New Essays in Political and Social Philosophy Aug 09 2020 Whether it is a result of nature, the consequence of a choice to escape the state of nature, or the outcome of some other process of deliberation, the fact of human association gives rise to recurrent themes in political and social philosophy. The character and requirements of justice, the profile of political legitimacy, and the relationship between the powers of government and the rights of the governed are some of the subjects of ongoing consideration and debate in the disciplines of philosophy, political theory, economics, and law. This volume represents a contribution to the investigation of these issues of perennial interest and import, featuring essays whose authors hope to extend, deepen, and, in some cases, move in new directions, the current state of discussion.

Essays on Philosophy in Australia Jan 26 2022 Philosophy flourished in Australia after the war. There was spectacular growth in both the number of departments and the number of philosophers. On top of this philosophy spread beyond the philosophy departments. Serious studies, and interest in philosophy is now common in faculties as diverse as law, science and education. Neither is this development merely quantitative, the Australian researcher has come of age and contributes widely to international debates. At least one movement originated in Australia. This makes the study of philosophy in Australia timely, evidenced by the number of articles concerned with this area that begin to appear in international journals. In Australia itself there is growing interest in the history of the country's philosophical development. There are discussions in conferences and meetings: the matter is now the subject of courses.

Nineteenth-Century Crime and Punishment Jun 26 2019 This four volume collection looks at the essential issues concerning crime and punishment in the long nineteenth-century. Through the presentation of primary source documents, it explores the development of a modern pattern of crime and a modern system of penal policy and practice, illustrating the shift from eighteenth century patterns of crime (including the clash between rural custom and law) and punishment (unsystematic, selective, public, and body-centred) to nineteenth century patterns of crime (urban, increasing, and a metaphor for social instability and moral decay, before a remarkable late-century crime decline) and punishment (reform-minded, soul-centred, penetrative, uniform and private in application). The first two volumes focus on crime itself and illustrate the role of the criminal courts, the rise and fall of crime, the causes of crime as understood by contemporary investigators, the police ways of 'knowing the criminal,' the role of 'moral panics,' and the definition of the 'criminal classes' and 'habitual offenders'. The final two volumes explore means of punishment and look at the shift from public and bodily punishments to transportation, the rise of the penitentiary, the convict prison system, and the late-century decline in the prison population and loss of faith in the prison.

An Essay on Crimes and Punishments Nov 04 2022 Reprint of the fourth edition, which contains an additional text attributed to Voltaire.

Originally published anonymously in 1764, *Dei Delitti e Delle Pene* was the first systematic study of the principles of crime and punishment.

Infused with the spirit of the Enlightenment, its advocacy of crime prevention and the abolition of torture and capital punishment marked a significant advance in criminological thought, which had changed little since the Middle Ages. It had a profound influence on the development of criminal law in Europe and the United States.

Punishment and Social Control Sep 02 2022 While crime, law, and punishment are subjects that have everyday meanings not very far from their academic representations, "social control" is one of those terms that appear in the sociological discourse without any corresponding everyday usage. This concept has a rather mixed lineage. "After September 11" has become a slogan that conveys all things to all people but carries some very specific implications on interrogation and civil liberties for the future of punishment and social control. The editors hold that the already pliable boundaries between ordinary and political crime will become more unstable; national and global considerations will come closer together; domestic crime control policies will be more influenced by interests of national security; measures to prevent and control international terrorism will cast their reach wider (to financial structures and ideological support); the movements of immigrants, refugees, and asylum seekers will be curtailed and criminalized; taken-for-granted human rights and civil liberties will be restricted. In the midst of these dramatic social changes, hardly anyone will notice the academic field of "punishment and social control" being drawn closer to political matters. Criminology is neither a "pure" academic discipline nor a profession that offers an applied body of knowledge to solve the crime problem. Its historical lineage has left an insistent tension between the drive to understand and the drive to be relevant. While the scope and orientation of this new second edition remain the same, in recognition of the continued growth and diversity of interest in punishment and social control, new chapters have been added and several original chapters have been updated and revised.

[Cesare Beccaria Against Capital Punishment. Presenting and Evaluating his Argument](#) Sep 09 2020 Essay from the year 2015 in the subject Law - Philosophy, History and Sociology of Law, grade: 4.00, Indiana University (College of Arts and Sciences - Political Science Department), course: POLS-Y210 Rule of Law, language: English, abstract: This paper hopes to establish the continued forcefulness of Cesare Beccaria's argument against torture and the death penalty by reconciling its reasoning with the societal and legal context of the modern day. Cesare Beccaria, considered one of the founding fathers of Enlightenment penology and legal theory, is perhaps most well known for his treatise *On Crime and Punishment* in which he argues against punitive administration of torture and capital punishment. This paper analyzes the arguments proposed by Beccaria and reasserts their modern relevance to contemporary legal conversation on the death penalty and government-administered torture. Weaknesses in Beccaria's argument such as his questionably justified causal claims on human behavior are examined, but ultimately found to not render his argument less sound insofar as it seeks to discredit capital punishment. Beccaria's own model of social contract theory is also examined and used as a basis by which to evaluate his legal claims.

