Lord of the Forest Mar 24 2022 Hearing stories from his mother about the Lord of the Forest, little Tiger keeps a watchful eye and an observant ear on all the sights and sounds around him in the hope of finally encountering the elusive animal that rules their land.

Flute in the Forest Nov 19 2021 'Thirteen-year-old Atiya will win the hearts of young readers. Although physically handicapped; her adventurous spirit takes her on lonely rambles into the wildlife sanctuary. She knows the ways of the jungle and its creatures great and small. A charming story; full of incident and good feeling. Atiya's flute has a special magic of its own.'-Ruskin Bond Atiya Sardare lives with her dad, a forest officer. An only child, afflicted by polio, she finds solace and peace in the jungle, exploring it on short, secret, often dangerous treks. On one occasion she hears the haunting notes of a flute. It gives her goose bumps. She vows to learn to play the instrument much against her father's wishes. Her music lessons bring her close to the grouchy old anthropologist, Ogre Uncle, and his Kurumba tribal daughter, Mishora. Atiya's gift transforms her father's view, it calms the rogue elephant, Rangappa and helps nurture a blossoming friendship between a teenage boy and girl. A moving, tender, and mesmerizing tale, Flute in the Forest has wonderful incidents based on the real-life experiences of the author.

The Forest Jul 28 2022 A remarkable and ambitious novel whose central character is not a man or a woman, but the ancient New Forest of England. Few places lie closer to the heart of the nation's heritage than the New Forest. Now Edward Rutherfurd weaves its history and legends into compelling fiction, from the mysterious killing of King William Rufus to treachery and witchcraft, smuggling and poaching: this is an epic tale of well-born ladies, lowly woodsmen, sailors, merchants and Cistercian monks. The feuds, wars, loyalties and passions of generations reach their climax in a crime that shatters the decorous society of Jane Austen's Bath, and whose ramifications continue through the age of the Victorian railway builders to the ecologists of the present day.

Shadows of the Forest Sep 25 2019 Everyone is dying to live in the Shadows of the Forest. They gave me three rules to follow in exchange for my brother's life: 1. Do not enter the West Wing; 2. Do not go outside after darkness falls; and 3. There is only one exit; The Gates. This is what happened when I broke them...

Stranger in the Forest Mar 31 2020 Eric Hansen was the first westerner ever to walk across the island of Borneo. Completely cut off from the outside world for seven months, he traveled nearly 1,500 miles with small bands of nomadic hunters known as Penan. Beneath the rain forest canopy, they trekked through a hauntingly beautiful jungle where snakes and frogs fly, pigs climb trees, giant carnivorous plants eat mice, and mushrooms glow at night. At once a modern classic of travel literature and a gripping adventure story, Stranger in the Forest provides a rare and intimate look at the vanishing way of life of one of the last surviving groups of rain forest dwellers. Hansen's absorbing, and often chilling, account of his exploits is tempered with the humor and humanity that prompted the Penan to take him into their world and to share their secrets.

The Star in the Forest May 14 2021 One Saturday evening, sisters Pip and Maisie are sitting in the warm snug of their grandparent's cottage on the edge of a forest in Scotland. Maisie is restless and longs for adventure, but life at the cottage is always slow. When a bright light suddenly falls from the sky into the forest next door, Maisie can't believe her luck - finally an adventure has come her way! She has boots on and torch in hand before Pip has even put down her hot chocolate. Maisie is desperate to discover the special something as quickly as she can. As the two sisters journey through the dark forest towards the gradually receding light, her imagination runs riot - perhaps it's space treasure, gold dust, or maybe even a creature from outer space!

