[Crisis and Restructuring in East Asia](#) May 31 2020 This book criticizes the widespread view that the 1997 Asian crisis was due to 'crony capitalism' and puts the blame instead on misguided liberalization. It analyzes the case of Korea's business conglomerates, the chaebol, with particular attention to the car industry, to show how liberalization contributed to the crisis even at the level of the firm. It shows how those firms that had developed innovative capabilities survived the crisis much better than those that had merely expanded into markets opened up by liberalization.

[Red Crew](#) Mar 09 2021 Red Crew is a first-hand account of U.S. Coast Guard anti-smuggling operations during the early years of the nation's maritime war on drugs. Jim Howe describes his experience as the executive officer of a specialized drug-hunting crew that sailed in then-state-of-the-art "surface effect ships," a small flotilla of high-speed vessels pressed into the drug war on short notice. In the early 1980s, South Florida and the Caribbean were awash in illicit drugs, with hundreds of smuggling organizations bringing huge loads of marijuana, and later cocaine, into the United States. To fight this epidemic, the Reagan administration led a massive effort to disrupt shore-side gangs while bolstering interdiction activity at sea. To increase the number of days at sea for each surface effect ship, a "multi-crewing" concept was employed, with four teams of sixteen sailors—the Red, Blue, Green, and Gold Crews—rotating among three hulls. Through its first-person narrative, Red Crew offers a rare glimpse into the day-to-day pressures, challenges, failures, and successes of Coast Guard cuttermen as they carried out complex and dangerous missions. Red Crew provides a unique historical view of the early days in the Coast Guard's war on drugs, and is the only book-length history of the diminutive, one-of-a-kind surface effect ship fleet.

Lemon-Aid New Cars and Trucks 2012 Sep 03 2020 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

They do not see the automobile in the same light as many others and find its existence to be utterly offensive. In a quest to gather the necessary resources to one day give an automobile the kind of treatment it so deserves, these individuals managed to utilize a sliding device and a top-secret military program to their advantage. They have constructed a compound existing on a parallel earth designed for the sole purpose of disciplining the automobile. These individuals have furthermore taken advantage of a top-secret military program in which they have become what could only be considered as redesigned humans with android properties. Using the very best of cybernetics and nanotechnology, these individuals have been given the ability to alter their strength and their heights at will. It took these individuals ten years to construct a compound so designed to make what would otherwise be nothing but a fantasy a reality.
