Sacred Bonds of Solidarity Aug 06 2020 Sacred Bonds of Solidarity is a history of the emergence of Jewish international aid and the language of "solidarity" that accompanied it in nineteenth-century France.

French Liberalism in the 19th Century Sep 18 2021 Political and economic liberalism has generally been considered to be of marginal import in France, but at an intellectual level, it is a different story. An exploration of the history of French economic thought shows how a rich intellectual tradition developed during the nineteenth century, which has been previously neglected in English language studies of French thinking. In this important new collection, Robert Leroux brings together key works, both from widely regarded and lesser known authors, whose thinking constituted the core of a singular intellectual movement. These include such figures as Charles Dunoyer, Joseph Garnier, Gustave de Molinari, Yves Guyot, Alexis de Tocqueville, Benjamin Constant and Frédéric Bastiat. Including several works that have never before been published in English, this anthology begins with a full introduction that provides an overview of liberal thought in the nineteenth century, and each text is preceded by a biographical note on the author, and an explanation of the wider significance of the text. This anthology, by bringing to the fore a number of writers and doctrinal positions, seeks to give a coherence, an overall cast to French liberalism without exaggerating its unity. It will be of interest to economists, political scientists, historians, philosophers and sociologists alike.

When The World Spoke French Jun 27 2022 A New York Review Books Original During the eighteenth century, from the death of Louis XIV until the Revolution, French culture set the standard for all of Europe. In Sweden, Austria, Italy, Spain, England, Russia, and Germany, among kings and queens, diplomats, military leaders, writers, aristocrats, and artists, French was the universal language of politics and intellectual life. In *When the World Spoke French*, Marc Fumaroli presents a gallery of portraits of Europeans and Americans who conversed and corresponded in French, along with excerpts from their letters or other writings. These men and women, despite their differences, were all irresistibly attracted to the ideal of human happiness inspired by the Enlightenment, whose capital was Paris and whose king was Voltaire. Whether they were in Paris or far away, speaking French connected them in spirit with all those who desired to emulate Parisian tastes, style of life, and social pleasures. Their stories are testaments to the appeal of that famous "sweetness of life" nourished by France and its language.

Contemporary French Environmental Thought in the Post-COVID-19 Era May 27 2022 Contemporary French Environmental Thought in the Post-COVID-19 Era is focused on the fields of biosemiotics, linguistics, ecocriticism, and environmental ethics. Closely aligning with Sustainable Development Goal 13.1, Keith Moser's study aims to strengthen resilience to climate-related hazards by drawing on ecological theories developed by French philosophers in conversation with biosemiotic principles. Not only does the novel theoretical framework offered by biosemiotic interpretations of the universe and our place in it represent an indispensable conceptual tool for understanding the unprecedented medical challenges at the dawn of a new millennium, but it also beckons us to think harder about the environmental crisis that threatens the continued existence of all sentient beings who call the biosphere home. This book also highlights the richness, diversity, and utility of the ecological theories developed by the French philosophers Michel Serres, Edgar Morin, Jacques Derrida, Dominique Lestel, and Michel Onfray in addition to how they engage with biosemiotic principles. Taken together, the book probes the scientific, linguistic, philosophical, and ethical implications of biosemiotic theories in a post-pandemic world from an environmental and medical perspective.

The Peoples of French Indochina Aug 18 2021

France May 03 2020 Explains the daily lives of the French people, including school, work, family activities, and everyday life both in the city and the country.

19th and 20th Century French Philosophy Jul 29 2022 Copleston, an Oxford Jesuit and specialist in the history of philosophy, created his history as an introduction for Catholic ecclesiastical seminaries. The 11-volume series gives an accessible account of each philosopher's work, and explains their relationship to the work of other philosophers.

Fighters in the Shadows Jul 05 2020 Robert Gildea's penetrating history of France during World War II sweeps aside the French Resistance of a thousand clichés. Gaining a true understanding of the Resistance means recognizing how its image has been carefully curated through a combination of French politics and pride, ever since jubilant crowds celebrated Paris's liberation in 1944.