Punishment Sep 29 2019 The problem of justifying legal punishment has been at the heart of legal and social philosophy from the very earliest recorded philosophical texts. However, despite several hundred years of debate, philosophers have not reached agreement about how legal punishment can be morally justified. That is the central issue addressed by the contributors to this volume. All of the essays collected here have been published in the highly respected journal *Philosophy & Public Affairs*. Taken together, they offer not only significant proposals for improving established theories of punishment and compelling arguments against long-held positions, but also original and important answers to the question, "How is punishment to be justified?" Part I of this collection, "Justifications of Punishment," examines how any practice of punishment can be morally justified. Contributors include Jeffrie G. Murphy, Alan H. Goldman, Warren Quinn, C. S. Nino, and Jean Hampton. The papers in Part II, "Problems of Punishment," address more specific issues arising in established theories. The authors are Martha C. Nussbaum, Michael Davis, and A. John Simmons. In the final section, "Capital Punishment," contributors discuss the justifiability of capital punishment, one of the most debated philosophical topics of this century. Essayists include David A. Conway, Jeffrey H. Reiman, Stephen Nathanson, and Ernest van den Haag.

Writing as Punishment in Schools, Courts, and Everyday Life Jun 06 2020

A probing and prescient consideration of writing as an instrument of punishment Writing tends to be characterized as a positive aspect of literacy that helps us to express our thoughts, to foster interpersonal communication, and to archive ideas. However, there is a vast array of evidence that emphasizes the counterbelief that writing has the power to punish, shame, humiliate, control, dehumanize, fetishize, and transform those who are subjected to it. In *Writing as Punishment in Schools, Courts, and Everyday Life*, Spencer Schaffner looks at many instances of writing as punishment, including forced tattooing, drunk shaming, court-ordered letters of apology, and social media shaming, with the aim of bringing understanding and recognition to the coupling of literacy and subjection. *Writing as Punishment in Schools, Courts, and Everyday Life* is a fascinating inquiry into how sinister writing can truly be and directly questions the educational ideal that powerful writing is invariably a public good. While Schaffner does look at the darker side of writing, he neither vilifies nor supports the practice of writing as punishment. Rather, he investigates the question with humanistic inquiry and focuses on what can be learned from understanding the many strange ways that writing as punishment is used to accomplish fundamental objectives in everyday life. Through five succinct case studies, we meet teachers, judges, parents, sex traffickers, and drunken partiers who have turned to writing because of its presumed power over writers and readers. Schaffner provides careful analysis of familiar punishments, such as schoolchildren copying lines, and more bizarre public rituals that result in ink-covered bodies and individuals forced to hold signs in public. Schaffner argues that writing-based punishment should not be dismissed as benign or condemned as a misguided perversion of writing, but instead should be understood as an instrument capable of furthering both the aims of justice and degradation.

Punishment, Justice and International Relations Oct 30 2019 This book examines the international political order in the post-Cold War era, arguing that this order has become progressively more punitive. This is seen as resulting from both a human-rights regime that emphasizes legal norms and the aggressive policies of the United States and its allies in the 'War on Terror'. While punishment can play a key role in creating justice in a political system, serious flaws in the current global order militate against punishment-enforcing global norms. The book argues for the necessary presence of three key concepts - justice, authority and agency - if punishment is to function effectively, and explores four practices in the current international system: intervention, sanctions, counter-terrorism policy, and war crimes tribunals. It concludes by suggesting ways to revise the current global political structure in order to enable punitive practices to play a more central role in creating a just world order. This book will be of much interest to students of International Law, Political Science and International Relations.

The Transition from Retributive to Transformative Justice Jul 28

2019 Scientific Essay from the year 2009 in the subject Law - Criminal process, Criminology, Law Enforcement, grade: 86, Ottawa University, course: Penal Abolitionism, language: English, abstract: Crime has long been a stable term with a finite definition, but many modern reforms attack the foundation of retributive justice. Following two incidents of children killing children, this paper will examine various arguments made by Nils Christie (2000) and Louk Hulsman (1986) in regards to crime. This paper will describe and analyse the public and political responses to two notorious cases of the killing of children by children, one in England and one in Norway. Using the works of Christie (2000) and Hulsman (1986), I will present the ways in which the cases were discussed as symptomatic of wider social problems, and how differently England and Norway acted, ultimately portraying their respective juvenile criminal justice system. This paper will examine both the similarities and the differences in the reactions to the killings in England and Norway, arguing that while the similarities may be more obvious the differences may be more instructive. On the surface, both seem like similar cases but because of the different geographical locations, they were handled quite differently. This sets up the context of penological arguments about the emergence of a postmodern penalty. To start, one must understand the basis of Christie's (2000) and Hulsman's (1986) theories respectively. Nils Christie (2000) argues that a nation's extent and level of punishment is a normative question. In criminology, the term normative defines the structures within culture which help regulate the proper function of society. These structures encourage and enforce valued social activity and discourage negative acts. Punishment is

normative because crime control executives and decision-makers are both free and obliged to choose how far punishment will go. The argument Christie (2000) raises is that contemporary crime control values the prison-industrial complex (expansion, big business, and continued incarceration) because society fears any alternative.

Ultimate Punishment Jan 14 2021 As a pioneer of the modern legal novel and a criminal lawyer, Scott Turow has been involved with the death penalty for more than a decade, including successfully representing two different men convicted in death-penalty prosecutions. In *Ultimate Punishment*, a vivid account of how his views on the death penalty have evolved, Turow describes his own experiences with capital punishment from his days as an impassioned young prosecutor to his recent service on the Illinois commission which investigated the administration of the death penalty and influenced Governor George Ryan's unprecedented commutation of the sentences of 164 death row inmates on his last day in office. Along the way, he provides a brief history of America's ambivalent relationship with the ultimate punishment, analyzes the potent reasons for and against it, including the role of the victims' survivors, and tells the powerful stories behind the statistics, as he moves from the Governor's Mansion to Illinois' state-of-the-art 'super-max' prison and the execution chamber.

Shakespearean Power and Punishment Feb 12 2021 The essays in this volume demonstrate how effectively different -- indeed seemingly contradictory -- theoretical paradigms can work with Shakespeare's plays to excavate issues of power and punishment.
