[Counseling and Psychotherapy with Children and Adolescents](#) Mar 13 2021 A comprehensive, theory-based approach to working with young clients in both school and clinical settings Counseling and Psychotherapy with Children and Adolescents, Fifth Edition provides mental health professionals and students with state-of-the-art theory and practical guidance for major contemporary psychotherapeutic schools of thought. Children and adolescents are not just small adults; they have their own needs, requirements, and desires, on top of the issues presented by still-developing brains and limited life perspective. Providing care for young clients requires a deep understanding of the interventions and approaches that work alongside growing brains, and the practical skill to change course to align with evolving personalities. The thoroughly revised fifth edition is a comprehensive reference, complete with expert insight. Organized around theory, this book covers both clinical and school settings in the fields of psychology, counseling, and social work. Coverage of the latest thinking and practice includes Cognitive Behavioral, Rational-Emotive, Reality Therapy, Solution Focused, Family Systems, and Play Therapy, providing a complete resource for any mental health expert who works with young people. Understand the major approaches to counseling and psychotherapeutic interventions Discover the ethical and legal implications of working with children and adolescents Learn how to employ culturally responsive counseling with younger clients Examine interventions for children and adolescents with disabilities and health care needs This updated edition includes a stronger emphasis on the clinical application of theory to specific disorders of childhood and adolescence, and new coverage of the legal and ethical issues related to social media. Chapters include a case studies and online resources that make it ideal for classroom use, and new chapters on Solution-Focused Therapy and Play Therapy enhance usefulness to practicing therapists. Expert guidance covers techniques for working with individuals, groups, and parents, and explores the efficacy of the theories under discussion.

The Creative Arts in Counseling Aug 25 2019 This latest edition of The Creative Arts in Counseling is a powerful, evidence-based examination of how creative expression can be used in counseling with clients of various ages and backgrounds. It explores the clinical application of all of the major creative arts, including music, dance/movement, imagery, visual arts, writing/literature, drama, play and humor, and—new to this edition—animal-assisted therapy, therapeutic horticulture, and nature/wilderness experiences. The history, rationale, and theory behind each art form are discussed, in addition to its clinical benefits and uses in counseling settings. Each chapter contains a variety of practical exercises that clinicians, instructors, and students can incorporate immediately into their work, as well as "creative reflections" for personal and professional self-evaluation. The final chapter summarizes the 126 exercises that

appear throughout the text so that readers can quickly access exercises that meet their needs. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here.

Crafts and Creative Media in Therapy Dec 10 2020 For more than 20 years, *Crafts and Creative Media in Therapy*, Fifth Edition has been an illuminating reference for the use of creative approaches in helping clients achieve their therapeutic goals. Carol Crellin Tubbs has included a range of craft and creative activity categories, from paper crafts, to cooking, to the use of recycled materials, and everything in between. Each chapter includes a brief history of the craft, several projects along with suggestions for grading or adapting, examples of related documentation, and a short case study. The text also features chapters on activity analysis, general strategies for implementation of creative activities, and documentation, as well as a chapter describing the relevance of this media from both historical and current occupation-based perspectives. In this updated Fifth Edition, the craft projects have been updated and numerous resources and links for more ideas have been added. There are new chapters on making therapy tools and crafting with a purpose, and the recycled and found materials chapter has been expanded in keeping with cultural trends. A flow chart has been added to each case study to help students better understand the process and rationale for tailoring activities for individual client needs, and project suggestions for working on specific performance skills or client factors are scattered throughout the chapters. Other additions include a behavioral observation checklist as an aid in evaluation and documentation, and several illustrations to help students distinguish between the use of occupation as means and occupation as end. This Fifth Edition also includes an updated instructors' manual with additional resources and suggestions for lesson planning. *Crafts and Creative Media in Therapy*, Fifth Edition not only provides a wide assortment of craft ideas and instructions, but also provides multiple suggestions for therapeutic uses for activities in each category. It includes ways to grade activities to best achieve therapy objectives, and examples of documentation for reimbursement. For each craft category, there is discussion on precautions for use with certain populations, contextual limitations, and safety considerations. Information is presented in several different formats such as examples, tables, illustrations, and other formats to promote student understanding. Instructors in educational settings can visit www.efacultylounge.com for additional material to be used for teaching in the classroom. *Crafts and Creative Media in Therapy*, Fifth Edition is the foremost resource for using creative approaches in helping clients achieve their therapeutic goals and should be used by all occupational therapists, occupational therapy assistants, and recreational therapists.

The Practice of Family Therapy May 03 2020 Now in its fifth edition, The Practice of Family Therapy comes at a time when traditional approaches to psychotherapy have given way to multidimensional strategies that best serve the needs of diverse groups who are grappling with the many challenges unique to family therapy practice. With expanded coverage of different models, along with new developments in evidence-based and postmodern practices, this integrative textbook bridges the gap between science and systemic/relational approaches, as it guides the reader through each stage of family therapy. Part I lays the groundwork by introducing the first-, second-, and third-generation models of family therapy, teaching the reader to integrate different elements from these models into a systemic structure of practice. Part II explores the practical application of these models, including scripts for specific interventions and rich case examples that highlight how to effectively work with diverse client populations. Students will learn how to make connections between individual symptoms and cutting-edge family practices to respond successfully to cases of substance abuse, trauma, grief, depression, suicide risk, violence, LGBTQ families, and severely mentally ill clients and their families. Also included are study guides for each model and a glossary to review main concepts. Aligned with the Association of Marital and Family Therapy Regulatory Boards' (AMFTRB) knowledge and content statements, this textbook will be key reading for graduate students who are preparing for the national licensing exam in marriage and family therapy.

Clinical Casebook of Couple Therapy Apr 01 2020 An ideal supplemental text, this instructive casebook presents in-depth illustrations of treatment based on the most important couple therapy models. An array of leading clinicians offer a window onto how they work with clients grappling with mild and more serious clinical concerns, including conflicts surrounding intimacy, sex, power, and communication; parenting issues; and mental illness. Featuring couples of varying ages, cultural backgrounds, and sexual orientations, the cases shed light on both what works and what doesn't work when treating intimate partners. Each candid case presentation includes engaging comments and discussion questions from the editor. See also *Clinical Handbook of Couple Therapy*, Fourth Edition, also edited by Alan S. Gurman, which provides an authoritative overview of theory and practice.
