**Traditions of the Magi** Apr 05 2020 This volume is intended as a contribution to the history of Zoroastrianism. It attempts to show the diversity of beliefs and practices of ancient Zoroastrianism by analysing and interpreting all classical references to the

religion of the ancient Persians.

**A History of Early Southeast Asia** Aug 10 2020 This comprehensive history provides a fresh interpretation of Southeast Asia from 100 to 1500, when major social and economic developments foundational to modern societies took place on the mainland (Burma, Thailand, Cambodia, and Vietnam) and the island world (Indonesia, Malaysia, and the Philippines). Incorporating the latest archeological evidence and international scholarship, Kenneth R. Hall enlarges upon prior histories of early Southeast Asia that did not venture beyond 1400, extending the study of the region to the Portuguese seizure of Melaka in 1511. Written for a wide audience of non-specialists, the book will be essential reading for all those interested in Asian and world history.

*Real Education* Oct 31 2019 "The most talked-about education book this semester."  
—New York Times From the author of *Coming Apart*, and based on a series of controversial Wall Street Journal op-eds, this landmark manifesto gives voice to what everyone knows about talent, ability, and intelligence but no one wants to admit. With four truths as his framework, Charles Murray, the bestselling coauthor of *The Bell Curve*, sweeps away the hypocrisy, wishful thinking, and upside-down priorities that grip America's educational establishment. •Ability varies. Children differ in their ability to learn, but America's educational system does its best to ignore this. •Half of

the children are below average. Many children cannot learn more than rudimentary reading and math. Yet decades of policies have required schools to divert resources to unattainable goals. •Too many people are going to college. Only a fraction of students struggling to get a degree can profit from education at the college level. •America's future depends on how we educate the academically gifted. It is time to start thinking about the kind of education needed by the young people who will run the country.

Children and Young People's Participation in Disaster Feb 25 2022 Available Open Access under CC-BY-NC licence. Disasters are an increasingly common and complex combination of environmental, social and cultural factors. Yet existing response frameworks and emergency plans tend to homogenise affected populations as 'victims', overlooking the distinctive experience, capacities and skills of children and young people. Drawing on participatory research with more than 550 children internationally,

this book argues for a radical transformation in children's roles and voices in disasters. It shows practitioners, policy-makers and researchers how more child-centred disaster management, that recognises children's capacity to enhance disaster resilience, actually benefits at-risk communities as a whole.

*Theory in Archaeology* Mar 05 2020 *Theory in Archaeology* tackles important questions about the diversity in archaeological theory and practice which face the discipline in the 1990s. What is the relationship between theory and practice? How does 'World' archaeological theory differ from 'European'? Can one be a good practitioner without theory? This unique book brings together contributors from many different countries and continents to provide the first truly global perspective on archaeological theory. They examine the nature of material culture studies and look at problems of ethnicity, regionalism, and nationality. They consider, too, another fundamental of archaeological inquiry: can our research be objective, or must 'the past' always be a relativistic construction? *Theory in Archaeology* is an important book whose authors bring together very different perceptions of the past. Its wide scope and interest will attract an international readership among students and academics alike.

Assessment of Teaching Skills-Written (Secondary) (ATS-Ws) Aug 02 2022

Critical Thinking Skills for Education Students Oct 24 2021 Revised and extended to cover critical reflection and evaluation of information resources, this new edition of Critical Thinking Skills for Education Students is a practical and user-friendly text to help education students develop their understanding of critical analysis. It outlines the skills needed to examine and challenge data and encourages students to adopt this way of thinking to enrich their personal and professional development. The text helps students to develop their self-evaluation skills in order to recognise personal values and perceptions. Critical analysis, modeling, case studies, worked examples and reflective

tasks are used to engage the reader with the text - building both skills and confidence. This book is part of the Study Skills in Education Series. This series addresses key study skills in the context of education courses, helping students identify their weaknesses, increase their confidence and realise their academic potential. Titles in this series are suitable for students on: any course of Initial Teacher Training leading to QTS; a degree in Education or Education Studies; a degree in Early Years or Early Childhood Education; a foundation degree in any education related subject discipline. Lesley-Jane Eales-Reynolds is Pro Vice Chancellor (Education) at Kingston University. Brenda Judge is a Senior Lecturer at Manchester Metropolitan University. Elaine McCreery is Head of Primary, Early Years and Education Studies programmes at Manchester Metropolitan University. Patrick Jones, now retired, was Senior Lecturer in Primary Education at Manchester Metropolitan University.

*Developing Literacy in Preschool* Jan 27 2022 Preschoolers are passionate about learning, and a high-quality preschool program offers rich learning experiences in the areas of language and literacy. This engaging book gives teachers and other professionals fresh ideas, inspiration, and practical tools for integrating age-appropriate literacy instruction into the preschool curriculum. Including helpful vignettes, sample lesson plans, and reproducibles, the book shows how to create a motivating classroom

environment, balance child-initiated exploration with structured activities, and support students' developing skills in reading, writing, speaking, and comprehension. Essential topics include preschool assessment and working with English language learners.

