Media Corporate Entrepreneurship Aug 31 2022 This book examines corporate entrepreneurship start-ups in the media industries and provides a timely solution to fill in the gap of academic as well as practical knowledge in this regard. It brings together new media venturing practices in the west and east and covers new media opportunities in various emerging forms, including gaming, Internet, mobile and webcasting business. The book presents case studies from major transnational media companies, highlights the industry specific characteristics of corporate entrepreneurship, and thus contributes to understanding the links between new business venturing and certain particular industries, so as to further explore the industry specific characteristics of entrepreneurship. This book also suggests a new approach to integrate economic and management theories for the study of media corporate entrepreneurship; while the two sets of theories are conflicting with each other, the book proposes a contingent model to reconcile different theories. This is an innovative approach and will be a valuable starting point to construct an interdisciplinary theoretical framework for new media business studies.

Digital Video Recorders Nov 02 2022 Four specific trends are driving the DVR industry: consumer content choice, consumer content control, personalization of content libraries, and the ability to transfer content from device-to-device and person-to-person. "Digital Video Recorders" features a macro and micro views of the already established yet still burgeoning DVR industry. As part of the NAB Executive Technology Briefing series, this book gives you a wealth of market knowledge, business models, case studies, and industry insights explained in a non-technical fashion. "Digital Video Recorders" discusses the impact of the technology across many different industries and platforms, explains hardware, software and technology of set-top boxes, DVR infrastructure, on-screen guides, planning and scheduling, content security, and more. Whether you are an executive in the broadcast, telecommunications, consumer electronic, or advertising space, you will expand your knowledge on DVR impact, explore new business opportunities, and get a brief overview of the technical terms needed. You will also be able to accurately analyze and understand the trends, projections and other data, all of which will help lead to the expedited growth and development of DVR industry.

Digital Entertainment Superguide Nov 21 2021 Audio and video content is all around us. And these days much of it comes not from TV cables, satellite dishes, and radio antennas, but from our digital devices around the house, streaming over the Internet and local networks. And that's why we created the *Digital Entertainment Superguide*, a primer with everything you need to know to get started. This book walks you through how to set up your home network and choose the right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!

Technology and Consumption Aug 19 2021 Technology and Household Consumption is a comprehensive text that provides insights into technology's impact on consumer behavior and the household environment. Consumption and consumer behavior has become a very important subject of study that is now covered in many disciplines including family economics, culture studies, and feminist/women studies. In the first section, this book provides a historical perspective on how consumer behaviors have changed because of technology and how technology itself has changed. Data on ownership and expenditures is detailed in describing the penetration of technology in the household and changes over time. In the examination of demographics and social changes, an emphasis is placed on women and children. As it is important to understand the entry paths and factors that influence them, the book also introduces a research framework to understanding the adoption and utilization of household technologies. In the second section, the book examines specific household technologies and consumption experiences including shopping choices and behaviors, entertainment outlets and availability, communications technologies, and working at home. The

book concludes with a section on the relationships between marketers and consumers.