Hierarchy in the Forest Jul 04 2020 Are humans by nature hierarchical or egalitarian? Hierarchy in the Forest addresses this question by examining the evolutionary origins of social and political behavior. Christopher Boehm, an anthropologist whose fieldwork has focused on the political arrangements of human and nonhuman primate groups, postulates that egalitarianism is in effect a hierarchy in which the weak combine forces to dominate the strong. The political flexibility of our species is formidable: we can be quite egalitarian, we can be quite despotic. Hierarchy in the Forest traces the roots of these contradictory traits in chimpanzee, bonobo, gorilla, and early human societies. Boehm looks at the loose group structures of hunter-gatherers, then at tribal segmentation, and finally at present-day governments to see how these conflicting tendencies are reflected. Hierarchy in the Forest claims new territory for biological anthropology and evolutionary biology by extending the domain of these sciences into a crucial aspect of human political and social behavior. This book will be a key document in the study of the evolutionary basis of genuine altruism. Table of Contents: The Question of Egalitarian Society Hierarchy and Equality Putting Down Aggressors Equality and Its Causes A Wider View of Egalitarianism The Hominoid Political Spectrum Ancestral Politics The Evolution of Egalitarian Society Paleolithic Politics and Natural Selection Ambivalence and Compromise in Human Nature References Index Reviews of this book: This well-written book, geared toward an audience with background in the behavioral and evolutionary sciences but accessible to a broad readership, raises two general questions: 'What is an egalitarian society?' and 'How have these societies evolved?'...[Christopher Boehm] takes the reader on a journey from the Arctic to the Americas, from Australia to Africa, in search of hunter-gatherer and tribal societies that emanate the egalitarian ethos--one that promotes generosity, altruism and sharing but forbids upstartism, aggression and egoism. Throughout this journey, Boehm tantalizes the reader with vivid anthropological accounts of ridicule, criticism, ostracism and even execution--prevalent tactics used by subordinates in egalitarian societies to level the social playing field...Hierarchy in the Forest is an interesting and thought-provoking book that is surely an important contribution to perspectives on human sociality and politics. --Ryan Earley, American Scientist Reviews of this book: Combing an exhaustive ethnographic survey of human societies from groups of hunter-gatherers to contemporary residents of the Balkans with a detailed analysis of the behavioral attributes of non-human primates (chimpanzees, gorillas, bonobos), Boehm focuses on whether humans are hierarchical or egalitarian by nature...[Boehm's hypotheses] are invariably intriguing and well documented...He raises topics of wide interest and his book should get attention. --Publishers Weekly Boehm has been the first to look at egalitarianism with a cold, unromantic eye. He sees it as a victory over hierarchical tendencies, which are equally marked in our species. I would predict that his insightful examination will reverberate within anthropology and the social sciences as well as among biologists interested in the evolution of social systems. --Frans de Waal, Emory University Hierarchy in the Forest is an original and stimulating contribution to thinking about the origins of egalitarianism. I personally find Boehm's ideas convincing, but whether one agrees with him or not, he has formulated his hypotheses in such a way that this book is likely to set the terms of the discussion for the foreseeable future. --Barbara Smuts, University of Michigan The most unique and interesting feature of this clear, well written book is the way Boehm links the study of nonhuman primates (particularly chimpanzees) to traditional concepts of political anthropology. As a political scientist, I was intrigued by Boehm's suggestion that democracy, both ancient and modern, could be understood as the expression of the same natural dispositions that support the egalitarianism of nomadic bands and sedentary tribes. I expect that many scholars in biology, anthropology, and the social sciences would learn from this stimulating book. Even those who disagree with Boehm's arguments are likely to be provoked in instructive ways. --Larry Arnhart, Northern Illinois University Chris Boehm boldly and cogently attacks a whole orthodoxy in anthropology which sees hunter-gatherer 'egalitarianism' as somehow the basic form of human society. No praise can be too high for Boehm's brilliant and courageous book. --Robin Fox, Rutgers University

Consolations of the Forest Dec 21 2021 In *Consolations of the Forest*, Sylvain Tesson explains how he found a radical solution to his need for freedom, one as ancient as the experiences of the hermits of old Russia: he decided to lock himself alone in a cabin in the middle taiga, on the shores of Baikal, for six months. From February to July 2010, he lived in silence, solitude, and cold. His cabin, built by Soviet geologists in the Brezhnev years, is a cube of logs three meters by three meters, heated by a cast iron skillet, six-day walk from the nearest village and hundreds of miles of track. To live isolated from the world while retaining one's sanity requires a routine, Tesson discovered. In the morning, he would read, write, smoke, or draw, and then devoted hours to cutting the wood, shoveling snow, and fishing. Emotionally, these months proved a challenge, and the loneliness was crippling. Tesson found in paper a valuable confidant, the notebook, a polite companion. Noting carefully, almost daily, his impressions of the silence, his struggles to survive in a hostile nature, his despair, his doubts, but also its moments of ecstasy, inner peace and harmony with nature, Sylvain Tesson shares with us an extraordinary experience. Writer, journalist and traveler, Sylvain Tesson was born in 1972. After a world tour by bicycle, he developed a passion for Central Asia, and has travelled tirelessly since 1997. He came to prominence in 2004 with a remarkable travelogue, *Axis of Wolf* (Robert Laffont). Editions Gallimard have already published his *A Life of a Mouthful* (2009) and, with Thomas Goisque and Bertrand de Miollis, *High Voltage* (2009). In 2009 he won the Prix Goncourt for *A Life of a Mouthful*, and in 2011 won the Prix Médicis for non-fiction for *Consolations of the Forest: Alone in Siberia*.

