An Outsider's Guide to Humans Dec 30 2019 An instruction manual for life, love, and relationships by a brilliant young scientist whose Asperger's syndrome allows her--and us--to see ourselves in a different way...and to be better at being human Diagnosed with Autism Spectrum Disorder at the age of eight, Camilla Pang struggled to understand the world around her. Desperate for a solution, she asked her mother if there was an instruction manual for humans that she could consult. With no blueprint to life, Pang began to create her own, using the language she understands best: science. That lifelong project eventually resulted in *An Outsider's Guide to Humans*, an original and incisive exploration of human nature and the strangeness of social norms, written from the outside looking in--which is helpful to even the most neurotypical thinker. Camilla Pang uses a set of scientific principles to examine life's everyday interactions: - How machine learning can help us sift through data and make more rational decisions - How proteins form strong bonds, and what they teach us about embracing individual differences to form diverse groups - Why understanding thermodynamics is the key to seeking balance over seeking perfection - How prisms refracting light can keep us from getting overwhelmed by our fears and anxieties, breaking them into manageable and separate "wavelengths" Pang's unique perspective of the world tells us so much about ourselves--who we are and why we do the things we do--and is a fascinating guide to living a happier and more connected life.

The Compassionate Brain Dec 22 2021 Here is the ultimate explanation of the brain for everyone who thinks: a guide to how the brain works, how our brains came to operate the way they do, and, most important, how to use your precious gray matter to its full capacity. The brain, according to current research, is not some kind of automatic machine that works independently of its user. In fact, the circuitry of the brain actually changes according to how one uses it. Our brains are continuously developing new capacities and refinements—or losing them, depending upon how we use them. Gerald Hüther takes us on a fascinating tour of the brain's development—from one-celled organisms to worms, moles, apes, and on to us humans—showing how we truly are what we think: our behavior directly affects our brain capacity. And the behavior that promotes the fullest development of the brain is behavior that balances emotion and intellect, dependence and autonomy, openness and focus, and ultimately expresses itself in such virtues as truthfulness, considerateness, sincerity, humility, and love. Hüther's user's-manual approach is humorous and engaging, with a minimum of technical language, yet the book's message is profound: the fundamental nature of our brains and nervous systems naturally leads to our continued growth in intelligence and humanity.

How Everything Can Collapse Jan 29 2020 What if our civilization were to collapse? Not many centuries into the future, but in our own lifetimes? Most people recognize that we face huge challenges today, from climate change and its potentially catastrophic consequences to a plethora of socio-political problems, but we find it hard to face up to the very real possibility that these crises could produce a collapse of our entire civilization. Yet we now have a great deal of evidence to suggest that we are up against growing systemic instabilities that pose a serious threat to the capacity of human populations to maintain themselves in a sustainable environment. In this important book, Pablo Servigne and Raphaël Stevens confront these issues head-on. They examine the scientific evidence and show how its findings, often presented in a detached and abstract way, are connected to people's ordinary experiences – joining the dots, as it were, between the Anthropocene and our everyday lives. In so doing they provide a valuable guide that will help everyone make sense of the new and potentially catastrophic situation in which we now find ourselves. Today, utopia has changed sides: it is the utopians who believe that everything can continue as before, while realists put their energy into making a transition and building local resilience. Collapse is the horizon of our generation. But collapse is not the end – it's the beginning of our future. We will reinvent new ways of living in the world and being attentive to ourselves, to other human beings and to all our fellow creatures.

Invited to self-construct as “girls online,” vloggers, bloggers and influencers sign a devil's bargain: a platform on the condition they commodify themselves, eternally youthful, cute and responsibility-free, hiding offline domestic, professional and emotional labour while paying for their online presence with “accounts” of personal “experience.” Told via the arresting personal narrative of one woman negotiating the (cyber)space between her identities as girl, mother, writer, and commodified online persona, Girl Online is written in a plethora of the online styles, from programming language to the blog/diary, from tweets to lyric prose, taking in selfies, social media, celebrity and Cyberfeminism.