Future-proof CALL: language learning as exploration and encounters – short papers from EUROCALL 2018 Jun 19 2021 The 26th EUROCALL conference was organised by the University of Jyväskylä (JYU) Language Campus and specifically the Language Centre. The theme of this year's conference was 'Future-proof CALL: language learning as exploration and encounters', which reflects an attempt to envision language teaching and learning futures in a changing world. What brought researchers together this year are shared concerns in relation to the sustainability of language learning and teaching in technology-rich contexts that are marked by ever-increasing complexity. The collection of short papers in this volume is a very thorough view into the conference proper exhibiting the complexity and novelty of the field of CALL. There are exciting new openings and a more profound exploration of theoretical underpinnings of the contemporary issues in teaching and learning, cross-cultural communication, mobile learning and the like.

**Delivering Excellence in Health and Social Care** Jan 03 2020 "...this is going to be a very useful book. It provides an authoritative overview of approaches to quality management contextualised to health and social care." - Joe Walsh, Independent Management Consultant, formerly Assistant Director of Social Services at the Royal Borough of Kingston upon Thames "...the author's wealth of knowledge of the public sector is drawn upon to provide an array of interesting and apposite case studies which illustrate his main themes. As a consequence the book will be useful, not only to those who want an academic perspective, but to anyone concerned with improving the service that they provide". - David Fillingham, Director of NHS Modernisation Agency

Many organizations in health and social care are striving to implement the ideas of organizational excellence, performance measurement and process improvement, in the context of a large number of government initiatives including the NHS Plan, Best Value, Clinical Governance and Quality Protects. This book provides a clear explanation of the whole area and includes a wide variety of case studies and examples within health and social care, including the Voluntary Sector. The book gives extensive guidance on the use of the Excellence Model, but it does much more than just describe how to use the Model. It provides practical guidance on how to deliver services focussed on patients and service users, on how organizations can lead, motivate and

involve their staff, on partnerships and user involvement, and the vital area of process improvement. There is also a major section on performance measurement. Written by a senior lecturer at Sheffield Hallam University, who is also a Director of South Yorkshire Excellence, and a member of Trent Regional Health Authority's Modernisation Board, *Delivering Excellence in Health and Social Care* will be of considerable value to managers at all levels in health and social care.

**Curriculum: Construction and Critique** Jul 21 2021 Although curriculum is central to the schooling process, debates about it are rarely well informed. Over the past ten years there has been a dearth of books that have informed the debate by examining curriculum in a broader context, beyond the National Curriculum. Ross, in this refreshing re-examination of the area, opens up a more general debate on how the curriculum is shaped and the compromises made between different ideologies of the nature and purpose of education.

**Surveillance as Social Sorting** Sep 22 2021 Surveillance happens to all of us, everyday, as we walk beneath street cameras, swipe cards, surf the net. Agencies are using increasingly sophisticated computer systems - especially searchable databases - to keep tabs on us at home, work and play. Once the word surveillance was reserved for police activities and intelligence gathering, now it is an unavoidable feature of everyday life. Surveillance as Social Sorting proposes that surveillance is not simply a contemporary threat to individual freedom, but that, more insidiously, it is a powerful means of creating and reinforcing long-term social differences. As practiced today, it is actually a form of social sorting - a means of verifying identities but also of assessing risks and assigning worth. Questions of how categories are constructed therefore become significant ethical and political questions. Bringing together contributions from North America and Europe, Surveillance as Social Sorting offers an innovative approach to the interaction between societies and their technologies. It looks at a number of examples in depth and will be an appropriate source of reference for a wide variety of courses.

**A Reader on the Sanskrit Grammarians** Jul 29 2019 The achievements of P?nini and the Indian grammarians, beginning nearly 2500 years ago, have never been fully appreciated by Western scholars—partly because of the great technical difficulties presented by such an inquiry, and partly because relevant tutorial articles have been confined to obscure and inaccessible publications. This book makes available to linguists and Sanskritists a collection of the most important articles on the Sanskrit grammarians, and provides a connected historical outline of their activities. It covers studies and fragments ranging from early 7th-century accounts of the grammarians—recorded by Buddhist pilgrims from China and Tibet, by Muslim

travelers from the Near East, and by Christian missionaries—to some of the best articles that have appeared during the last century and a half. Chapters in the book cover the foundation of Sanskrit studies in the West laid by British scholars working in India and including the detailed and accurate information provided by Henry Thomas Colebrooke; the linguistic evaluations of Pāṇini by von Schlegel and von Humboldt; the work of Bhandarkar and of Kielhorn; William Dwight Whitney's low evaluation of the "native" grammarians; and the philological work of modern Western, Indian, and Japanese scholars. The editor observes that materials in the Reader reveal problems tackled by the Sanskrit grammarians which closely parallel developments in contemporary linguistics. He has provided historical and linguistic commentary and bibliographic data in the introductions and notes that accompany each selection. Articles are in their original English, German, and French. Texts or passages in Chinese, Tibetan, Arabic, Sanskrit, Latin, and Greek have, for the most part, been translated into English, and all Sanskrit passages have been translated into the Latin alphabet.