The Flowers of the Forest Jan 10 2021 Trevor Royle has done First World War History a great service' - Gary Sheffield 'Graphic, ably controlled...the power of imaginative storytelling is Royle's endeavour' - The Guardian 'His exceptional talents at narration produce a work that is both through-provoking and engaging. This is a vivid, solidly-written book, drawing upon the best in recent scholarship' - International Review of Scottish Studies On the brink of the First World War, Scotland was regarded throughout the British Isles as 'the workshop of the Empire'. Not only were Clyde-built ships known the world over, Scotland produced half of Britain's total production of railway equipment, and the cotton and jute industries flourished in Paisley and Dundee. In addition, Scots were a hugely important source of manpower for the colonies. Yet after the war, Scotland became an industrial and financial backwater. Emigration increased as morale slumped in the face of economic stagnation and decline. The country had paid a disproportionately high price in casualties, a result of huge numbers of volunteers and the use of Scottish battalions as shock troops in the fighting on the Western Front and Gallipoli - young men whom the novelist Ian Hay called 'the vanished generation'. In this book, Trevor Royle provides the first full account of how the war changed Scotland irrevocably by exploring a wide range of themes - the overwhelming response to the call for volunteers; the performance of Scottish military formations in 1915 and 1916; the militarisation of the Scottish homeland; the resistance to war in Glasgow and the west of Scotland; the boom in the heavy industries and the strengthening of women's role in society following on from wartime employment.

A Spell in the Forest Feb 20 2022 Trees occupy a place of enormous significance, not only in our planet's web of life but also in our psyche. *A Spell in the Forest - Tongues in Trees* is part love-song, part poetic guidebook, and part exploration of thirteen native sacred British tree species. *Tongues in Trees* is a multi-layered contribution to the current awareness of the importance and significance of trees and the resurgence of interest in their place on our planet and in our hearts.

The Darkest Part of the Forest Oct 26 2019 A girl makes a secret sacrifice to the faerie king in this lush New York Times bestselling fantasy by author Holly Black In the woods is a glass coffin. It rests on the ground, and in it sleeps a boy with horns on his head and ears as pointed as knives.... Hazel and her brother, Ben, live in Fairfold, where humans and the Folk exist side by side. Since they were children, Hazel and Ben have been telling each other stories about the boy in the glass coffin, that he is a prince and they are valiant knights, pretending their prince would be different from the other faeries, the ones who made cruel bargains, lurked in the shadows of trees, and doomed tourists. But as Hazel grows up, she puts aside those stories. Hazel knows the horned boy will never wake. Until one day, he does.... As the world turns upside down, Hazel has to become the knight she once pretended to be. *The Darkest Part of the Forest* is bestselling author Holly Black's triumphant return to the opulent, enchanting faerie tales that launched her YA career.

Keeper of the Forest Jan 28 2020 Eris Taeresin, third daughter to the king, is tired of being different. She's wasted months searching the massive palace garden for a flower that will let her join her sisters in lessons to learn the secret language of flowers. Each day the Mistress of Flowers finds some reason to refuse, all while her sisters found theirs easily, a fact they love to throw in her face. When she finally finds a strange flower that satisfies the stern Mistress of Flowers, Eris is told she needs to learn more about the flower before she can join the lessons, leaving her spending more days searching the garden. At least now she has Terran, a handsome young gardener, for company. Then, while her father's men fight a war in the north and with her oldest sister planning her wedding with the Saffra prince, Eris discovers the Mistress of Flowers might be more than she realized. After overhearing her father's magi advisor, she begins to suspect the Mistress of Flowers is a flower mage who intends to use the garden in a plot against the kingdom. Eris soon learns the threat against the kingdom is deeper than she suspected and now she might be the only one able to save it from destruction.

