Straw House, Wood House, Brick House, Blow Sep 04 2022 Written entirely on an iPhone, this quartet of YA novellas by Another Pan and Another Faust author Daniel Nayeri showcases four different genres. This bold collection of novellas by Another series author Daniel Nayeri features four riveting tales. These modern riffs on classic genres will introduce young adult readers to a broad range of writing styles that explore universally compelling themes such as identity and belonging, betrayal and friendship, love and mortality. Straw House: A Western sizzling with suspense, set in a land where a rancher grows soulless humans and a farmer grows living toys. Wood House: This science-fiction tale plunges the reader into a future where reality and technology blend imperceptibly, and a teenage girl must race to save the world from a nano-revolution that a corporation calls "ReCreation Day." Brick House: This detective story set in modern NYC features a squad of "wish police" and a team of unlikely detectives. Blow: A comedic love story told by none other than Death himself, portrayed here as a handsome and charismatic hero who may steal your heart in more ways than one. With humor, suspense, and relatable prose, this hip and cutting-edge collection dazzles.

William Morris and his Palace of Art Feb 26 2022 *William Morris and his Palace of Art* is a comprehensive new study of Red House, Bexleyheath; the only house commissioned by William Morris and the first independent architectural work of his close friend, Philip Webb. Morris moved in to Red House as an ebullient young man of 26, with an independent income and a head brimming with ideas and the persistent question of 'how best to live? Red House, together with its Pre-Raphaelite garden, stands as the physical embodiment of his exuberant spirit, youthful ambition, passionate medievalism, creativity and great sense of possibility. For five intense years from 1860-5, it was a place of halcyon days - happy family life, loyal friendship, good humoured competition, and the jovial campaign of decorating; furnishing the house and designing the garden. Drawing on a wealth of new physical evidence, this book argues that Red House constitutes an ambitious and critical chapter in his design history. It will re-consider the inspiration it provided for the founding of 'the Firm' of Morris, Marshall, Faulkner & Co. (later Morris & Co.), in 1861, and the vital collaboration of Webb, Burne-Jones, Rossetti and their intimate circle in realising Morris's dream for his house.

Concrete (Mini Format) Oct 13 2020 A visual exploration of the world's most extraordinary and inspiring concrete architecture - in a stylish and compact format. "Yes, concrete can be cold and imposing - but as the structures in the book attest, it can also be colourful, playful, and delicate." —Wall Street Journal In this new, reimagined, and easy-to-use stylish size, *Concrete* takes a fresh look at the world's most versatile and abundant building material. Collating fascinating and beautiful concrete buildings by some of the most celebrated architects of the last century, it features familiar projects from Le Corbusier and Frank Lloyd Wright alongside work from some of the leading lights of contemporary architecture including Zaha Hadid, Herzog & de Meuron, and many lesser-known newcomers.

Veneklasen Brick May 08 2020 In 1848, the second year of the new Dutch "kolonie" in West Michigan's Ottawa County, a much-needed brick manufacturing industry was begun in the rich clay fields between Groningen and Zeeland. From humble beginnings that included digging barefoot in the clay, the company created by Dutch immigrant Jan Hendrik Veneklasen and his son Berend flourished for more than seventy-five years and contributed to a unique architectural legacy. While Veneklasen Brick Co. (later Zeeland Brick Co.) remained in the family, success demanded that it expand beyond the Zeeland area. Strengthened by the purchase of clay pits elsewhere in West

Michigan and benefiting from the arrival of railroad lines, Veneklasen eventually became one of the largest brick companies in the state. Veneklasen's bricks were used in commercial, industrial, and public settings, but their residential application has drawn the most attention. Mixing traditional Dutch patterns and constantly changing American housing styles, local brick masons left behind a prime example of nineteenth-century Dutch-American material culture. Drawing from untapped primary sources, Michael Douma's work traces the history of the Veneklasen family, the development of the Veneklasen company, and the impact of its products on local construction. The first-ever book-length analysis of West Michigan Dutch contributions to architecture, "Veneklasen Brick" also addresses issues of conservation and preservation. The volume contains numerous illustrations, graphs, maps, and a comprehensive listing of nineteenth-century brick houses in southern Ottawa and northern Allegan counties.

Proceedings of the 2015 International Conference on Materials Engineering and Environmental Science (MEES2015) Nov 01 2019 "This book consists of one hundred and nine selected papers presented at the 2015 International Conference on Materials Engineering and Environmental Science (MEES2015), which was successfully held in Wuhan, China during September 25-27, 2015. All papers selected for this proceedings were subjected to a rigorous peer-review process by at least two independent peers. The papers were selected based on innovation, organization, and quality of presentation. The MEES2015 covered a wide spectrum of research topics, ranging from fundamental studies, technical innovations, to industrial applications in Chemical Material and Chemical Processing Technology, Composite Materials, Alloy Materials and Metal Materials, Characteristics of Materials, Building Material and Construction Technology, Ecology and Environment, Technology for Environmental Protection, Economy and Environment, Mechanical and Control Engineering, and Manufacturing Technology. The MEES2015 brought together more than one hundred researchers from China, South Korea, Taiwan, Japan, Malaysia, and Saudi Arabia, and provided them with a forum to share, exchange and discuss new scientific development and future directions of Materials Engineering and Environmental Science."--Provided by publisher

How a House Is Built Aug 23 2021 Houses are built with many different materials, and in many shapes and sizes. Step by step, this picture book explains how homes are built—from the architect's plans through the arrival of a happy family. The many processes of construction are explained with simple language and bright, clear illustrations, perfect for kids starting to wonder about how the world around them works. Many different careers—including carpenters, plumbers, electricians, and landscapers—are introduced, each doing their part to bring the picture wood-frame house to life. A great read for kids who love construction sites, or who can't get enough of Building a House by Byron Barton. According to The Washington Post, Gail Gibbons "has taught more preschoolers and early readers about the world than any other children's writer-illustrator." Ms. Gibbons is the author of more than 100 books for young readers, including the bestselling titles From Seed to Plant and Monarch Butterfly. Her many honors include the Washington Post/Childrens Book Fuld Nonfiction Award and the NSTA Outstanding Science Trade Book Award.
