**Natural Fibre Reinforced Polymer Composites Feb 21 2022 Natural fibers and their composites have a long and important place in the history of human creativity and industry. Increasing consumer interest in "green" products made with sustainable materials, along with the rising cost of petroleum - the basic ingredient of synthetic fibers - have once again brought natural fibers and their composites to the fore. The renewed interest in natural fibers is only a few decades old. Thus, the pioneering work of current researchers in this new era of natural fiber composites will help to illuminate the path for future researchers as they explore new potentialities for natural fibers. Sabu Thomas and Laly Pothen, themselves leaders in the field, bring together cutting edge research by eminent scientists in Natural Fiber Reinforced Composites. Covering the latest research trends such as nano technology, the book will be a valuable resource for the natural fiber composite researcher.**

***Bast and Other Plant Fibres* Mar 01 2020 Bast and Other Plant Fibres, a title in Woodhead Publishing’s series on fibres published in association with The Textile Institute, UK, is the first book in over 50 years to cover the most interesting plant fibres and those with high annual production. Bast fibres have many textile applications, with natural fibre composites being the fastest growing due to the combination of their relatively low cost and excellent technical characteristics. Following the editor’s introductory chapter, which includes a comprehensive set of tables comparing the physical and chemical characteristics of the fibres, Chapter 2 discusses jute while Chapters 3 and 4 cover flax and hemp. Subsequent chapters are devoted to ramie, sisal, coir and abaca. Chapter 9 brings together information on minor fibres that may deserve greater interest on the part of international markets, while Chapter 10 is dedicated to the use of bast and leaf fibres in composites. Information is included on production and processing, physical and chemical properties, and on economic, environmental, and health and safety considerations. This book is an essential reference to academics and researchers in agriculture and horticulture as well as those working in textiles, apparel and industrial design, and textile testing and forensic science laboratories. It will also be invaluable to those working in government departments such as**

***Integrative Production Technology Nov 01 2022 This contributed volume contains the research results of the Cluster of Excellence “Integrative Production Technology for High-Wage Countries”, funded by the German Research Society (DFG). The approach to the topic is genuinely interdisciplinary, covering insights from fields such as engineering, material sciences, economics and social sciences. The book contains coherent deterministic models for integrative product creation chains as well as harmonized cybernetic models of production systems. The content is structured into five sections: Integrative Production Technology, Individualized Production, Virtual Production Systems, Integrated Technologies, Self-Optimizing Production Systems and Collaboration Productivity. The target audience primarily comprises research experts and practitioners in the field of production engineering, but the book may also be beneficial for graduate students.***

***Manufacturing of Natural Fibre Reinforced Polymer Composites Jul 29 2022 Natural fibre composite is an emerging material that has great potential to be used in engineering application. Oil palm, sugar palm, bagasse, coir, banana stem, hemp, jute, sisal, kenaf, roselle, rice husk, betul nut husk and cocoa pod are among the natural fibres reported to be used as reinforcing materials in polymer composites. Natural fibre composites were used in many industries such as automotive, building, furniture, marine and aerospace industries. The advantages of natural fibre composites include low cost, renewable, abundance, light weight, less abrasive and they are suitable to be used in semi or non-structural engineering components. Research on various aspects of natural fibre composites such as characterization, determination of properties and design have been extensively carried out. However, publications that reported on research of manufacture of natural fibre composites are very limited. Specifically, although manufacturing methods of components from natural fibre composites are similar to those of components from conventional fibre composites such as glass, carbon and Kevlar fibres, modification of equipment used for conventional fibre composites may be required. This book fills the gap of knowledge in the field of natural fibre composites for the research community. Among the methods reported that are being used to produce components from natural fibre composites include hand lay-up, compression moulding, filament winding, injection moulding, resin transfer moulding, pultrusion and vacuum bag moulding. This book is also intended to address some research on secondary processing such as machining and laser welding of natural fibre composites. It is hoped that publication of this book will provide the readers new knowledge and understanding on the manufacture of natural fibre composites.***

