International Handbook of Research in Professional and Practice-based Learning Oct 07 2020 The International Handbook of Research in Professional and Practice-based Learning discusses what constitutes professionalism, examines the concepts and practices of professional and practice-based learning, including associated research traditions and educational provisions. It also explores professional learning in institutions of higher and vocational education as well the practice settings where professionals work and learn, focusing on both initial and ongoing development and how that learning is assessed. The Handbook features research from expert contributors in education, studies of the professions, and accounts of research methodologies from a range of informing disciplines. It is organized in two parts. The first part sets out conceptions of professionalism at work, how professions, work and learning can be understood, and examines the kinds of institutional practices organized for developing occupational capacities. The second part focuses

on procedural issues associated with learning for and through professional practice, and how assessment of professional capacities might progress. The key premise of this Handbook is that during both initial and ongoing professional development, individual learning processes are influenced and shaped through their professional environment and practices. Moreover, in turn, the practice and processes of learning through practice are shaped by their development, all of which are required to be understood through a range of research orientations, methods and findings. This Handbook will appeal to academics working in fields of professional practice, including those who are concerned about developing these capacities in their students. In addition, students and research students will also find this Handbook a key reference resource to the field.
Heroes Mar 24 2022 Francis Joseph Cassavant is 18. He has just returned home from the Second World War, and he has no face. He does have a gun and a mission: to murder his childhood hero. Francis lost most of his face when he fell on a grenade in France. He received the Silver Star for bravery, but was it really an act of heroism? Now, having survived, he is looking for a man he

once admired and respected, a man adored by many people, a man who also received a Silver Star for bravery. A man who destroyed Francis's life.

The Social Psychology of the Primary School Oct 19 2021 Colin Rogers and Peter Kutnick reassess the role of social psychology in educational practice for the primary classroom. They offer an analysis of the ways in which the process and structure of classroom life affect the interpersonal and academic outcomes of schooling. Social schooling is seen to have a crucial role to play in achieving effective teaching and meaningful learning, while promoting other useful developments in the primary classroom. The authors study classroom interaction and relationships and consider how these might be structured for the best outcomes. With so much attention being focused recently on the National Curriculum, the authors provide a balance for the current curricula-orientated view of teaching by improving understanding of how curricula are implemented in the classroom. Motivation and the social development of primary age children are covered as well as relationships and social interaction in the classroom, gender and special educational needs.

How Learning Works Sep 29 2022 Praise for How Learning Works "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of

chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, *e-Learning and the Science of Instruction*; and author, *Multimedia Learning Exploring Implicit Cognition: Learning, Memory, and Social Cognitive Processes* Dec 09 2020

While widely studied, the capacity of the human mind remains largely unexplored. As such, researchers are continually seeking ways to understand the brain, its function, and its impact on human behavior. *Exploring Implicit Cognition: Learning, Memory, and Social Cognitive Processes* explores research surrounding the ways in which an individual's unconscious is able to influence and impact that person's behavior without their awareness. Focusing on topics pertaining to social cognition and the unconscious process, this title is ideal for use by students, researchers, psychologists, and academicians interested in the latest insights into implicit cognition.

The Everyday Impact of Economic Reform in China Apr 12 2021 During the past 30 years, China has undergone extensive economic reform, replacing the government's administration of enterprises with increasing levels of market-oriented enterprise autonomy.

At the heart of the reform are changes in the employment relationship, where state control has been superseded by market relationships. These reforms have had far-reaching implications for many aspects of everyday life in Chinese society. This book appraises the impact of the economic reforms on the employment relationship and, in turn, examines the effects on individual workers and their families, including salaries, working conditions and satisfaction, job security and disparities based on location, gender, age, skill, position and migrant status. In particular, it focuses on how changes in the employment relationship have affected the livelihood strategies of households. It explores the changing human resource management practices and employment relations in different types of enterprises: including State-Owned Enterprises, Foreign-Owned Enterprises and Domestic Private Enterprises; throughout different industries, focusing especially on textiles, clothing and footwear and the electronics industry; and in different regions and cities within China (Beijing, Haerbin, Lanzhou, Hangzhou, Wuhan and Kunming). Overall, this book provides a detailed account of the everyday implications of economic reform for individuals and families in China.

Research for the Radiation Therapist May 14 2021 This book addresses a wide range of topics, from the principles of evidence-based practice to the process and dissemination of research to unique considerations such as clinical trials, patenting, and health services research. The case for evidence-based practice and a collaborative research culture is made first, followed by a series of chapters walking the reader through the research process by way of the scientific method. One of the more unique aspects of the scope of this book is the inclusion of chapters relating to the dissemination of knowledge, manuscript publication, and how to build an academic research program. Each chapter focuses on introducing the reader to foundational principles, methodology, and terminology, and highlight case studies of radiation therapist research or experience that is relevant to provide contextual examples and inspiration to the reader.

development and will help your students to stand out from the crowd, both during their studies and when applying for jobs. It supports students in the development of key organisational and interpersonal skills, including time management, teamwork and leadership, through activities and reflective tasks. It also provides practical guidance on developing vital entrepreneurial attributes, such as critical thinking and problem solving, and articulating these skills to prospective employers. This text is an essential resource for all students looking to develop the skills, experience and attributes which are desired by today's employers. It is also ideal for students on personal development planning and employability modules across all disciplines and levels.

