# Strange and Non-Strange D-meson Production in pp, p-Pb, and Pb-Pb Collisions with ALICE at the LHC JARQ. Clark County Flood Control Master Plan Movies, Cricket & Politics

SouthEast Asian Affairs 2020

Oct 11 2020

**Africa Yearbook** Sep 21 2021

The Africa Yearbook is a reliable source of reference covering major domestic political developments, the foreign policy and socio-economic trends of all sub-Saharan states - all related to developments in one calendar year.

## **The Applications of New Multi-Locus GWAS**

### **Methodologies in the Genetic Dissection of**

**Complex Traits** Nov 04 2022

Genome-Wide Association Studies (GWAS) are widely used in the genetic dissection of complex traits. Most existing methods are based on single-marker association in genome-wide scans with population structure and polygenic background controls. To

control the false positive rate,

**Contests of the False  
Newspaper Shortlist  
Candidate For Ndf Free  
Download Pdf**

the Bonferroni correction for multiple tests is frequently adopted. This stringent correction results in the exclusion of important loci, especially for GWAS in crop genetics. To address this issue, multi-locus GWAS methodologies have been recommended, i.e., FASTmrEMMA, ISIS EMBLASSO, mrMLM, FASTmrMLM, pLARmEB, pKWmEB and FarmCPU. In this Research Topic, our purpose is to clarify some important issues in the application of multi-locus GWAS methods. Here we discuss the following subjects: First, we discuss the advantages of new multi-locus GWAS methods over the widely-used single-locus GWAS methods in the genetic dissection of complex traits, metabolites and gene expression levels. Secondly,

Download Pdf

large experiment error in the field measurement of phenotypic values for complex traits in crop genetics results in relatively large P-values in GWAS, indicating the existence of small number of significantly associated SNPs. To solve this issue, a less stringent P-value critical value is often adopted, i.e., 0.001, 0.0001 and  $1/m$  ( $m$  is the number of markers). Although lowering the stringency with which an association is made could identify more hits, confidence in these hits would significantly drop. In this Research Topic we propose a new threshold of significant QTN ( $LOD=3.0$  or  $P\text{-value}=2.0e-4$ ) in multi-locus GWAS to balance high power and low false positive rate. Thirdly, heritability missing in GWAS is a common phenomenon, and a series of scientists have explained the reasons why the heritability is missing. In this Research Topic, we also add one additional reason and propose the joint use of several GWAS methodologies to capture more QTNs. Thus, overall estimated

[Addis. Free News on

heritability would be increased. Finally, we discuss how to select and use these multi-locus GWAS methods.

### **Searches for CP Violation in Charmed Meson Decays**

Oct 23 2021 Our current understanding of the fundamental building blocks of the Universe, summarised by the Standard Model of particle physics, is incomplete. For example, it fails to explain why we do not see equal, or almost equal, numbers of particles and their antiparticle partners. To explain this asymmetry requires, among other effects, a mechanism known as charge-parity (CP) violation that causes differences between the rates at which particles and antiparticles decay. CP violation is seen in systems containing bottom and strange quarks, but not in those with up, charm or top quarks. This thesis describes searches for particle-antiparticle asymmetries in the decay rates of charmed mesons. No evidence of CP violation is found. With current

sensitivities, an asymmetry [Access Free  
oldredlist.iucnredlist.org  
on December 5, 2022 Free  
Download Pdf](#)

large enough to observe probably could not be explained by the Standard Model. Instead an explanation could come from new physics, for example contributions from supersymmetric or other undiscovered heavy particles. In the thesis, the development of new techniques to search for these asymmetries is described. They are applied to data from the LHCb experiment at CERN to make precise measurements of asymmetries in the  $D^+ \rightarrow K^+ K^+ \pi^+$  decay channel. This is the most promising charged D decay for CP violation searches.

International Review of Cytology Apr 28 2022

International Review of Cytology presents current advances and comprehensive reviews in cell biology-both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth.

**Political Handbook of the World 2018-2019** Oct 30

2019 The Political Handbook of the World provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2018-2019 edition will continue to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup.

