Life-span Development Dec 13 2020 This thorough revision of the highly successful first edition of **Life-Span Development** offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

Getting Ready for Benjamin Mar 04 2020 This book argues that issues of sexual diversity are inextricably interwoven into the basic concerns of pre-service teacher education. How do we make our students aware of assumptions regarding masculinity, femininity, and sexuality that arise from what is presented, represented, or omitted from curricula and classroom practice? What do we say about homophobia and heterosexism as we anticipate the administrative hierarchies, school cultures, parent and community politics they will encounter as teachers? What special challenges might face a teacher (straight or gay) who discusses sexual orientation in a high school classroom, or responds to a homophobic remark in the hallway or the cafeteria? How should we prepare a teacher for a parent conference with two moms or two dads? The essays in this volume range from an analysis of gay stereotypes in teacher education textbooks, to a discussion of queer multiculturalism, to personal accounts by lesbian and gay teacher educators and heterosexual allies who are challenging homophobia and heterosexism in their own classrooms and programs. All agree that education for sexual diversity is as important as education about all other forms of difference, and that future teachers need to know how to create safe spaces for lesbian and gay students, along with the children of gay families who are increasingly a part of the classroom landscape.
