August 2022 - Surplus Record Machinery & Equipment Directory Mar 29 2020
SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. August 2022 issue. Vol. 99, No. 8

Medium/Heavy Duty Truck Engines, Fuel & Computerized Management Systems Apr 29 2020 Ideal for students, entry-level technicians, and experienced professionals, the fully updated Sixth Edition of MEDIUM/HEAVY DUTY TRUCK ENGINES, FUEL & COMPUTERIZED MANAGEMENT SYSTEMS is the most comprehensive guide to highway diesel engines and their management systems available today. The new edition features expanded coverage of natural gas (NG) fuel systems, after-treatment diagnostics, and drive systems that rely on electric traction motors (including hybrid, fuel cell, and all-electric). Three new chapters address electric powertrain technology, and a new, dedicated chapter on the Connected Truck addresses telematics, ELDs, and cybersecurity. This

user-friendly, full-color resource covers the full range of commercial vehicle powertrains, from light- to heavy-duty, and includes transit bus drive systems. Set apart from any other book on the market by its emphasis on the modern multiplexed chassis, this practical, wide-ranging guide helps students prepare for career success in the dynamic field of diesel engine and commercial vehicle service and repair. Hybrid-electric Transit Buses Jan 19 2022 This report presents an up-to-date description of emerging hybrid-electric drive technology for transit buses in the United States. The technology and its status, benefits, life-cycle costs, and deployment issues are discussed. The report is intended to provide transit agencies with information to compare the emissions and fuel economy expected from hybrid-electric transit buses with those expected from clean diesel or alternatively fueled buses.

Multivariate Analysis in Management, Engineering and the Sciences Dec 06 2020 Recently statistical knowledge has become an important requirement and occupies a prominent position in the exercise of various professions. In the real world, the processes have a large volume of data and are naturally multivariate and as such, require a proper treatment. For these conditions it is difficult or practically impossible to use methods of univariate statistics. The wide application of multivariate techniques and the need to spread them more fully in the academic and the business justify the creation of this book. The objective is to demonstrate interdisciplinary applications to identify patterns, trends, association and dependencies, in the areas of Management, Engineering and Sciences. The book is addressed to both practicing professionals and

researchers in the field.

Green Diesel Sep 22 2019 This book covers the entire spectrum of green diesel and their applications in existing CI engines. This book discusses how a green diesel is a better fuel than biodiesel and petrodiesel and more suitable fuels for sustainable future development. The book begins with a concise overview of the fundamentals of the green diesel properties, preparation, and characterization of green diesel using hydroprocessing technology. The book covers recent developments in the domain of green diesel derived particularly from the second-/third-generation feedstocks. Various topics covered in this book include the catalysts involved in the processing of green diesel, characterization of the products as per ASTM/EN protocols. In addition, the book also illustrates characteristic features of green diesel and how it is different from biodiesel and petrodiesel. Other chapters cover performance and emission characteristics of green diesel in CI engines and techno-economic analysis. Moreover, the current status of green diesel industries is also incorporated. This book is of particular interest to graduate students and academic or industrial researchers/professionals working in the area of green diesel/green energy, bioenergy and mechanical, automobile, and chemical engineering. This book makes a forceful foundation for the establishment of green diesel refineries/biorefineries for a sustainable, cleaner, and greener future.
