Lessons in the Rearview Mirror Apr 25 2022 An ordained minister, Phil J. Baker is founder and CEO of Hosea 4:6 Ministries, which is dedicated to exhorting Christians to learn about the Bible, American history, church history, and current events and to become active in the political and cultural issues of America. He retired in April of 2008 after almost 30 years in the newspaper industry to pursue full-time ministry. A 1977 graduate of Tennessee Technological University in Cookeville, Tenn., Phil has garnered numerous writing awards through the Alabama Press Association and has also been recognized for his writing by the Alabama Medical Association and the Alabama Association of School Boards. He was a 2003 finalist in the Amy Foundation national awards for religious columns. Phil and Sandra, his wife of 28 years, have two grown daughters. Katie is a graduate student at the University of Montevallo in Alabama. Shelly and her husband Michael live in Nashville, Tenn., where Michael is youth minister at Christ Church in Brentwood, and Shelly works in the Spanish ministry and tries to keep up with their 2-year-old daughter, Nadia. "Phil Baker's life is one that so many of us baby boomers can identify with. His life experiences, like ours, are both joyful and painful. Phil has the God-given gift of being able to take his "rear-view mirror" experiences and turn them into practical road maps for his own life as well as our own. Superb!" - Daniel A. Moore, nationally known sports artist and author "Lessons in the Rear View Mirror" is a powerful book that drives home the realities of the gospel. This book is great for a sit-down read or to be used as a daily devotional. Phil does an amazing job communicating the principles of scripture, in a real life way. - Keith Hodges, pastor of Liberty Church, Arab, AL

Beasts of the Field May 03 2020 Written by one of America's preeminent labor historians, this book is the definitive account of one of the most spectacular, captivating, complex and strangely neglected stories in Western history--the emergence of migratory farmworkers and the development of California agriculture. Street has systematically worked his way through a mountain of archival materials--more than 500 manuscript collections, scattered in 22 states, including Spain and Mexico--to follow the farmworker story from its beginnings on Spanish missions into the second decade of the twentieth century. The result is a comprehensive tour de force. Scene by scene, the epic narrative clarifies and breathes new life into a controversial and instructive saga long surrounded by myth, conjecture, and scholarly neglect. With its panoramic view spanning 144 years and moving from the US-Mexico border to Oregon, *Beasts of the Field* reveals diverse patterns of life and labor in the fields that varied among different crops, regions, time periods, and racial and ethnic groups. Enormous in scope, packed with surprising twists and turns, and devastating in impact, this compelling, revelatory work of American social history will inform generations to come of the history of California and the nation.

Lessons for Extending Place Value Jan 29 2020 "Through games, investigations, and children's literature, students explore the base ten system through the ten thousands, moving from using concrete manipulatives to more abstract reasoning. Using addition, subtraction, multiplication, and division, students apply their knowledge of place value to solve a variety of problems."--pub. desc.

Math Lessons for a Living Education Level 1 Sep 30 2022 Have you ever noticed that we tend to compartmentalize when teaching our children? In real life, there aren't artificial barriers between "subjects." For example, when you are cooking or baking, you have to use the skills of reading, logical thinking, and measuring, just to name a few. In driving a car, you see and read road signs, read maps, and count miles. It has become quite clear that there is an abundance of math curriculums available that are nothing but monotonous drill sheets dressed up in pretty colors. Pretty colors do not make a living book. Content, story, and the ability to show math in real life make a living math book. **Math Level 1: Teach math lessons through the creative means of a life story** Provides a link for the downloadable answer key Has a scope and sequence that contains learning numbers 0 to 100, circles and patterns, counting and addition, days of the week, and telling time. This book was written to be used by you and your young student together. It is the story of a twin brother and sister, Charlie and Charlotte, who are visiting their grandparents' farm. They soon learn that the farm is full of learning opportunities! As you read their story, your students will be drawn into the adventure along with the twins. They will learn about numbers, shapes, place value, adding, and subtracting. They will also learn about gardening, baby animals on the farm, nature, and the love of family. They will hear exciting stories from Grandpa and Grandma, and they will be invited to join the twins on their living math adventures. We hope you have a grand time on this adventure!