Compiling in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. It also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. This comprehensive

**Searching for New Physics in  $b \rightarrow sl+l-$  Transitions at the LHCb Experiment** Sep 09 2020 This thesis presents two analyses of semileptonic  $b \rightarrow sl+l-$  decays using Flavour Changing Neutral Currents (FCNCs) to test for the presence of new physics and lepton flavour universality, and the equality of couplings for different leptons, which on the basis of experimental evidence is assumed to hold in the Standard Model, free from uncertainties as a result of knowledge of the hadronic matrix elements. It also includes the angular analysis of  $\Lambda_b \rightarrow \Lambda \mu \mu$  decay and the  $R_{K^*}$  measurement, both of which are first measurements, not yet performed by any other experiment.

**Crafting Parliament in Myanmar's Disciplined Democracy (2011-2021)** Jun 30 2022 This volume offers the most significant analysis of how parliament re-emerged in Myanmar in the span of a post-junta decade (2011-2021).

**Strange and Non-Strange D-meson Production in pp, p-Pb, and Pb-Pb Collisions with ALICE at the LHC** Sep 29 2019 This thesis provides a comprehensive view of the physics of charmed hadrons in high-energy proton-proton and heavy-ion collisions. Given their large masses, charm quarks are produced in the early stage of a heavy-ion collision and they subsequently experience the full system evolution probing the colour-

deconfined medium called quark-gluon plasma (QGP) created in such collisions. In this thesis, the mechanisms of charm-quark in-medium energy loss and hadronisation are discussed via the measurements of the production of charm mesons with (Ds+) and without (D+) strange-quark content in different colliding systems, using data collected by the ALICE experiment at the CERN LHC. The participation of the charm quark and its possible thermalisation in the QGP are studied via measurements of azimuthal anisotropies in the production of D+ mesons. Finally, the prospects for future measurements with the upgraded ALICE experimental apparatus and with more refined machine learning techniques are presented.

collected at center of mass energies near 10.58 GeV with the BABAR detector at the PEP-II  $e^+e^-$  collider at SLAC. The number of  $D_s^-\rightarrow DKX\gamma$  mesons is determined by reconstructing the recoiling system  $DKX\gamma$  in events of the type  $e^+e^-\rightarrow DKX\gamma$ , where  $D^-\rightarrow \ell^-\bar{\nu}_\ell$  represents additional pions from fragmentation. The  $D^-\rightarrow \ell^-\bar{\nu}_\ell$  events are detected by full or partial reconstruction of the recoiling system  $DKX\gamma$ . The following results are obtained:  $B(D^-\rightarrow \mu^-\bar{\nu}_\mu) = (6.02 \pm 0.38 \pm 0.34) \times 10^{-3}$ ,  $B(D^-\rightarrow \tau^-\bar{\nu}_\tau) = (5.00 \pm 0.35 \pm 0.49) \times 10^{-2}$ , and  $B(D^-\rightarrow e^-\bar{\nu}_e)$

### **Nigeria's 2019 Democratic**

**Experience** Jul 20 2021

Nigeria's democratisation efforts since attaining political independence from Britain have been tumultuous and have spanned over three successive republics. A persistent bug decimating Nigeria's democracy and repeatedly leading to military coups has been brazen electoral violence perpetrated by the nation's political elite. Nigeria's 2019 Democratic Experience analyses and explains what went wrong in Nigeria's experiment with democracy. Nigeria, Africa's most populous nation and the world's seventh most populous nation, also contributes 70% of West Africa's population. She is sub-

Success For Africa's largest oil

producer and has remained Africa's largest economy by GDP since 2014. The country has hundreds of diverse ethnic nationalities and languages grouped into 36 states (or federating units) and an independent federal capital territory. Though recognized as Africa's largest democracy, her democratisation process since the 1960s has remained tumultuous with massive electoral violence and political intolerance. This repeatedly compelled the military to intervene in the nation's political history in the years 1966, 1983 and 1985. It is these developments that provided the motivation for this volume to capture for posterity the conduct of the 2019 General Elections in Nigeria.

key institutions and practices that comprise public policy, administration and governance to investigate how they are changing in the context of increasing Asian influence. Its authors argue that the Asian Century holds the potential to generate a paradigm shift equivalent to the impacts of neo-liberalism and the New Public Management of the late 20th century. Divided into three parts, this volume interrogates the theories underpinning contemporary public policy; explores case studies from different policy arenas across the Asian region; and imagines what a future of globalised public policy might look like. It examines the implementation measures necessary to support policy and administration in an era of transnational governance networks, tightly linked economic markets and progressively fluid cultural exchanges. This book provides the concepts and tools necessary to navigate these shifting sands successfully. It is