The Secret Life of the Forest Dec 09 2020 In any given year, millions of people visit one or more of the 154 national forests in the United States, not to mention the hundreds of thousands who spend some time in the private forests of the nation. All of them - hikers, hunters, fishermen, campers, and canoeists - are drawn to the woods for some special reason. Yet few of them see the forest as a whole, as the web of life it truly is. Here, from New York Times bestselling author Richard M. Ketchum, is the extraordinary story of forests and the trees that comprise them.

The Fate of the Forest Nov 07 2020 The Amazon rain forest covers more than five million square kilometers, amid the territories of nine different nations. It represents over half of the planet's remaining rain forest. Is it truly in peril? What steps are necessary to save it? To understand the future of Amazonia, one must know how its history was forged: in the eras of large pre-Columbian populations, in the gold rush of conquistadors, in centuries of slavery, in the schemes of Brazil's military dictators in the 1960s and 1970s, and in new globalized economies where Brazilian soy and beef now dominate, while the market in carbon credits raises the value of standing forest. Susanna Hecht and Alexander Cockburn show in compelling detail the panorama of destruction as it unfolded, and also reveal the extraordinary turnaround that is now taking place, thanks to both the social movements, and the emergence of new environmental markets. Exploring the role of human hands in destroying—and saving—this vast forested region, *The Fate of the Forest* pivots on the murder of Chico Mendes, the legendary labor and environmental organizer assassinated after successful confrontations with big ranchers. A multifaceted portrait of Eden under siege, complete with a new preface and afterword by the authors, this book demonstrates that those who would hold a mirror up to nature must first learn the lessons offered by some of their own people.

Voices of the Forest Jun 26 2022 The creation of large new tracts of forest, together with the development of a modern wood processing sector, was the single biggest transformation to occur in the Scottish countryside during the twentieth century. While the environmental and landscape impacts of this change have been much commented upon, its impact on Scottish culture and society has attracted comparatively little attention. This book tells the fascinating story of the human side of forestry, drawing heavily on the thoughts, experiences and reflections of a wide range of individuals from all levels and all sectors of the industry as it has developed in Scotland over the last 100 years. The book also analyses the evolution of forestry policy and the changing roles of both the state-run Forestry Commission and the private sector. However, at its core are the stories of the men, women and children who have lived and worked in the many communities where old and new forests have loomed large - communities where, especially in the middle decades of the twentieth century, forestry was often the largest source of employment and income, and without which many of these places would have struggled to survive.

Deep in the Forest Aug 17 2021 "Deep in the forest, early in the morning, the animals slowly wake except the panda, who is sleeping in. The monkey stretches, the red ant hides, the black bear yawns, and the gazelle smiles. But where is the okapi? Can you find it?" Over 50 animals including the okapi hide on the pages of this beautiful board book. The gorgeous forest scenes take readers from morning to night, from high in the trees to deep underground. "Deep in the Forest" is as much a visual treat as it is an introduction to exotic animals. "

From the Forest Feb 08 2021 Fairy tales are one of our earliest cultural forms, and forests one of our most ancient landscapes. Both evoke similar sensations: At times they are beautiful and magical, at others spooky and sometimes horrifying. Maitland argues that the terrain of these fairy tales are intimately connected to the mysterious secrets and silences, gifts and perils. With each chapter focusing on a different story and a different forest visit, Maitland offers a complex history of forests and how they shape the themes of fairy tales we know best. She offers a unique analysis of famous stories including Rapunzel, Hansel and Gretel, Snow White, Little Red Riding Hood, Rumpelstiltskin, and Sleeping Beauty. Maitland uses fairy tales to explore how nature itself informs our imagination, and she guides the reader on a series of walks through northern Europe's best forests to explore both the ecological history of forests and the roots of fairy tales. In addition to the twelve modern re-tellings of these traditional fairy tales, she includes beautiful landscape photographs taken by her son as he joined her on these long walks. Beautifully written and impeccably researched, Maitland has infused new life into tales we've always thought we've known.

Children of the Forest Oct 31 2022 The children of the forest live deep in the roots of an old pine tree. They collect wild mushrooms and blueberries and shelter under toadstools when it rains. They play with the squirrels and frogs, and when fall comes, they collect and prepare food to see them through the long winter, until the warm spring breeze starts to blow. A mini gift edition of Elsa Beskow's classic story.