EBOOK: Learning Disability Jan 10 2021 "The editors have brought together a range of eminent contributors who present a range of issues throughout the life cycle. The book asserts that it hopes to 'assist readers to anticipate change and discontinuity in people's lives and think about strategies to support them' through the many challenges that they may face in their lives. In my view this book certainly does that and the editors and contributors are to be congratulated on the production of a relevant and contemporary text that I have no hesitation in both endorsing and recommending to all involved in supporting and or caring for people with learning disabilities." Professor Bob Gates, Project Leader - Learning Disabilities Workforce Development, NHS Education South Central, UK "The editors have gathered an authoritative faculty to present and discuss a range of contemporary issues; both practical and ethical. The text is well grounded in the lived experience of people with disability and draws on the evidence-base of contemporary science. Each chapter includes thought provoking exercises. This is a seminal text for students and practitioners, researchers and policy makers." Associate Professor Keith R. McVilly, Deakin University, Australia "I currently own a copy of the first edition and it has proved an invaluable resource time and time again. There is not an essay I complete that does not make reference to the book and I can consistently use it to reflect back on my practice as a student nurse and social worker. Having read several extracts from

the new edition it does appear to include very high quality content covering learning disabilities over the lifespan ... if I were to personally recommend any book for budding or current learning disability professionals then this would be it." James Grainger, Student Nurse/Social Worker, Sheffield Hallam University, UK "I like the way it has primary and secondary information from a range of sources. The exercises in the book also get you to think about the situation in question which helps us think about our values and anti-oppressive practice ... This book really does start with the basics and having a learning disability from birth and the effects, to in depth knowledge and literature ... This book would be very helpful to me as it brings in literature policies and models from both a health and social side, which is important for my course and collaborative working." Laura Jean Lowe, Student Nurse, Sheffield Hallam University, UK "It is written with a clearly conveyed in-depth knowledge and in a way that has professional lived experience within the context of the work. The authors have taken into account the emotional, client-centred approach to the modern practitioner's practice ... The book gives a true wealth of good practice scenarios that can only help practitioners be good at what they do and aspire to be." Lee Marshall, Student Nurse, Sheffield Hallam University, UK With its spread of chapters covering key issues across the life cycle this text has established itself as the foundational primer for those studying the lived experiences of people with learning disabilities and their families, and outcomes achieved through services and support systems. Recognising learning disability as a lifelong disability, this accessible book is structured around the life cycle. The second edition is refreshed and expanded to include seven new chapters, covering: Aetiology Breaking news (about disability) and early intervention Transition to adulthood The sexual lives of women Employment Personalisation People with hidden identities With contributions from respected figures from a range of disciplines, the book draws heavily upon multidisciplinary perspectives and is based on the latest research and evidence for practice. The text is informed by medical, social and legal models of learning

disability, exploring how "learning disability" is produced, reproduced and understood. Extensive use is made of real-life case studies, designed to bring theory, values, policy and practice to life. Narrative chapters describe, in the words of people with learning disabilities themselves, their lives and aspirations. They helpfully show readers the kinds of roles played by families, advocates and services in supporting people with learning disabilities. New exercises and questions have been added to encourage discussion and reflection on practice. Learning Disability is core reading for students entering health and social care professions to work with people with learning disabilities. It is a compelling reference text for practitioners as it squarely addresses the challenges facing people with learning disability, their loved ones and the people supporting them. Teaching Smarter Nov 27 2019 This refreshingly frank handbook shows teachers how to close the achievement gap in their classrooms by teaching students innovative paths to academic success. Drawing on over 20 years' experience, Kelley presents straightforward strategies for helping learners improve their grades and test scores and experience greater school engagement—all while streamlining the teacher's work to yield maximum efficiency. Strategies include team-grading essays, using Socratic seminars and sworn statements, allowing for re-dos, and ruthlessly pruning assignments, among others. Often humorous and irreverent in tone, this guide will be the talk of the break room. Includes online digital content.

Secondary School Teaching Jan 22 2022 This volume seeks to integrate for the prospective teacher still in college and for the teacher in service the best theory and practice of recent developments with the best of practices long used by superior teachers. It seeks to blend the theoretical and the practical in an effective manner. There are three principles guiding secondary education: guidance is a vital part of teaching, individualized instruction is emphasized, and the curriculum is expressed in the unit idea.