The French and the Pacific World, 17th-19th Centuries Jun 03 2020 In *The French in the Pacific World*, Annick Foucrier has brought together an important set of studies on the French presence in the Pacific. The volume opens with a section on the context of the French expansion, including its rivalries with other European powers. Following studies treat patterns of trade, exchange, settlement

and migration, looking at the French image of and reaction to the worlds round the Pacific.

A Dubious Science Apr 25 2022 A Dubious Science tells the story of nineteenth-century French political economy, an academic discipline that aspired to the status and authority of a «hard» science alongside such disciplines as physics and chemistry. It chronicles political economists' encounter with «the social question» - all those unexpected social consequences of nineteenth-century industrialization - which offered concrete evidence that industrial capitalism showed few signs of guaranteeing happiness and economic success to all productive members of society. The social question forced economists to admit that their theoretical assumptions were not working in practice the way they were supposed to in theory and to confront the possibility that their science might be less certain than they had believed. This book explores the relationship between the unexpected socio-economic realities of an industrializing society and the disciplinary formation and self-protection of an aspiring human science, and it links political economy's aspirations to governmentality, that peculiarly modern type of power explored by Michel Foucault. Like other «dubious» human sciences during the nineteenth century, French political economy was embroiled in a network of interventionist strategies, administered both from inside and outside the state, designed to produce docile bodies, obedient souls, and a content and productive population. A Dubious Science should prove valuable in courses on economic thought and its history; the history of the human sciences; the history and sociology of the professions; as well as the broader history of European industrialization and its consequences.

French 19th and 20th Century Pictures Jul 25 2019

French Revolutions Jan 23 2022 The ultimate amateur attempts to cycle the Tour de France route. "Put me back on my bike." As last words go, these are unlikely to pass Tim Moore's lips. The author attempts to cycle all 3,630 km of the 2000 Tour de France route just before the professionals do. His is an epic depiction of an inadequate man's attempt to achieve the unachievable, a tale of calorific excess, ludicrous clothing and intimate discomfort.

Contesting the French Revolution Apr 13 2021 Contesting the French Revolution provides an insightful overview of one of history's most significant events, as well as examining the most significant historiographical debates about this period. Explores the causes, events, and consequences of the French Revolution Offers a stimulating analysis of the most controversial debates: Were the events of 1789 a social revolution or a political accident? Did they mark the rise of industrial capitalism or the birth of modern democracy? Was Napoleon Bonaparte an heir to the ideals of 1789 or a betrayer of the Revolution? Shows how historical interpretation of the French Revolution has been influenced by the changing political and social currents of the last 200 years - from the Russian Revolution to the fall of the Berlin Wall - and how historical study has shifted from a political focus to social and cultural approaches in more recent years.

The French Revolution Nov 01 2022 A short and controversial new interpretation of arguably the most important revolution of all time: the event that made the rights of man and the demand for liberty, equality and fraternity central to modern politics.

The Coming of the French Revolution Jan 11 2021 The Coming of the French Revolution remains essential reading for anyone interested in the origins of this great turning point in the formation of the modern world. First published in 1939, on the eve of the Second World War, and suppressed by the Vichy government, this classic work explains what happened in France in 1789, the first year of the French Revolution. Georges Lefebvre wrote history "from below"—a Marxist approach. Here, he places the peasantry at the center of his analysis, emphasizing the class struggles in France and the significant role they played in the coming of the revolution. Eloquently translated by the historian R. R. Palmer and featuring an introduction by Timothy Tackett that provides a concise intellectual biography of Lefebvre and a critical appraisal of the book, this Princeton Classics edition continues to offer fresh insights into democracy, dictatorship, and insurrection.

What was Revolutionary about the French Revolution? Feb 21 2022 Darnton offers a reasoned defense of what the French revolutionaries were trying to achieve and urges us to look beyond political events to understand the idealism and universality of their goals.