Song of the Forest May 26 2022 The Soviets are often viewed as insatiable industrialists who saw nature as a force to be tamed and exploited. Song of the Forest counters this assumption, uncovering significant evidence of Soviet conservation efforts in forestry, particularly under Josef Stalin. In his compelling study, Stephen Brain profiles the leading Soviet-era conservationists, agencies, and administrators, and their efforts to formulate forest policy despite powerful ideological differences. By the time of the revolution of 1905, modern Russian forestry science had developed an influential romantic strand, especially prevalent in the work of Georgii Morozov, whose theory of "stand types" asked forest managers to consider native species and local conditions when devising plans for regenerating forests. After their rise to power, the Bolsheviks turned their backs on this tradition and adopted German methods, then considered the most advanced in the world, for clear-cutting and replanting of marketable tree types in "artificial forests." Later, when Stalin's Five Year Plan required vast amounts of timber for industrialization, forest radicals proposed "flying management," an exaggerated version of German forestry where large tracts of virgin forest would be clear-cut. Opponents who still upheld Morozov's vision favored a conservative regenerating approach, and ultimately triumphed by establishing the world's largest forest preserve. Another radical turn came with the Great Stalin Plan for the Transformation of Nature, implemented in 1948. Narrow "belts" of new forest planted on the vast Russian steppe would block drying winds, provide cool temperatures, trap moisture, and increase crop production. Unfortunately, planters were ordered to follow the misguided methods of the notorious Trofim Lysenko, and the resulting yields were abysmal. But despite Lysenko, agency infighting, and an indifferent peasant workforce, Stalin's forestry bureaus eventually succeeded in winning many environmental concessions from industrial interests. In addition, the visionary teachings of Morozov found new life, ensuring that the forest's song did not fall upon deaf ears.

Masks in the Forest Sep 17 2021 Don these pop-out masks and plunge into make-believe adventures in an enchanted forest. In an enchanted forest of paper, paint, and whimsy, a hapless hunter bumbles after creatures large and small, from a mother fox and her pups to forest giants and vivid birds. Bold illustrations with dream-world colors bring the woodlands to life. Nine pre-cut pop-out masks allow children to act out the story with family and friends. Slipping into the roles of the book's creatures, they can also create delightful tales of their own and lose themselves in a land of make-believe.

Gossip from the Forest Jan 22 2022 Fairytales are one of our earliest and most vital cultural forms, and forests one of our most ancient landscapes. Both evoke a similar sensation in us - we find them beautiful and magical, but also spooky, sometimes horrifying. In this fascinating book, Maitland argues that the two forms are intimately connected: the mysterious secrets and silences, gifts and perils of the forests were both the background and the source of the fairytales made famous by the Grimms and Hans Christian Andersen. Yet both forests and fairy stories are at risk and their loss deprives us of our cultural lifeblood. Maitland visits forests through the seasons, from the exquisite green of a beechwood in spring, to the muffled stillness of a snowy pine wood in winter. She camps with her son Adam, whose beautiful photographs are included in the book; she takes a barefoot walk through Epping Forest with Robert Macfarlane; she walks with a mushroom expert through an oak wood, and with a miner through the Forest of Dean. Maitland ends each chapter with a unique, imaginative re-telling of a fairytale. Written with Maitland's wonderful clarity and conversational grace, Gossip from the Forest is a magical and unique blend of nature writing, history and imaginative fiction.

Fighting for the Forest Feb 29 2020 “Informative, inspiring.” —Kirkus Reviews In an inspiring middle grade nonfiction work, P. O’Connell Pearson tells the story of the Civilian Conservation Corps—one of Franklin Delano Roosevelt’s New Deal projects that helped save a generation of Americans. When Franklin D. Roosevelt took office in March 1933, the United States was on the brink of economic collapse and environmental disaster. Thirty-four days later, the first of over three million impoverished young men was building parks and reclaiming the nation’s forests and farmlands. The Civilian Conservation Corps—FDR’s favorite program and “miracle of inter-agency cooperation”—resulted in the building and/or improvement of hundreds of state and national parks, the restoration of nearly 120 million acre of land, and the planting of some three billion trees—more than half of all the trees ever planted in the United States. *Fighting for the Forest* tells the story of the Civilian Conservation Corp through a close look at Shenandoah National Park in Virginia (the CCC’s first project) and through the personal stories and work of young men around the nation who came of age and changed their country for the better working in Roosevelt’s Tree Army.

Daughter of the Forest Aug 29 2022 A magnificent saga set in the Celtic twilight of 10th century Ireland, when myth was law and magic was a power of nature, brilliantly brought to life: the legendary story of an evil stepmother opposed by a seventh child.
