *A Comprehensive Medical Dictionary*, various pronouncing vocabularies of biographical and geographical names, and a system of pronunciation for Lippincott's *Pronouncing Gazetteer of the World*.

**The Red Countess** Apr 16 2021 Praise for the first edition of this book: This translation is something of an event. For the first time, it makes Zur Mühlen's text available to English-speaking readers in a reliable version. —David Midgley, University of Cambridge [This book] represents exceptional value, both as an enjoyable read and as an introduction to an attractive author who amply deserves rediscovery. —Ritchie Robertson, *Journal of European Studies*, 42(1): 106-07. Born into a distinguished aristocratic family of the old Habsburg Empire, Hermynia Zur Mühlen spent much of her childhood and early youth travelling in Europe and North Africa with her diplomat father. Never comfortable with the traditional roles women

were expected to play, she broke as a young adult both with her family and, after five years on his estate in the old Czarist Russia, with her German Junker husband, and set out as an independent, free-thinking individual, earning a precarious living as a writer. Zur Mühlen translated over 70 books from English, French and Russian into German, notably the novels of Upton Sinclair, which she turned into best-sellers in Germany; produced a series of detective novels under a pseudonym; wrote seven engaging and thought-provoking novels of her own, six of which were translated into English; contributed countless insightful short stories and articles to newspapers and magazines; and, having become a committed socialist, achieved international renown in the 1920s with her *Fairy Tales for Workers' Children*, which were widely translated including into Chinese and Japanese. Because of her fervent and outspoken opposition to National Socialism, she and her life-long Jewish partner, Stefan Klein, had to flee first Germany, where they had settled, and then, in 1938, her native Austria. They found refuge in England, where Zur Mühlen died, forgotten and virtually penniless, in 1951. Encyclopedia of German Literature Jun 26 2019 First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

*Innovation and Transition in Law: Experiences and Theoretical Settings* Aug 28 2019 This book features a discussion on the modernisation of law and legal change, focusing on the key concepts of "innovation" and "transition". These concepts both appear to be relevant and poorly defined in contemporary legal science. A critical reflection on the heuristic value of these categories seems appropriate, particularly considering their dyadic value. While innovation is increasingly appearing in the present day as being the category in which one looks at the modernisation of law, the concept of transition also seems to be the privileged place of occurrence for such dynamics. This group of Italian and Brazilian scholars contributing to this volume intends to investigate such problems through an interdisciplinary prism. It includes points of view both internal to legal studies - such as the history of law, theory of law, constitutional law, private law and commercial law - and external, such as political philosophy and history of justice and political institutions.

**Bulletin of Books in the Various Departments of Literature and Science Added to the Public Library of Cincinnati During the Year...** Jan 02 2020

*Historical Painting Techniques, Materials, and Studio Practice* May 30 2022 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest

art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

*Jurists Uprooted* Oct 03 2022 As a result of the Nazi-regime, German law faculties lost just over a quarter of their members. Recent years have seen a growing body of literature on the contribution of scientists, historians, and literary and artistic figures who were forced to leave Germany and Austria after Hitler came to power. This volume is the first study of the important contribution of refugee and emigre legal scholars to the development of English law. It considers nineteen legal scholars originally trained in Germany or Austria, (fifteen of whom were expelled from their posts in the 1930s) and who made their home in England, and assesses their contribution to scholarship in a very different legal system from that which they left.

**Appletons' Journal of Literature, Science and Art** May 06 2020

**Erard** Aug 21 2021 Sébastien Erard's (1752-1831) inventions have had an enormous impact on instruments and musical life and are still at the foundation of piano building today. Drawing on an unusually rich set of archives from both the Erard firm and the Erard family, author Robert Adelson shows how the Erard piano played an important and often leading role in the history of the instrument, beginning in the late eighteenth century and continuing into the final decades of the nineteenth. The Erards were the first piano builders in France to prioritise the more sonorous grand piano, sending gifts of their new model to both Haydn and Beethoven. Erard's famous double-escapement action, which improved the instrument's response while at the same time producing a more powerful tone, revolutionised both piano construction and repertoire. Thanks to these inventions, the Erard firm developed close relationships with the greatest pianist composers of the nineteenth century, including Hummel, Liszt, Moscheles and Mendelssohn. The book also presents new evidence concerning Pierre Erard's homosexuality, which helps us to understand his reluctance to found a family to carry on the Erard tradition, a reluctance that would spell the end of the golden era of the firm and lead to its eventual demise. The book closes with the story of Pierre's widow Camille, who directed the firm from 1855 until 1889. Her influential position in the male-dominated world of instrument building was unique for a woman of her time.

Catalogue of Scientific Papers (1800-1900): ser. 2 , 1864-1873 Jun 30 2022

European Elites and Ideas of Empire, 1917-1957 Oct 30 2019 Who thought of Europe as a community before its economic integration in 1957? Dina Gusejnova illustrates how a supranational European mentality was forged from depleted imperial identities. In the revolutions of 1917 to 1920, the power of the Hohenzollern, Habsburg and Romanoff dynasties over their subjects expired. Even though Germany lost its credit as a world power twice in that century, in the global cultural memory, the old Germanic

families remained associated with the idea of Europe in areas reaching from Mexico to the Baltic region and India. Gusejnova's book sheds light on a group of German-speaking intellectuals of aristocratic origin who became pioneers of Europe's future regeneration. In the minds of transnational elites, the continent's future horizons retained the contours of phantom empires. This title is available as Open Access.