French Flower Painters of the 19th Century Nov 08 2020 Om franske blomstermalere i det 19. århundrede

Eyes Across the Channel Mar 25 2022 Using interpretations of the French Revolution as a model, *Eyes Across the Channel* asks what history meant to Victorian Britain, how events became enshrined with the authority of history and how such cultural assumptions might help us to read nineteenth-century British literature. Britain and France are now joined by a tunnel, yet the narrow stretch of sea that divides the two countries has for centuries represented both closeness and difference. *Eyes Across the Channel* argues that between the July Revolution of 1830 and the actual beginning of the construction of a Channel Tunnel in 1882, Britons more frequently interpreted France's role as their closest continental neighbour historically and politically than geographically.

Full-Color Sourcebook of French Fashion Mar 01 2020 Illustrations depicting 500 years of French fashion, reproduced from a rare 19th-century publication, progress chronologically from flamboyant headgear and voluminous robes of 15th-century royalty to high-waisted Empire styles of the Napoleonic era.

The Terror in the French Revolution Feb 09 2021 Why has the guillotine become one of the best known symbols of the French Revolution? Why did a revolution, which set out to provide French people with constitutional government and freedom in 1789, end up with a dictatorship that executed tens of thousands of them in 1793-4? Such questions have fascinated observers of the French Revolution since the 1790s and those concerning the Terror have remained the most controversial. This book examines the arguments, analyses the Terror's background and plots a path through the historical minefield that lies between the fall of the Bastille in 1789 and the work of the guillotine during the Terror. It puts the Terror into context and shows how events and ideas interacted to create an event that has haunted the political imagination of Europe ever since.

Colonial Borderlands Jan 29 2020 "France and the Netherlands were both important European colonial powers in the nineteenth century. This book, based primarily on archival research, is a contribution to the study of the relations between France and the Netherlands overseas in the nineteenth century. It focuses on those regions of the world where these two nations shared colonial borderlands: the island of St Martin in the Caribbean, the Gold Coast in Africa, and French Guiana and Surinam in South America. The border question in these regions is dealt with in the European context of colonial and international policy, as well as in the local context. The work addresses Franco-Dutch relations in the colonies, but also the interactions with the slaves on St Martin, the peoples of the Gold

Coast (Ashanti, Agni of Sanwi, Fanti and Apollonians or Nzema), and the Maroons such as the Boni (Aluku) and the Ndyuka in the Guianese interior."--BOOK JACKET.

Inspector French: Fear Comes to Chalfont May 15 2021 A classic crime novel by Freeman Wills Crofts, 'The King of Detective Story Writers', featuring Inspector French, coming soon to television.

Trade and the COVID-19 Pandemic: Lessons from French Firms Aug 30 2022 This paper uses granular customs data from France to investigate propagation of the COVID-19 shock along the supply chains in 2020. It quantifies the effect of the COVID-19 shock on trade adjustment and identifies mitigating and amplifying factors contributing to French firms' heterogeneous adjustment paths. Early in the pandemic, firms mainly responded to global lockdowns and spread of the virus by reducing trade volumes (intensive margin) as opposed to exiting from import and export markets (ex-tensive margin). However, adjustment along the extensive margin played a more important role in trade with developing countries. It is shown that the impact of lockdowns was stronger for final consumer goods and the trade recovery was predominantly demand-driven. More automated, inventory-intensive, older, and medium-sized firms were more insulated from the shock, whereas firms' reliance on air transportation for shipping goods amplified the shock. Trade bans and promotion measures implemented by governments in response to the pandemic had little impact on aggregate trade flows.

