Motor-cycling for Women 1928 Nov 03 2020 Betty and Nancy Debenham were a pair of young adventurous lady motorcyclists who entered trials competitions on equal terms with men in the 1920's. Although they were serious motorcyclists they never let this get in the way of their tremendous sense of fun. Their spirit shines through in 'Motor Cycling for Women'. A practical and yet at times eccentric and quirky book from a bye-gone era that will make you smile.

The Digitalization of the 21st Century Supply Chain Feb 24 2020 The goal of this book is to gain a clear picture of the current status and future challenges with regard to the digitalization of the supply chain - from the perspective of the suppliers, the manufacturers, and the customers. They were the target groups of the book. Digitization has touched upon all aspects of businesses, including supply chains. Technologies such as RFID, GPS, and sensors have enabled organizations to transform their existing hybrid (combination of paper-based and IT-supported processes) supply chain structures into more flexible, open, agile, and collaborative digital models. Unlike hybrid supply chain models, which have resulted in rigid organizational structures, unobtainable data, and disjointed relationships with partners, digital supply chains enable business process automation, organizational flexibility, and digital management of corporate assets. In order to reap maximum benefits from digital supply chain models, it is important that companies internalize it as an integral part of the overall business model and organizational structure. Localized disconnected projects and silo-based operations pose a serious threat to competitiveness in an increasingly digital world. The technologies discussed in this text - artificial intelligence, 3D printing, Internet of things, etc. - are beginning to come together to help digitize, automate, integrate, and improve the global supply chains. It's certainly an exciting and challenging time for both new supply chain professionals and long-time supply chain professionals.

Classic Japanese Motorcycle Guide Nov 22 2019 This is the definitive guide to identifying, buying and riding Japanese bikes from the 1960s to the early 1990s, concentrating on mainstream, affordable models from the 'big four': Honda, Kawasaki, Suzuki and Yamaha. Fully illustrated in color throughout, the book provides a brief history of the Japanese motorcycle industry, its post-war rise and displacement of

traditional British, European and American marques. Specific bikes are then grouped and discussed in detail, providing an essential reference for buyers and enthusiasts alike.

Kawasaki Z1, Z/KZ900 & Z/KZ1000 Oct 14 2021 Kawasaki Z1, Z/KZ900 & Z/KZ1000 is for all owners and enthusiasts of the legendary Kawasaki Z1 900, Z/KZ900 and Z1000 built between 1972 and 1980. The book covers the complete restoration of a 1976 KZ900, from the sourcing of the bike to its completion as a fully restored machine. Every area is covered starting with advice on the different models, spares availability, and where best to source a bike to restore. Every area of the restoration is then covered in full detail including the engine, frame, gearbox, wheels, suspension and forks, brakes, ancillaries, bodywork and electrics, accompanied by hundreds of clear color photos to illustrate the text. Additional work on a 1974 Z1A model adds complementary information. What really sets this manual apart, however, is the style in which it is written: not as some dull and distant workshop manual but in a friendly, humorous manner by an enthusiast of many years who is able to involve and entertain the reader, as well as guiding them through the restoration process. This is the third restoration guide from Chris Rooke, whose previous works have been a massive hit with mechanics, enthusiasts and restorers throughout the world.

Book of the Royal Enfield 1946-1962 Oct 22 2019 164 pages, 92 black & white illustrations, size 5.5 x 8.5 inches. Originally published under the title The Book of the Royal Enfield by W.C. Haycraft, this book is one of The Motorcyclist's Library series published in the USA by Floyd Clymer by arrangement with the original publishers Pitman Ltd. of London, England. It includes complete technical data, service and maintenance information and detailed instructions for the repair and overhaul of the major mechanical and electrical components for all Royal Enfield 250cc, 350cc and 500cc single cylinder G, J, J2, Bullet and Clipper models manufactured from 1946 through 1962. There is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete

renovation. Please note that the 1957-1962 unit-construction "Crusader" type models are not covered in this publication. Information for that series of motorcycles is included in the "Second Book of the Royal Enfield" also available from www.VelocePress.com. This publication has been Out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all Royal Enfield motorcycle enthusiasts worldwide.