***Painted Over Jul 17 2021 Is the unexpected reunion of estranged friends just another still life capturing a moment in time? Or could it be the beginning brushstrokes of a romantic masterpiece? Back in the day, Paige and Ria were the best of friends. As they grew, they grew closer, always there for each other, even as Paige concentrated on literature and art while Ria cut a swath through every soccer field—and most of the cheerleaders. But something shocking happened during their senior year of college that ended their friendship. Big time. In the years that follow, Paige becomes a successful artist and Ria a star soccer player. A chance meeting with Ria after all this time has Paige wondering if it's finally time to forgive and forget. As the two become cautiously reacquainted, the possibility of a true reconciliation is complicated by the arrival of glamorous gallery owner, Cara, who definitely wants Paige's work...and maybe something more. Then there's the return of Ria's gorgeous ex, Elena, who has a mind-blowing surprise for Paige.***

***Live to Tell Dec 10 2020 Organisations private and public operate in an increasingly uncertain landscape, in which they are confronted with challenges they might not be ready to face. They desperately need the engaged minds of their workforces. The evidence, however, suggests that for the most part they don't have that. There is an urgent need to address the high cost of low trust and employee disengagement. Revealing a new approach centred on redefining what we mean by 'management' and 'business', and that it is a collective form of learning that binds them together and facilitates sustained high performance, Donal Carroll examines high performing organisations to uncover how they have built trust, managed value, adopted new types of business model and successfully engaged in collective learning. The new management model is about retaining control by giving it away, more accountable self-management, a new professionalism, and about framing organisation as the basic unit of purpose rather than management itself. Next, new business models are examined more suited to complex, internet-enabled markets that allow greater choice, but which need organizational alertness to what works. Thirdly, learning is considered, with a focus on moving from organisational learning to productive interference sustaining***

**Sway May 03 2020 After his father died on 9/11 in the World Trade Center, nine-year-old Matthew John Bocchi began an obsessive quest to find out exactly how he died. He researched video tapes, pictures, blogs, anything that could potentially answer the question looming in his mind: was his father one of the jumpers? In the first memoir told by a child of 9/11, Matt intimately delves into the psychological and emotional torment that ensued after his father's death. With heartbreaking vulnerability, he details how his incessant quest resulted in a devastating act of violence that stripped his innocence as a young man. As Matt spirals down a bottomless pit of drug abuse, he willfully risks his life in search of the next high—all in an attempt to forget his past. Now at twenty-eight years old and sober, he recounts his unique story—one full of heartbreak and despair, grief and uncertainty, but most importantly, happiness and hope. The lesson he teaches us is clear but intricate: No matter how far you fall, you can always rise again. No matter how far you stray, you can always find your way home. And no matter how wide you sway, you can always pick up the pieces and stand tall.**

***Purple Angst Jan 11 2021*** Purple Angst is a story about friendship and the many trials one can endure with your best friend. A friendship has many avenues of laughter, fighting, adventure, and betrayal all while pushing each other to limits you wouldn't go without one another. A friend can help mold the person you become, but they can also hinder you from getting there because of their own selfish motives. There is nothing that can come between best friends, or is there? Sidonia Goodman's best friend, Brenda, is dying and there is nothing they can do about it. In Long Island the winter is bitter cold, but Sid doesn't feel it. On January 14, 2011 Sid spends countless hours trying to stay strong for her best friend while struggling with her own life condition. Sid's fight with anxiety brings her back to re-live the past experiences that have brought her to who she is presently. In the process, Sid is awakened to love, heartbreak, passion, success, and missed opportunities. Through it all Sid finds the only comfort that gets her through is her bond of friendship with Brenda. Now Sid must come to terms with her best friend dying and find a new relief for her attacks.

***DRIVEN Aug 30 2022*** DRIVEN is John Aston's hugely entertaining motoring autobiography. This ambitious and far-ranging book begins with his early days as a teenage car enthusiast and race marshal in the late Sixties before covering the wide range of subjects close to his heart. These include the best and worst of Formula One, the icon that is Ferrari, the writer's NASCAR adventure, and the delights of long road trips in his beloved Caterham Seven. But that's not all, as you can read about why the NSU Ro80 was a prophet without honour, as well as what the writer thinks about the changing face of motoring journalism. Yes, one J Clarkson is mentioned ... And there's more still, as a major part of the book is a first-hand account of a year in British motorsport. The writer's love of the lesser known categories of motorsport illuminates the text, as does his insight into the places, people and machinery making up the sport's
