## **Lockheed T-33 Thunderbird / Shooting Star Pilot's Flight**

**Operating Manual** Aug 26 2022 The T-33 Thunderbird was the training variant of the U.S. Air Force's first production jet fighter, the F/P-80 Shooting Star. Originally designed by Kelly Johnson during WWII, the P-80 went from drawing board to airborne in a record 150 days! One of the most successful aircraft in history, the T-33 has flown in the air forces of over 30 nations. Over 6500 were produced between 1949-59. Originally printed by Lockheed and the U.S.A.F., this Flight Operating Handbook taught pilots everything they needed to know before entering the cockpit. Classified Restricted, the manual was declassified and is here reprinted in book form. This affordable facsimile has been slightly reformatted. Care has been taken however to preserve the integrity of the text.

**Douglas Skystreak and Skyrocket Flight Operating Manual** Oct

16 2021 The D-558 aircraft were part of a transonic research program originated by NACA and the U.S. Navy. The D-558-1 Skystreak turbojet was designed in 1945 and first flew in 1947 at Muroc. It quickly set a new world speed record of over 650 miles per hour. Although it approached Mach 1.0 in level flight, the Skystreak could only break the speed of sound in a dive. The successor aircraft, the D-558-2 Skyrocket, was equipped with a turbojet and the same rocket system as Bell's X-1. The jet was used for takeoff and landing, and the rockets allowed the aircraft to travel into the transonic zone. The Skyrocket test program began in 1948. In 1953, Scott Crossfield bested that mark and flew into aviation history when he became the first person to reach Mach 2.0 in the plane. Originally printed by the U.S. Navy, NACA and Douglas, this book contains manuals for both of these amazing aircraft.

Originally classified "Restricted", they have been declassified and are here reprinted in book form.
