The Mind's Eye Oct 03 2020 How does the brain perceive and interpret information from the eye? And what happens when the process is disrupted? In *The Mind's Eye*, Oliver Sacks tells the stories of people who are able to navigate the world and communicate with others despite losing what many of us consider indispensable senses and abilities: the capacity to recognize faces, the sense of three-dimensional space, the ability to read, the sense of sight. For all of these people, the challenge is to adapt to a radically new way of being in the world – and *The Mind's Eye* is testament to the myriad ways that we, as humans, are capable of rising to this challenge. Grieving Mar 08 2021 'Chances are, if you are reading this, your heart is broken. This book is designed to help those in pain - and specifically those who have lost someone through death - to imagine the path before them. It is a path of suffering. But it is also a path that may lead to unexpected discoveries - and to peace.' There is no sure route through grieving. Jerusha Hull McCormack provides instead a series of signposts by which we may find our own path to a new life. 'We are all amateurs at grief' she writes, 'it comes to us all; we must all go through it. To treat grief as a problem to be fixed, or (worse still) to medicalize it, is to rob us of the extraordinary privilege of encountering this experience on our terms: for each of us has our own way of grieving, and each of us has something special to learn from the process.'

Medieval Combat Aug 21 2019 “[A] remarkable how-to . . . offers freeze-frame instructions on medieval martial arts using swords, shields, poleaxes, daggers and wrestling” (Publishers Weekly). Written by German fencing master

Hans Talhoffer in 1467, this book illustrates the intricacies of the medieval art of fighting, covering both the “judicial duel” (an officially sanctioned fight to resolve a legal dispute) and personal combat. Combatants in the Middle Ages used footwork, avoidance, and the ability to judge and manipulate timing and distance to exploit and enhance the sword’s inherent cutting and thrusting capabilities. These skills were supplemented with techniques for grappling, wrestling, kicking and throwing the opponent, as well as disarming him by seizing his weapon. Every attack contained a defense and every defense a counterattack. Talhoffer reveals the techniques for wrestling, unarmored fighting with the long sword, poleaxe, dagger, sword and buckler, and mounted combat. This unparalleled guide to medieval combat, illustrated with 268 contemporary images, provides a glimpse of real people fighting with skill, sophistication and ruthlessness. This is one of the most popular and influential manuals of its kind. “This superb

[A Phoenix in the Ashes](#) Nov 23 2019 In the years following its near-bankruptcy in 1976 until the end of the 1980s, New York City came to epitomize the debt-driven, deal-oriented, economic boom of the Reagan era. Exploring the interplay between social structural change and political power during this period, John Mollenkopf asks why a city with a large minority population and a long tradition of liberalism elected a conservative mayor who promoted real-estate development and belittled minority activists. Through a careful analysis of voting patterns, political strategies of various interest