Studies of Work and the Workplace in HCI Apr 24 2022 This book has two purposes. First, to introduce the study of work and the workplace as a method for informing the design of computer systems to be used at work. We primarily focus on the predominant way in which the organization of work has been approached within the field of human-computer interaction (HCI), which is from the perspective of ethnomethodology. We locate studies of work in HCI within its intellectual antecedents, and describe paradigmatic examples and case studies. Second, we hope to provide those who are intending to conduct the type of fieldwork that studies of work and the workplace draw off with suggestions as to how they can go about their own work of developing observations about the settings they encounter. These suggestions take the form of a set of maxims that we have found useful while conducting the studies we have been involved in. We draw from our own fieldwork notes in order to illustrate these maxims. In addition we also offer some homilies about how to make observations; again, these

Place and Professional Practice May 26 2022

This book presents the first single comprehensive analysis of the scope of geographical realities and relevance in health care work. Conceptually, the book conveys how space, place and geographical ideas matter to clinical practice, from the historical beginnings of professional roles and responsibilities in medicine to the present day. In 8 chapters, the book covers healthcare work across a range of job types (including physician, nurse, and multiple technical and therapeutic roles in multiple specialties), and across a range of scales (focusing on global issues and trends, national and regional particularities, urban and rural issues, institutional environments and various community settings). This book is intended for students, teachers, and researchers in geography, social science and various health sciences. Chapter 1 examines how geographical ideas have been central to practitioners' thinking and practice over time. Chapter 2 reviews the scope of contemporary geographical study of health care work. Chapter 3 presents an empirical case study of the geographies in hospital-based ward work. Chapter 4 presents an empirical case study of the geographies in ambulance/rapid response work. Chapter 5 presents a case study of the geographies associated with a high profile case of criminality and neglect in practice. Chapter 6 considers concepts and the geographies in person-centred care. Chapter 7 considers concepts and the geographies in skills attainment.

Understanding Social Work Research Dec 29 2019 Social work students need to understand the relationship between research, knowledge and practice to be effective practitioners. In the second edition of this highly regarded book, Hugh McLaughlin shows how a research-minded perspective and an appreciation of evidence-based practice can lead students to achieve the highest level of individual and collective social work practice. Topics covered include: - How to assess, appraise and apply research - The philosophy of research - Improving the use of research in practice - Interdisciplinary contributions to social work and social work research Providing reflexive questions, practice examples and suggested reading throughout, this book is essential reading for all undergraduate students of social work. It will also be valuable reading for postgraduates and qualified social workers wishing to consolidate their understanding of social work research.

Mathematics across the Iron Curtain Jun 22 2019 The theory of semigroups is a relatively young branch of mathematics, with most of the major results having appeared after the Second World War. This book describes the evolution of (algebraic) semigroup theory from its earliest origins to the establishment of a full-fledged theory. Semigroup theory might be termed 'Cold War mathematics' because of the time during which it developed. There were thriving schools on both sides of the Iron Curtain, although the two sides were not always able to communicate with each other, or even gain access to the other's publications. A major theme of this book is the comparison of the approaches to the subject of mathematicians in East and West, and the study of the extent to which contact between the two sides was possible.

Work Meets Life Mar 31 2020 Work as fundamental to life, explored at different levels of organization from the perspectives of a variety of biological and nonbiological disciplines. The work performed by living systems ranges from photosynthesis to prodigious feats of computation and organization. This multidisciplinary volume explores the relationships between work and the study of work across many different levels of organization. By addressing how work gets done, and why, from the perspectives of a range of disciplines, including cell and evolutionary biology, neuroscience, psychology, electrical and computer engineering, and design, the volume sets out to establish an integrative approach to the study of work. Chapters introduce the biological work of producing energy in the cell; establish inherent tradeoffs between energy and information in neural systems; relate principles of integrated circuit manufacture to work in biological systems; explore the work of photosynthesis; investigate how work shapes organisms' evolutionary niches; consider the human work of design; describe the effects of job satisfaction and dissatisfaction on work-life balance; and address the effects of environmental challenges (stress) on how humans and animals do work. Finally, editors and contributors draw these studies together and point to future developments. Contributors Alan Blackwell, Gillian Brown, Christina De La Rocha, Kevin Laland, Simon Laughlin, Robert Levin, Michael Lightner, Steven Maier, Joseph Rosse, Stacy Saturay

Advancing Research Methodology in the African Context Aug 24 2019 This volume of Research Methodology in Strategy and Management reflects a diversity of Africa-born authors in the mainland and diaspora, as well as non-Africans whose research focus on Africa, it offers high impact research that makes a major contribution in advancing management education and knowledge in Africa.

A Decade of Research on School Principals Feb 08 2021 This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries. Each of these directions has its own particular cultural, educational and policy history. Taken together, the various chapters in the volume provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals, and their contributions to the improvement of teaching and the learning and achievement of students. The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country. This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students' progress and achievement and to promote equity and social justice.
