Yellowstone and the Snowmobile Jun 29 2022
The first scholarly study of winter use in any national park examines the history of the conflict between the National Park Service and various interest groups over snowmobile use in Yellowstone--a highly-politicized, value-driven battle that has taken a serious toll on the NPS's ability to protect the park.

From House Societies to States Jun 17 2021 The organization and characteristics of early and ancient states have become the focus of a renewed interest from archaeologists, ancient historians and anthropologists in recent years. On the one hand, neo-evolutionary schemas of political transformation find it difficult to define some of their most basic concepts, such as 'chiefdom', 'complex chiefdom' and 'state', not to mention the transition between them. On the other hand, teleological interpretations based on linear dynamics, from less to increasingly more complex political structures, in successive steps, impose biased and too rigid views on the available evidence. In fact, recent research stresses the existence of other forms of socio-political organization, less vertically integrated and more heterarchical, that proved highly successful and resilient in the long term in tying together social groups. What is more, such forms quite often represented the basic blocks on which states were built and that managed to survive once states collapsed. Finally, nomadic, maritime and mountain populations provide fascinating examples of societies that experienced alternative forms of political organization, sometimes on a seasonal basis. In other cases, their consideration as 'marginal' populations that cultivated specialized skills ensured them a certain degree of autonomy when living either within or at the borders of states. This book explores such small-scale socio-political organizations, their potential and the historical trajectories they stimulated. A selection of historical case studies from different regions of the world may help rethink current concepts and views about the emergence and organization of political complexity and the mechanisms that prevented, occasionally, the emergence of solid polities. They may also cast some light over trajectories of historical transformation, still poorly understood as are the limits of effective state power. This book explores the importance of comparative research and long-term historical perspectives to avoid simplistic interpretations, based on the characteristics of modern Western states abusively used retrospectively.

From World City to the World in One City Sep 20 2021 Tim Bunnell's book featured in the movie Pulang - the author has recently spoken in several interviews and programmes about how his fascination with the tales of Malay seamen in the UK led to writing this volume: #Showbiz: Sailing into a sea of heartwarming tales | New ... Coming home at last - theSunday.my <https://www.youtube.com/watch?v=eifWYHLz5ok> From World City to the World in One City examines changing geographies of Liverpool through and across the lives of Malay seamen who arrived in the city during its final years as a major imperial port. Draws upon life histories and memories of people who met at the Malay Club in Liverpool until its closure in 2007, to examine changing urban sites and landscapes as well as the city's historically shifting constitutive connections In considering the historical presence of

Malay seamen in Liverpool, draws attention to a group which has previously received only passing mention in historical and geographical studies of both that city, and of multi-ethnic Britain more widely Demonstrates that Liverpool-based Malay men sustained social connections with Southeast Asia long before scholars began to use terms such as 'globalization' or 'transnationalism' Based on a diverse range of empirical data, including interviews with members of the Malay Club in Liverpool and interviews in Southeast Asia, as well as archival and secondary sources Accessibly-written for non-academic audiences interested in the history and urban social geography of Liverpool

Research with High-risk Populations Jan 25 2022 "This book provides in-depth analyses and guidance to social scientists regarding ethical and legal responsibilities that may arise in the course of conducting research with high-risk populations and in responding appropriately to threats of suicide, child abuse, and violence that may arise during the course of data collection. These discussions offer valuable lessons both for researchers who are planning to investigate the etiology of these particular problems and for researchers who may be confronted with similar threats of harm while investigating other health concerns such as HIV/AIDS or substance abuse. Because of the paucity of informed analyses of this critical topic area, researchers now find themselves caught between contradictory assumptions about the nature of the risks involved in descriptive research with populations at risk of violence and other harms. On the one hand, the traditional view has been that descriptive research poses minimal risk, as it is completely unlike medical experiments in which participants are exposed to novel experimental treatments. One common view is that if the research involves merely asking people questions, then the ethical risk of such research is limited to the harms that could emerge if confidential information were to be inadvertently disclosed. On the other hand, research with high-risk populations raises acute and appropriate questions for investigators, institutional review boards (IRBs), and other interested parties about a duty to protect: When or at what point does the threat of harm, such as suicide, child abuse, or violence, warrant overriding confidentiality protections?"--Introduction. Executive Teams in Research-Based Spin-Off Companies Oct 10 2020

Research-based spin-off companies are a special subgroup of new technology-based ventures and play an important role for innovation and economic development. Executive teams of academic spin-offs face several challenges in building up sustainable and profitable ventures, because they often lack managerial and entrepreneurial skills. Based on a quantitative analysis of 193 German spin-offs RigoTietz examines the relationships between executive team characteristics, strategic decision making, and firm performance. The study contributes to the entrepreneurship and strategic management literature and has practical implications for entrepreneurs and managers, policymakers and practitioners of start-up initiatives and technology transfer organisations.

Wisconsin Crime and Arrests Sep 01 2022

Beyond Leading and Managing Jun 25 2019 Beyond Leading and Managing focuses on real life stories and anecdotes about the practice of nursing administration. It highlights key information such as advanced administrative theory, financial decisions, quality control, working with external groups and individuals, planning strategically, and creating new opportunities within the profession. Theory boxes, case studies, and current literature and research located both in the book and on the Evolve website help the reader grasp the key points, remember them and think about the practicality of the content in the real world of leading in healthcare organizations. A brief overview of the chapter helps focus readers and the content builds the base of important information about the topic. Literature boxes pull out and summarize key relevant theories in nursing administration.

Contemplations (questions to ponder about the topic) are included to help readers think about the practicality of the content. Leadership Stories offer actual scenarios of practice from a professional view. Administration certification is included as key content in the text. Evolve website offers web links and current research/literature recommended by the authors. Beyond Leading and Managing is a NEW leadership and management text!

The Transformation of Georgia from 2004 to 2012 Nov 03 2022 How can developing countries become high-income nations? What are the reference points for measuring national development, public leadership and government performance? What is the nexus between public policies and geopolitical, political, emotional, historical, national governance-related, social and cultural norms, forces and factors which shape the process of the state building? This second edition of the book elaborates on many of these critical interconnections, focusing on 9 years after Georgia's Revolution of Roses in November 2003. The book explains what can be accomplished in two electoral terms at a given starting level of GDP per capita and which pitfalls to avoid. It contributes to documenting an almost decade-long history of Georgia.
