**1-2-3 Magic** Aug 27 2019 "Dr. Phelan's strategies have seen a resurgence in the parenting world. Maybe that's why you feel like everywhere you go, you keep overhearing other moms say to their misbehaving children, 'That's one. That's two. That's three.' And then you watch in disbelief as their kid actually stops!" — PopSugar Moms Are you the parent of a strong-willed child? Is bedtime a nightly battle? Are you looking to discipline without stress? Since kids don't come with a manual, 1-2-3 Magic is the next best thing. Dr. Thomas Phelan has developed a quick, simple and scientifically proven way to parent that actually works! Using his signature 1-2-3 counting method, Dr. Phelan helps parents to curb obnoxious behaviors like tantrums and meltdowns, whining and pouting, talking back, sibling rivalry and more in toddlers, preschoolers and middle schoolers. He guides parents through drama-free discipline methods that include handling time outs in public, the appropriate length of a time out, and what to do if your child resists the time out. Dr. Phelan also covers how to establish positive routines around bedtime, dinnertime, homework and getting up and out in the morning, and tips for strengthening your relationship with your kids. For decades, millions of parents from all over the world have used the award-winning 1-2-3 Magic technique to raise happier families and put the fun back into parenting. 1-2-3 Magic is one of Healthline's Best Parenting Books of 2017, a 2016 Mom's Choice Award Winner, a 2016 National Parenting Product Award Winner and a 2016 Family Choice Award Winner.

**The Influence of Attitudes, Beliefs, and Social Factors on Caregivers' Decisions on the Use of OTC Medications in Preschool Children** Oct 22 2021 The purpose of this descriptive correlational study was to determine the extent that social factors, health beliefs, and attitudes influenced caregiver's decisions in home management with over-the-counter (OTC) medications. Home management decisions were studied in relation to seeking professional care. The association of parents' decisions concerning OTC medications with social factors, as well as beliefs and attitudes related to illness, susceptibility and severity, and medication effectiveness was examined. A theoretical framework based on the Health Belief Model (Rosenstock, 1974) guided the conceptualization of this study. A convenience sample of caregivers with an index child of 3 - 5 years of age was recruited through county-based Head Start programs. Approximately 50 caregivers completed the study instrument at monthly parent counsel meetings. Data were analyzed using Pearson product-moment correlational coefficient. Significant correlations were noted between the age of the caregiver, perception of severity of the child's illness, and perception of the child's susceptibility to illness and calling the doctor for advice or intervention. There were also significant correlations between both the economic status of the household and the perceived effect of OTC medications with caregiver's report of when they would give OTC medications. No significant relationships were found between trust in doctors, barriers to seeking care, and gender of the child and either the choice of giving OTC medication or calling the doctor. It has been estimated that more than 50% of all 3 year olds have been given some type of OTC medication (Kogan, et al., 1994). Findings from this study suggest clinical counseling directions for nurses working in primary care settings.

**Helping Parents Help Their Kids** Nov 10 2020 Helping Parents Help Their Kids is a guide both for clinicians who help families and for parents who have children with behavior problems. The author provides three ways to address clinical issues in designing and implementing child behavior management plans: a general behavioral consultation model, a specific behavioral model, and an empirically-tested advice package for problems that can occur in different family contexts. Each chapter provides early research on a specific strategy and several forms to use in the clinical environment. Parents will find this book helpful because the information is presented in a user-friendly format. The author explains how parents can learn specific strategies to deal with six common problems. These problems include: teaching both children and adolescents to comply with the rules of the house, dealing with disruptive behavior, and addressing problems in school. Helping Parents Help Their Kids offers both clinicians and parents effective procedures without the technical jargon many typical behavioral texts use. Instead, the author explains these methods in common-sense terms that will be a welcome change for all who want to find solutions for their child's behavioral problems.

**Activity Book for Kids.1,2,3,4...Do You Want More? Easy to Difficult Color by Number on the Go. 100+ Pages of Multi-Themed Coloring for Stress Relief** Jan 01 2020 Kids get stressed, too! But a color by number activity book helps with stress relief by becoming an instant energy booster whenever and wherever. Color by numbers is a fun, relaxing and exciting tool for altering moods while boosting coloring and number skills. The purpose of this Activity Book for Kids 1,2,3,4...Do You Want More? Easy to Difficult Color by Number on the Go 100+ Pages of Multi-Themed for Stress Relief is to: Boost relaxation skills - Help your child to master the art of relaxation through challenging activities that offer immediate satisfaction. You want your child to be able to realize his/her sour mood, come to a corner, do some color by number exercises and then turn his/her mood around 360 degrees. Boost self-control and confidence Unlike the traditional coloring activities, color by number activities are coded.

Number codes are to be followed, regardless of tight the space is for coloring. You can also see here the level of control your child has over a coloring tool, which indicates the strength of his/her tiny hand muscles. A completed color by number exercise will result in boosted self-confidence, too. Increase your child's mental acuity - A color by number activity is a logic and creative exercise so mental acuity will get the boost it needs. This activity book is randomly themed so there's a surprise waiting at every turn of the page. Ask your child to guess what the final image is before the first color is applied. How many of these guesses will prove to be correct? Every 8.5 x 11-inch page in this activity book is targeted towards the benefit of children. The random theme, as well as the varying levels of difficulty, make this activity book ideal for older kids and those who prefer mysterious challenges to gather emotional and mental benefits.