Consumable Metaphors Aug 25 2019 This book studies the various definitions of animal nature proposed by nineteenth-century currents of thought in France. It is based on an examination of a number of key thinkers and writers, some well known (for example, Michelet and Lamartine), others largely forgotten (for example, Gleizes and Reynaud). At the centre of the book lies the idea that knowledge of animals is often knowledge of something else, that the primary referentiality is overlaid with additional levels of meaning. In nineteenth-century France thinking about animals (their future and their past) became a way of thinking about power relations in society, for example about the status of women and the problem of the labouring classes. This book analyses how animals as symbols externalize and mythologize human fears and wishes, but it also demonstrates that animals have an existence in and for themselves and are not simply useful counters functioning within discourse.

French Mar 13 2021

Jean-Paul Marat Apr 01 2020 Jean-Paul Marat's role in the French Revolution has long been a matter of controversy among historians. Often he has been portrayed as a violent, sociopathic demagogue. This biography challenges that interpretation and argues that without Marat's contributions as an agitator, tactician, and strategist, the pivotal social transformation that the Revolution accomplished might well not have occurred. Clifford D. Conner argues that what was unique about Marat - which set him apart from all other major figures of the Revolution, including Danton and Robespierre - was his total identification with the struggle of the propertyless classes for social equality. This is an essential book for anyone interested in the history of the revolutionary period and the personalities that led it.

French Political Thought in the Nineteenth Century Nov 20 2021

Publications of the Virginia War History Commission Oct 27 2019

French Feminism in the 19th Century Sep 26 2019 Histories of France have erased the feminist presence from nineteenth-century political life and the feminist impact from the changes that affected the lives of the French. Now, *French Feminism in the Nineteenth Century* completes the history books by restoring this missing—and vital—chapter of French history. The book recounts the turbulent story of nineteenth-century French feminism, placing it in the context of the general political events that influenced its development. It also examines feminist thought and activities, using the very words of the women themselves—in books, newspapers, pamphlets, memoirs, diaries, speeches, and letters. Featured is a wealth of previously unpublished personal letters written by Saint-Simonian women. These engrossing documents reveal the nuances of changing consciousness and show how it led to an autonomous women's movement. Also explored are the relationships between feminist ideology and women's actual status—legal, social, and economic—during the century. Both bourgeois and working-class women are surveyed. Beginning with a general survey of feminism in France, the book provides historical context and clarifies the later vicissitudes of the "condition feminine."

An Historical Geography of France Jun 15 2021 In this 1994 book, Xavier de Planhol and Paul Claval, two of France's leading scholars in the field, trace the historical geography of their country from its roots in the Roman province of Gaul to the 1990s. They demonstrate how, for centuries, France was little more than an ideological concept, despite its natural physical boundaries and long territorial history. They examine the relatively late development of a more complex territorial geography, involving political, religious, cultural, agricultural and industrial unities and diversities. The conclusion reached is that only in the twentieth century had France achieved a profound territorial unity and only now are the fragmentations of the past being overwritten.

Correspondence with the Belgian and French Ambassadors Relating to "Text of Proposals Drawn Up by the Representatives of Belgium, France, the United Kingdom of Great Britain and Northern Ireland and Italy, March 19, 1936, Cmd. 5134." Dec 30 2019

Noir Sep 30 2022 Due to the technological advances of the nineteenth century, an abundance of black drawing media exploded onto the market. Charcoal, conte crayon, and fabricated black chalks and crayons; fixatives; various papers; and many lifting devices gave rise to an unprecedented amount of experimentation. Indeed, innovation became the rule, as artists developed their own unique—and often experimental—processes. The exploration of black media in drawing is inextricably bound up with the exploration of black in prints, and this volume presents an integrated study that rises above specialization in one over the other. Noir brings together such diverse artists as Francisco de Goya, Maxime Lalanne, Gustave Courbet, Odilon Redon, and Georges Seurat and explores their inventive works on paper. Sideline labels like "conservative" or "avant-garde," the essays in this book employ all the tools that art history and modern conservation have given us, inviting the reader to look more broadly at the artists' methods and materials. This volume accompanies an eponymous exhibition on view at the J. Paul Getty Museum from February 9 to May 15, 2016.
