[Everyday Mathematics for Parents](#) Apr 26 2022 The Everyday Mathematics (EM) program was developed by the University of Chicago School Mathematics Project (UCSMP) and is now used in more than 185,000 classrooms by almost three million students. Its research-based learning delivers the kinds of results

that all school districts aspire to. Yet despite that tremendous success, EM often leaves parents perplexed. Learning is accomplished not through rote memorization, but by actually engaging in real-life math tasks. The curriculum isn't linear, but rather spirals back and forth, weaving concepts in and out of lessons that build overall understanding and long-term retention. It's no wonder that many parents have difficulty navigating this innovative mathematical and pedagogic terrain. Now help is here. Inspired by UCSMP's firsthand experiences with parents and teachers, Everyday Mathematics for Parents will equip parents with an understanding of EM and enable them to help their children with homework—the heart of the great parental adventure of ensuring that children become mathematically proficient. Featuring accessible explanations of the research-based philosophy and design of the program, and insights into the strengths of EM, this little book provides the big-picture information that parents need. Clear descriptions of how and why this approach is different are paired with illustrative tables that underscore the unique attributes of EM. Detailed guidance for assisting students with homework includes explanations of the key EM concepts that underlie each assignment. Resources for helping students practice math more at home also provide an understanding of the long-term utility of EM. Easy to use, yet jam-packed with knowledge

and helpful tips, Everyday Mathematics for Parents will become a pocket mentor to parents and teachers new to EM who are ready to step up and help children succeed. With this book in hand, you'll finally understand that while this may not be the way that you learned math, it's actually much better.

Globalisation and Historiography of National Leaders Sep 27 2019

Globalisation and Historiography of National Leaders: Symbolic Representations in School Textbooks, the 18th book in the 24-volume book series Globalisation, Comparative Education and Policy Research, explores the interrelationship between ideology, national identity, national history and historical heroes, setting it in a global context. Based on this focus, the chapters represent hand-picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes, and draw upon recent studies in the areas of globalisation, history textbooks, and national leaders. A number of researchers have written on the importance of teaching national history in order to foster national identity and a sense of belonging to a certain society, state, and people among the younger generation. Some nations prefer to create national heroes out of their political leaders who are still in power, and whose lives and reputation are portrayed as being eminently spotless. Using diverse comparative education paradigms from critical theory, social semiotics, and historical-comparative research, the

authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization (or silencing) of the preferred national heroes. They provide an informed critique of various historical narratives depicting national leaders and national heroes. The book provides an easily accessible, practical yet scholarly source of information on international concerns in the field of globalisation, history education and policy research. Offering an essential sourcebook of ideas for researchers, history educators, practitioners and policymakers in the fields of globalisation and history education, it also provides a timely overview of current changes in politically correct history education narratives in history textbooks.
