1401 7320 different strategies for optimization using the Jan 22 2022 28 01 2014 we present the results of a numerical study with 20 qubits of the performance of the quantum adiabatic algorithm on randomly generated instances of max 2 sat with a unique assignment that maximizes the number of satisfied clauses the probability of obtaining this assignment at the end of the quantum evolution measures the success of the algorithm here

1411 4028 a quantum approximate optimization algorithm Aug 29 2022 14 11 2014 we introduce a quantum algorithm that produces approximate solutions for combinatorial optimization problems the algorithm depends on a positive integer p and the quality of the approximation improves as p is increased the quantum circuit that implements the algorithm consists of unitary gates whose locality is at most the locality of the objective function

active learning increases student performance in science pnas Oct 31 2022 the overall mean effect size for performance on identical or equivalent examinations concept inventories and other assessments was a weighted standardized mean difference of 0.47 z 9.781 p 0.001 meaning that on average student performance increased by just under half a sd with active learning compared with lecturing the overall mean effect size for failure rate

1406 1078 learning phrase representations using rnn Feb 20 2022 03 06 2014 in this paper we propose a novel neural network model called rnn encoder decoder that consists of two recurrent neural networks rnn one rnn encodes a sequence of symbols into a fixed length vector representation and the other decodes the representation into another sequence of symbols the encoder and decoder of the proposed model are jointly

money creation in the modern economy bank of england Sep 29 2022 14 03 2014 published on 14 march 2014 by michael mcleay amar radia and ryland thomas of the bank's monetary analysis directorate this article explains how the majority of money in the modern economy is created by commercial banks making loans money creation in practice differs from some popular misconceptions banks do not act simply as
