*Cochrane Handbook for Systematic Reviews of Interventions* Nov 01 2022 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

*A Manual for Cleaning Women* Feb 09 2021 The New York Times bestseller. 'This selection of 43 stories should by all rights see Lucia Berlin as lauded as Jean Rhys or Raymond Carver' - Independent Introduced by Lydia Davis, Lucia Berlin's stories in *A Manual for Cleaning Women* make for one of the most remarkable unsung collections in twentieth-century American fiction. With extraordinary honesty and magnetism, Lucia Berlin invites us into her rich, itinerant life: the drink and the mess and the pain and the beauty and the moments of surprise and of grace. Her voice is uniquely witty, anarchic and compassionate. 'With Lucia Berlin we are very far away from the parlours of Boston and New York and quite far away, too, from the fiction of manners, unless we are speaking of very bad manners . . . The writer Lucia Berlin most puts me in mind of is the late Richard Yates.' - LRB, 1999

**Manual for Survival** Apr 13 2021 Governments and journalists tell us that though Chernobyl was "the worst nuclear disaster in history," a reassuringly small number of people died (44), and nature recovered. Yet, drawing on a decade of fine-grained archival research and interviews in Ukraine, Russia, and Belarus, Kate Brown uncovers a much more disturbing story, one in which radioactive isotopes caused hundreds of thousands of casualties. Scores of Soviet scientists, bureaucrats, and civilians documented stunning increases in cases of birth defects, child mortality, cancers, and a multitude of prosaic diseases, which they linked to Chernobyl. Worried that this evidence would blow the lid on the effects of massive radiation release from weapons testing during the Cold War, international scientists and diplomats tried to bury or discredit it. A haunting revelation of how political exigencies shape responses to disaster, *Manual for Survival* makes clear the irreversible impact on every living thing not just from Chernobyl, but from eight decades of radiation from nuclear energy and weaponry.

**Digital Transformation at Scale** Aug 06 2020 "This book is for people worrying about their sinking ship. Based on experience, it is a guide for navigating the blockers, buzzwords and bloody-mindedness that doom any analogue organisation trapped into thinking that while the internet has changed the world, it won't change their world. Companies that grew up on the web have changed our expectations of the services we rely on. We demand simplicity, speed and low cost. Organizations founded before the Internet aren't keeping up - despite spending millions on IT, marketing and 'innovation'. This book is a guide to building a digital institution. It explains how a growing band of reformers in businesses and governments around the world have helped their organizations pivot to this new way of working, and what lessons others can learn from their experience. It is based on the authors' experience designing and helping to deliver the UK's Government Digital Service (GDS). The GDS was a new institution made responsible for the digital transformation of government, designing public services for the Internet era. It snipped £4 billion off the government's technology bill, opened up public sector contracts to thousands of new suppliers, and delivered online services so good that citizens chose to use them over the offline alternatives, without a big marketing campaign. Other countries and companies noticed, with the GDS model now being copied around the world."
