This book provides an account of the integration of smartphone video recording in the language classroom. It outlines and reports on the implementation process and the practical issues related to this learning method. Using simple digital storytelling, and mini-documentary filmmaking, students are able to learn to speak in a foreign language, while at the same time exploring and experimenting with video production. Entrepreneurship for Engineers Oct 22 2019 Entrepreneurs have led economies out of downturns in the last 100 years and evidence points to this trend continuing into the future. In fact, regardless of country or economic conditions, entrepreneurial enterprises are on the rise. High-tech startups, where innovation, dedication, collaboration, and pure genius align into a successful enterprise, will likely see good times—if they start up right. However, many young researchers hesitate to set up their own company. Written by an electrical engineer with more than nineteen years of successful business experience, **Entrepreneurship for Engineers** covers every aspect you must master to become a savvy entrepreneur. The author provides coverage of the fundamentals of global economies, accounting, finance, and quantitative business analysis, because ordinary engineers usually lack these necessary survival skills. Outlining a systematic preparation process that will build a great reputation in the commercial marketplace, the author answers: How to start up a company How to create product lines How to collect venture capital How to write successful R&D proposals How to apply forward thinking How to keep cash flowing in a small firm Typical MBA courses include the following curricula: economics, accounting, finance/investment, marketing, and human resources, with courses like Managerial Communications and Quantitative Business Analysis (Applied Mathematics), and finally Strategic Management and Business Ethics. Engineering curricula seldom includes any of this. Confidential Computing Mar 07 2021 This book highlights the three pillars of data security, viz protecting data at rest, in transit, and in use. Protecting data at rest means using methods such as encryption or tokenization so that even if data is copied from a server or database, a thief cannot access the information. Protecting data in transit means making sure unauthorized parties cannot see information as it moves between servers and applications. There are well-established ways to provide both kinds of protection. Protecting data while in use, though, is especially tough because applications need to have data in the clear—not encrypted or otherwise protected—in order to compute. But that means malware can dump the contents of memory to steal information. It does not really matter if the data was encrypted on a server's hard drive if it is stolen while exposed in memory. As computing moves to span multiple environments—from on-premise to public cloud to edge—organizations need protection controls that help safeguard sensitive IP and workload data wherever the data resides. Many organizations have declined to migrate some of their most sensitive applications to the cloud because of concerns about potential data exposure. Confidential computing makes it possible for different organizations to combine data sets for analysis without accessing each other's data.

INTRODUCTION: Dogs have served in active service at the sides of their handlers for decades. They have been heroes, showing bravery under fire, saving lives (often losing their own), and bringing comfort to the injured and infirmed. The first recorded American use of military dogs was during the Seminole War of 1835 and again in 1842. In Florida and Louisiana, the Army used Cuban bred bloodhounds for tracking. During the US Civil War, dogs were used as messengers, guards, and unit mascots. The Army Quartermaster Corps began the US Armed Forces' first war dog training during World War II. By 1945, they had trained almost 10,000 war dogs for the Army, Navy, Marine Corps, and Coast Guard. Fifteen war dog platoons served overseas in World War II. Seven platoons saw service in Europe and eight in the Pacific. MWDs were trained at Fort Carson, Colorado, organized into scout dog platoons, and used in the Korean conflict for sentry duty and support of combat patrols. In 1957, MWD training moved to Lackland Air Force base (LAFB), Texas, with the Air Force managing the program. Throughout the Vietnam Conflict, the Military Police Corps used dogs with considerable success. Most of these were sentry dogs used to safeguard critical installations such as ports and airfields. A new dimension in canine utilization was realized when marijuana detector dog teams were trained and deployed to assist military police in suppressing illicit drug traffic. Sentry and marijuana detector dog teams were then deployed worldwide in support of military police. An important outgrowth of the conflict was the development of canine research and development efforts. These ongoing efforts were able to initiate the first steps toward developing a more intelligent and stronger military dog, training dogs to detect specific drugs and explosives, developing multiple-purpose dogs, and employing tactical dogs by electronic remote control. In the 1990s and early 2000s, MWDs were deployed around the globe in military operations such as Just Cause, Desert Shield and Desert Storm, Uphold Democracy, and Enduring Freedom and Iraqi Freedom. These teams were effectively utilized to enhance the security of critical facilities and areas, as well as bolster force protection and antiterrorism missions, allowing commanders to use military police **CONTENTS:** Military Working Dog Handler Medical Presentations (1,248 slides) Military Working Dog Handler Additional Medical & Dental Presentations (346 slides) Handler Training Medical Tasks Manual (50 pages) Design Guide for Military Working Dog Facilities (31 pages) **VETERINARY / FOODBORNE ILLNESS SPECIMEN SAMPLE TEST AND SUBMISSION GUIDE (72 pages)** Military Police - Military Working Dogs (58 pages) **SOLDIER'S MANUAL AND TRAINER'S GUIDE MOS 91T ANIMAL CARE SPECIALIST SKILL LEVELS 1/2/3/4 (407 pages)** U.S. Army **MILITARY WORKING DOG MANUAL (136 pages)** U.S. Air Force **MILITARY WORKING DOG PROGRAM (51 pages)** U.S. Navy **MILITARY WORKING DOG MANUAL (206 pages)** United States Department of Agriculture National Canine Operations Manual (194 pages) United States Department of Agriculture National Detector Dog Manual (274 pages)

Apr 08 2021 "What impressed me most...are the intricate and artistic detail with which Art describes the settings and the depth and sensitivity of the emotions expressed in each memoir." -Reba Boyd Wooden, Executive Director, Center for Inquiry, Indiana A retired psychologist shares over eighty poignant, humorous, and entertaining memoirs highlighting his life, from his birth at home in Hudson Falls, New York, to his current experiences as a widower and freethinker. Arthur L. Sterne, Ph.D. has spent his life curious about people and as a result, many of his memoirs reflect his power of keen observation and wonderful sense of humor. His compilation of anecdotes begins with his early life in Jacksonville, Florida, then with his experiences at Vanderbilt University where he met Ann, a nursing student who stole his heart and later became his wife of forty-four years, and continues in Indianapolis, where he once saw Judy Garland and Marlene Dietrich perform. As he moves through the retelling of his favorite memories, Sterne covers such relatable topics as politics, religion, aging, and rebuilding a life after the death of a spouse. In Things I Know or Think I Know or Thought I Knew or Who Knows? Sterne encourages others to think, pose questions and look for answers, ultimately viewing the world in a new light.