**Programming with C++20** May 07 2020 Programming with C++20 teaches programmers with C++ experience the new features of C++20 and how to apply them. It does so by assuming C++11 knowledge. Elements of the standards between C++11

and C++20 will be briefly introduced, if necessary. However, the focus is on teaching the features of C++20. You will start with learning about the so-called big four Concepts, Coroutines, `std::ranges`, and modules. The big four are followed by smaller yet not less important features. You will learn about `std::format`, the new way to format a string in C++. In chapter 6, you will learn about a new operator, the so-called spaceship operator, which makes you write less code. You then will look at various improvements of the language, ensuring more consistency and reducing surprises. You will learn how lambdas improved in C++20 and what new elements you can now pass as non-type template parameters. Your next stop is the improvements to the STL. Of course, you will not end this book without learning about what happened in the `constexpr`-world.

**Counseling for Multiculturalism and Social Justice** Mar 17 2021 In this book, Drs. Ratts and Pedersen combine the very best from the multicultural and social justice traditions into a new paradigm, which will guide counselors toward a deeper understanding of the connections between these two counseling forces. Significantly updated and expanded from the previous edition, this fourth edition focuses on applying multiculturalism and social justice in various clinical settings with diverse client populations. A completely new applications section contains nine chapters on working with oppressed client groups, including African Americans; Asian and Pacific

Islanders; Latin@s; multiracial individuals; Native Americans; lesbian, gay, bisexual, and questioning clients; transgender individuals; women; and socioeconomically disadvantaged clients. Clients experiencing religious and spiritual concerns are discussed as well. Each of the chapters in this section provides an illustrative case study and numerous counseling examples. \*Requests for digital versions from the ACA can be found on wiley.com. \*To request print copies, please visit the ACA website here. \*Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org.

**Images of Canadianness** May 19 2021 Images of Canadianness offers backgrounds and explanations for a series of relevant--if relatively new--features of Canada, from political, cultural, and economic angles. Each of its four sections contains articles written by Canadian and European experts that offer original perspectives on a variety of issues: voting patterns in English-speaking Canada and Quebec; the vitality of French-language communities outside Quebec; the Belgian and Dutch immigration waves to Canada and the resulting Dutch-language immigrant press; major transitions taking place in Nunavut; the media as a tool for self-government for Canada's First

Peoples; attempts by Canadian Indians to negotiate their position in society; the Canada-US relationship; Canada's trade with the EU; and Canada's cultural policy in the light of the information highway.

*Self, No-self, and Salvation* Dec 02 2019 From very early times, the Buddhist intellectuals have made the notion of a self existing over and above the bodily and mental constituents one of their main targets. Their critique first culminates in Vasubandhu's treatise against the Buddhist personalists (early 5th century CE). The eighth-century philosophers Santaraksita and Kamalasila provide another milestone in the history of the mainstream Buddhists' critique of the self and the person: their *Tattvasangraha* (panjika) contains the most learned and elaborate treatment of the subject (at least before Karnakagomin's and Sankaranandana's *Nairatmyasiddhi* monographs). But how have Dignaga and Dharmakirti (6th century [?]) contributed to this heated debate? The present study attempts to answer at least in part this question by offering a monographic account of Dharmakirti's position regarding the self. The book's introduction deals with Dharmakirti's view of the self as the paramount expression of nescience. Chapter 1 is devoted to his critique of the two main expressions of Buddhist substantialism, viz. the Buddha-nature teachings and Personalism (pudgalavada). Chapter 2 presents his way of undermining the non-

Buddhists' arguments in favour of the self. Finally, Chapter 3 provides a detailed account of Dharmakirti's most original contribution on the subject, viz. his demonstration that the (belief in the) existence of a self makes salvation impossible.

**The Problem of Two Truths in Buddhism and Vedānta** Jul 09 2020 It would be a bulky and intricate volume indeed that treated adequately of the problem of two truths in Buddhism and Vedānta: the present volume is slim and unpretentious. Not the less incisive, for that, it is hoped, but certainly neither systematic nor complete, and this in several senses. Not all schools of Buddhism are dealt with: Theravada, Indian Yogacara, and the Logicians are missing among the Indian schools and there is no refer

ence to Chinese and Japanese Buddhism. The Vedanta discussed is only Advaita (non-dualist), and that virtually limited to Sankara. Nor does the volume as a whole take up the problem of two truths thematically, though each paper raises the philosophical questions its author thinks appropriate. The title 'The Problem of Two Truths in Buddhism and Vedanta' promises more than the book itself contains. The reason for this is given in the prefatory 'Note': each chapter is a paper read and discussed at a working conference. All the papers from the conference are here published, and no others. The book has thus the contours dictated by the availability of scholars at the time of the conference.
